Note: Performance information

Past performance is not necessarily a guide to future performance. Please note that this analysis contains simulated data and does not represent actual performance or risk characteristics achieved by investors.

Performance is shown gross of fees prior to 1 Feb 2017 and net of fees from 1 Feb 2017.

The charts and tables on this document show the performance of the Pacific Multi-Asset Accumulator Conservative Strategy net of fees from 1 Feb 2017 to 28 Feb 2020.

Prior to 1 Feb 2017, the performance represents a composite of indices (51% MSCI AC World Daily Total Return Net Ex UK USD, 22% FTSE All-Share Index TR, 1% J.P. Morgan ELMi Plus Composite, 6% IBOXX £ NGLT OA TR, 5% J.P. Morgan EMBI Global Core h, 10% US High Yield, 5% EPRA/NAREIT Dev TR USD).

Investment objective

The Pacific Multi-Asset Accumulator Plus Strategy will have the majority of assets invested in equity markets.

Investment strategy

A blended approach combining active, passive and direct investments across a diversified, global mix of assets classes including equities, fixed income, alternatives, diversifying assets and cash. The majority of assets will be invested in UK and global equities looking to capture the capital growth potential offered by an allocation to equities. The strategy may also have an allocation to fixed income securities including government, corporate and emerging market bonds to help protect capital and provide income. The remainder of that assets may be invested in diversifying asset strategies looking to generate positive returns with limited correlation to traditional asset classes e.g. bonds and equities.

Strategy performance

From 31 Dec 2006 to 28 Feb 2020

Live data from 1 Feb 2017
