## What is this product?

### Type

UCITS

### Term

The Company is an open-ended Product with no specified maturity date.

### Objectives

The investment objective of the Product is to deliver long term capital growth in USD through investing primarily in equities and equity-related instruments issued by companies linked to the ageing of the population and increasing life expectancy worldwide while also incorporating Environmental, Social and Governance criteria (ESG) into the investment process. The Product aims to achieve its investment objective, by investing in equities of companies anywhere in the world that are linked to the ageing of the population and longer lifespans (known as the longevity economy). The Investment Manager believes that investment in the longevity economy and various themes, including (1) education and wellbeing; (2) longevity consumers; (3) healthcare and (4) later living, should deliver positive returns for investors while promoting positive social development by channelling investment to companies or undertakings which either contribute in some way to longer lifespans; or do not directly contribute to longer live-spans but whose products or services contribute to or enhance the quality of life for older generations. The Investment Manager shall have regard to ESG criteria and certain exclusionary or screening factors in identifying the most appropriate investments for the Product. The Product shall invest at least 70% of its net assets in equities and equity-related securities of companies whose products fall within the above themes. The Product may invest in equity securities of any market capitalisation, however, it is intended that at least 85% of the Product will be invested in companies with market capitalisations of greater than USD 2 billion. The Product typically invests in between 40 and 60 holdings but may hold outside those parameters from time to time. The Product is actively managed and does not intend to track any benchmark nor is it constrained by any index. The Product will reference the MSCI AC World Total Return Net for comparison purposes and for the purposes of calculating performance fees for certain share classes. The Product is not subject to any limitation on the portion of its net assets that may be invested in any one country or region. The Product will not invest more than 20% of its net assets value in emerging markets. The Product may

invest up to 10% of its net assets in unlisted transferable securities including unlisted closed-ended investment funds. The Product may invest up to 10% of its net assets in warrants and rights issued by companies listed on or dealt in recognised markets and exchanges. The Product may not invest in fixed income securities but may invest up to 15% of its net assets in preferred stock. The Product may use financial derivative instruments (ie instruments whose prices are dependent on one or more underlying assets ("FDI")) for efficient portfolio management purposes (such as hedging against anticipated movements in a market or security, or where it is more economically effective than directly holding the underlying asset). The Product may not be leveraged in excess of 100% of its net asset value, through the use of FDI. The base currency of the Product is US Dollar. This Class is denominated in EUR. Non-base currency share classes are unhedged. Income from investments in the Product is not distributed but will be retained in the Product.

### Intended Retail Investor

This Product is intended for investors who understand the degree of risk, who can tolerate a medium level of volatility and who are able to bear any losses (which may equal the whole amount invested) that may result from an investment in the Product. The Product is designed to form part of a portfolio of investments.

### Important Information

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Due to effects of unusual market conditions, other risks could be triggered, refer to "Risk Considerations" in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between October 2021 and October 2022.

The moderate scenario occurred for an investment in the benchmark between May 2014 and May 2019.

The favourable scenario occurred for an investment in the benchmark between October 2012 and October 2017.

Recommended holding period: 5 years.

Example Investment: EUR 10,000.

Scenarios		If you exit after 1 year	If you exit after 5 years

## What happens if Pacific Capital Partners Limited is unable to pay out?

You may face a financial loss should the Manufacturer or Depository default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	130 EUR	1,076 EUR
Annual cost impact (*)	1.3%	1.4% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.5% before costs and 10.0% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0% of the amount you pay in when entering this investment	0 EUR
Exit costs	We do not charge an exit fee for this Product.	0 EUR
<b>Ongoing costs [taken each year]</b>		
Management fees and other administrative or operating costs	1.1% of the value of your investment per year. This is an estimate based on actual costs over the last year.	110 EUR
Transaction costs	0.2% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	20 EUR
<b>Incidental costs taken under specific conditions</b>		
Performance fees	There is no performance fee for this Product.	0 EUR

## How long should I hold it and can I take money out early?
