Risk and Reward Profile

Why is the Fund in this category? The lowest category does not mean 'risk free'. The Fund's risk category shown is based on historical data and is not guaranteed. Furthermore, it may not be a reliable indication of the future risk profile of the Fund.

The **Fund is categorised as a 5** because it is invested in markets of countries that are in the process of developing into modern industrialised states and thus display a high degree of potential but also entail a greater degree of risk.

Additional risks that may have a significant effect on Fund performance includes:

- **Currency Risk** - The base currency of the Fund is US Dollar. Non-base currency share classes of the Fund will be unhedged and subject to the impact of the movement of exchange rate between the currency of the share class and the base currency of the Fund which may cause a decline in value.
- **Emerging Market Risk** - Emerging markets by their nature are more volatile and prone to sporadic and unpredictable asset returns. This is caused by varying macro-economic factors such as interest rate risk, liquidity risk, and political risks.
- **Equity Risk** - Investments in equity and equity related securities can contain higher levels of risk and therefore be subject to higher potential changes in value.
- **Counterparty Risk** - A counterparty to a non-exchange financial derivative contract may not be able to meet its payment obligations in the event of default.
- **Custody Risk** - The Depositary may appoint sub-custodians in certain jurisdictions to hold assets of the Fund. Custody services in certain emerging markets jurisdictions remain undeveloped, and accordingly there are transaction and custody risks of dealing in certain emerging markets jurisdictions.
- **Country Risk** - Russia: Issues with settling transactions, corporate governance, rules / regulations protecting investors, publicly available information, tax regulations, banking system, and government support for economic reform are examples of the risks inherent in this market.
- **No Reliance on Past Performance** - The past investment performance of the Investment Manager and / or Sub-Investment Manager should not be construed as an indication of the future results. There may be different investment and return objectives and investment allocation strategies and, in certain cases, investment techniques. Accordingly, the Fund's results may differ from, or be similar to, and are independent of the results previously obtained by the Investment Manager and / or Sub-Investment Manager.

Any investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

A full list of risks applicable to this Fund can be found in the Prospectus and Supplement. See under "Practical Information" for how to obtain a copy.
