## What is this product?

### Type

UCITS

### Term

The Company is an open-ended fund with no specified maturity date.

### Objectives

The investment objective of the Product is to produce a consistent level of income through investment in high yielding equities while also growing the net asset value. The Product seeks to achieve its investment objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets. The Product shall seek to invest in equity securities which offer higher yield through dividends than would be available through investment in fixed income instruments in their respective local bond markets. The term “Emerging Markets” is understood in the context of this Product to refer to the markets of countries that are in the process of developing into modern industrialised states and thus display a high degree of potential but also entail a greater degree of risk. It shall include, but is not limited to countries included from time to time in the S&P / IFC Emerging Markets Investible Composite Index or in the MSCI Emerging Markets Index, each of which is a free floating adjusted market index designed to measure the performance of the constituent securities in global emerging markets. The Product is actively managed and does not intend to track any benchmark nor is it constrained by any index. The Product may also invest up to 10% of its Net Asset Value in China A Shares via Stock Connect. The investment team combines top-down analysis and bottom up company research in order to build a portfolio of liquid and diversified holdings. The Product’s investments will have no industrial or sectoral focus. The Product may use derivatives for investment purposes and / or efficient portfolio management purposes. Further information in respect of the Product’s use of derivatives is set out in the Derivatives section of the Product’s Supplement.

The Product will only take long positions for investment purposes. The maximum anticipated long exposure of the Product is 115% of its Net Asset Value (100% direct investment and 15% leveraged exposure). The Product may take short exposures for hedging purposes only and the maximum anticipated exposure in this regard is 20% of its Net Asset Value. The Product may enter in to Repurchase Agreements and Reverse Repurchase Agreements, and Stocklending Agreements for the purpose of efficient portfolio management. The base currency of the Product is US Dollar. This share is denominated in EUR. Non-Base Currency Share Classes are unhedged. Income from investments in the Product is distributed and will not be retained in the Product. Other share classes may not distribute income.

### Intended Retail Investor

This Product is intended for investors who understand the degree of risk, who can tolerate a medium to high level of volatility and who are able to bear any losses (which may equal the whole amount invested) that may result from an investment in the Product. The Product is designed to form part of a portfolio of investments.

### Important Information

- The Company is an investment company with variable capital incorporated in Ireland with registered number 553111 and established as an umbrella fund with segregated liability between sub-funds.

## What are the risks and what could I get in return?

### Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the PRIIPs manufacturer to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

Due to effects of unusual market conditions, other risks could be triggered, refer to “Risk Considerations” in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between January 2022 and February 2023.

The moderate scenario occurred for an investment in the benchmark between September 2014 and September 2019.

The favourable scenario occurred for an investment in the benchmark between May 2016 and May 2021.

Recommended holding period: 5 years.

Example Investment: EUR 10,000.

## What happens if Pacific Capital Partners Limited is unable to pay out?

You may face a financial loss should the Manufacturer or Depositary default on their obligations. There is no compensation or guarantee scheme in place which may offset, all or any of this loss.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	292 EUR	1,845 EUR
Annual cost impact (*)	2.9%	3.0% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.6% before costs and 3.6% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Composition of costs
