### Investment objective

The Pacific Multi-Asset Accumulator Plus Strategy will have the majority of assets invested in equity markets.

### Investment strategy

A blended approach combining active, passive and direct investments across a diversified, global mix of assets classes including equities, fixed income, alternatives, diversifying assets and cash. The majority of assets will be invested in UK and global equities looking to capture the capital growth potential offered by an allocation to equities. The strategy may also have an allocation to fixed income securities including government, corporate and emerging market bonds to help protect capital and provide income. The remainder of that assets may be invested in diversifying asset strategies looking to generate positive returns with limited correlation to traditional asset classes e.g. bonds and equities.
