What is this product?

Type

UCITS

Term

The Company is an open-ended fund with no specified maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Company as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIPs Manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the Product unilaterally.

Objectives

Investment Objective: The Product's investment objective is to achieve long term capital appreciation. The Product seeks to achieve this objective through investing in a concentrated portfolio of primarily equity and equity related securities (such as warrants and rights issues) of large and mid-capitalised companies which will primarily have a market capitalisation of over USD 5 billion. These large and mid-capitalised companies will be listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets. The Product may also invest up to 10% of its Net Asset Value in China A Shares via Stock Connect. Where the Product invests in equity and equity related securities listed on Recognised Markets outside of the Emerging Markets, such investment shall be for the purposes of gaining indirect exposure to the Emerging Markets. The Product may invest up to 10% of its net assets, on a short term basis, in unlisted equity securities of the issuers described above. The Product may invest up to 15% of its net assets, in fixed income securities and preferred stock, where it is considered appropriate to achieve the investment objective of the Product. Such fixed income securities will include government and / or corporate bonds or other debt securities (such as certificates of deposit, treasury bills and commercial paper) which may have fixed or floating rates of interest and need not be of investment grade, as defined by Standard and Poor's. Not more than 10% in aggregate of the Net Asset Value of the Product may be invested in below-investment grade securities. The Product may also invest in deposits, money market instruments such as short dated treasury bonds, exchange traded funds ("ETFs") and collective investment schemes. Any investment in collective investment schemes, including ETFs, shall not exceed in aggregate 10% of the Net Asset Value of the Fund and investment shall only be made in collective investment schemes which have investment policies similar to those of the Product. In addition, the Product may invest up to 10% of its net

assets in warrants and rights issues. The Product may invest up to 10% of its net asset value in fully funded participatory notes to gain exposure to certain jurisdictions where the Product cannot gain direct market access (currently India, Sri Lanka, Vietnam, Saudi Arabia, Kuwait and Qatar). The participatory notes in which the Product may invest will have the equities (as described above) as their underlyings to which the Product could not otherwise gain exposure. For the avoidance of doubt these shall not embed derivatives or leverage. Although it is the normal policy of the Product to deploy its assets as detailed above, it may also retain up to 100% of net assets in cash, liquid government debt securities (including US Treasury Bills), liquid assets such as term deposits and money market instruments (including certificates of deposit, commercial paper and bankers acceptances) in the appropriate circumstances. The Product will only take long positions for investment purposes. The maximum anticipated long exposure of the Product is 115% of its Net Asset Value (100% direct investment and 15% leveraged exposure). The Product may take short exposures for hedging purposes only and the maximum anticipated exposure in this regard is 20% of its Net Asset Value. The Base Currency of the Product is USD. This Class is denominated in USD. Income from investments in the Product is distributed.

Intended Retail Investor

This Product is intended for investors who understand the degree of risk, who can tolerate a medium level of volatility and who are able to bear any losses (which may equal the whole amount invested) that may result from an investment in the Product. The Product is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes that you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Due to effects of unusual market conditions, other risks could be triggered, refer to “Risk Considerations” in the Prospectus and Supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment in the benchmark between March 2015 and March 2020.

The moderate scenario occurred for an investment in the benchmark between May 2017 and May 2022.

The favourable scenario occurred for an investment in the benchmark between February 2016 and February 2021.

Recommended holding period: 5 years.

Example Investment: USD 10,000.

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Company design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Company default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year, you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	130 USD	1,077 USD
Annual cost impact (*)	1.3%	1.4% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.5% before costs and 10.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs
