Term

The Company is an open-ended fund with no specified maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Objectives

The investment objective of the Product is to deliver long term capital growth in USD through investing primarily in equities and equity-related instruments in the developed world. The Product aims to achieve its investment objective, by investing at least 80% of its net assets in equities and/or equity-related securities of, or relating to, companies which are domiciled in, or that derive a large proportion of their income from, developed markets. A developed market is a country that exhibits a more advanced economy and mature capital markets. These markets are characterised by higher GDP per capita than emerging markets, stable political environments, advanced infrastructure, liquidity and transparency. The Investment Manager shall have regard to Environmental, Social and Governance ("ESG") criteria, both in terms of a positive application of ESG criteria in order to identify the most appropriate investment and in terms of the application of certain exclusionary or screening factors to excluded investments which may have a negative impact on environmental or social matters. The Product shall invest at least 95% of net assets in companies which meet the above screens. The Product is actively managed and does not intend to track any benchmark nor is it constrained by any index. The Product will reference the MSCI World All Cap Index for comparison purposes. The Product will not invest more than 20% of its net asset value in emerging markets. The Product typically invests in between 30 and 50 holdings but may hold outside those parameters from time to time. The Product shall not have any geographic, sectoral or industry focus and may invest in companies of any market capitalisation. The Product may invest up to 10% of its net assets in unlisted transferable securities including unlisted closed-ended investment funds which comply with the eligibility criteria for UCITS and the investment objective of the Product. In addition, the Product may invest up to 10% of its net assets in warrants and rights issued by companies listed on or dealt in Recognised Markets and exchanges, and in depositary receipts and / or participatory notes where the Product cannot gain direct market access. The Product shall not invest in fixed income securities but may invest up to may invest up to 15% of its net assets in preferred stock. Such preferred stock may have fixed or floating rates of interest and need not be of investment grade, as defined by Standard and Poor's. Not more than 10% in aggregate of the Net Asset Value of the Product may be invested in

below-investment grade securities. The Product may also invest in open-ended investment funds provided that they fall within the eligibility criteria for transferable securities under the UCITS Regulations and in exchange traded funds ("ETFs") (including funds managed by Pacific companies). Any such investment shall not exceed in aggregate 10% of the Net Asset Value of the Product. Save for investment in money market funds for cash management purposes, investment shall only be made in collective investment schemes which have investment policies similar to those of the Product. The Investment Manager shall use a liquidity and valuation screening process, which considers the performance of target companies with a view to identifying companies with robust top-line growth prospects, market leading products, pricing power in its relevant market and/or cost control, high and/or improving profitability, strong balance sheets and an attractive current valuation. The Investment Manager shall consider the performance of target companies using a range of accounting metrics and on the basis of regular meetings with management teams to allow a better understanding of a target company's business model and management team. The Product may use financial derivative instruments ("FDI") for efficient portfolio management purposes (such as hedging against anticipated movements in a market or a security or where it is more efficient than directly holding the underlying asset). The base currency of the Product is US Dollars. This Class is denominated in USD. Income from investments in the Product is not distributed but will be retained in the Product. An investment in the Product should be viewed as medium to long-term.

Intended Retail Investor

This Product is intended for investors who understand the degree of risk, who can tolerate a medium level of volatility and who are able to bear any losses (which may equal the whole amount invested) that may result from an investment in the Product. The Product is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Due to effects of unusual market conditions, other risks could be triggered, refer to “Risk Considerations” in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the product/its benchmark between October 2021 and December 2024.

The moderate scenario occurred for an investment in the benchmark between January 2015 and January 2020.

The favourable scenario occurred for an investment in the benchmark between October 2016 and October 2021.

Recommended holding period: 5 years.

Example Investment: USD 10,000.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Company design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Company default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	192 USD	1,432 USD
Annual cost impact (*)	1.9%	2.1% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.6% before costs and 7.5% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
