Investment objective

The Pacific Multi-Asset Accumulator Defensive Strategy has a strong focus on the protection of capital with limited equity market exposure.

Investment strategy

A blended approach combining active, passive and direct investments across a diversified, global mix of asset classes including equities, fixed income, alternatives, diversifying assets and cash. The majority of assets will be in fixed income instruments including government, corporate and emerging market bonds to help protect capital and provide income. The strategy may also have significant exposure to diversifying asset strategies looking to generate positive returns with limited correlation to traditional asset classes e.g. bonds and equities. The remainder of the assets will be invested in UK and global equities looking to capture the capital growth potential offered by an allocation to equities.
