Background to the Company

Pacific Capital UCITS Funds plc (the “Company”) was incorporated in Ireland on 24 November 2014 as a public limited company under the Companies Act 2014, as amended (the “Companies Act”) with registration number 553111. Unless otherwise provided for in this report, all capitalized terms shall have the same meaning herein as in the latest Prospectus of the Company dated 1 February 2022 (the “Prospectus”).

The Company is an open-ended investment company with variable capital and was established pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the “UCITS Regulations”) and (the Central Bank UCITS Regulations 2019).

The Company is organized in the form of an umbrella fund with segregated liability between its sub-funds (each a “Fund” collectively the “Funds”).

At 31 December 2024, the Company consisted of Twenty-Two Active Funds, detail as follows:

Fund	Launch Date
Pacific Multi-Asset Accumulator – Conservative Fund	20 January 2017
Pacific Multi-Asset Accumulator – Core Fund	20 January 2017
Pacific Multi-Asset Accumulator – Defensive Fund	20 January 2017
Pacific Multi-Asset Accumulator – Plus Fund	20 January 2017

Investment objectives

Pacific North of South EM All Cap Equity

The investment objective of the Fund is to achieve long term capital appreciation by investing primarily in equity and equity related securities (such as warrants and rights issues). The Fund may invest up to 10% of its net assets, on a short term basis. The Fund may invest up to 15% of its net assets value (“NAV”), in fixed income securities and preferred stock.

Pacific Multi-Asset Accumulator – Conservative Fund

This Fund will typically take a comparatively small exposure to gains in equity markets, with such exposure ranging from 20% to 60% of NAV and the remainder invested in fixed income and other asset classes.

Pacific Multi-Asset Accumulator – Core Fund

This Fund will typically take a balanced exposure to gains in equity markets, with such exposure ranging between 40% and 85% of NAV and the remainder invested in fixed income and other asset classes.

Pacific Multi-Asset Accumulator – Defensive Fund

This Fund will typically take a smaller exposure to gains in equity markets, with such exposure ranging up to 35% NAV and the remainder invested in fixed income and other asset classes.

Background to the Company (continued)

Investment objectives (continued)

Pacific Multi-Asset Accumulator – Plus Fund

This Fund will typically take an active exposure in equity markets, with such exposure ranging up to 100% of NAV.

dVAM Global Equity Income PCP Fund

The Fund aims to deliver both income and capital appreciation through investing in global equities. The Fund seeks to achieve its investment objective through investing primarily in global equity securities of dividend paying companies that are well placed to be able to pay sustainable dividends into the future.

dVAM Balanced Active PCP Fund

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

dVAM Growth Active PCP Fund

The investment objective of the Fund is to achieve long term capital growth. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

dVAM Cautious Active PCP Fund

The Fund aims to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

Pacific G10 Macro Rates Fund

The Fund's investment objective is to deliver positive returns over a rolling 12-month period.

dVAM Diversified Liquid Alternatives PCP Fund

The Fund's investment objective is to achieve long-term returns of the Bank of England Base Rate +4%, net of fees, over rolling five year annualised periods.

dVAM Global Equity Focus Strategy PCP Fund

The Fund's investment objective is to deliver capital appreciation through investing in global equities.

Pacific MA Sustainable - Balanced Fund

The Fund's investment objective is to provide capital growth over the long term primarily through investments which meet sustainable investment criteria.

Pacific Longevity and Social Change Fund

The investment objective of the Fund is to deliver long term capital growth in USD through investing primarily in equities and equity-related instruments issued by companies linked to the ageing of the population and increasing life expectancy worldwide while also incorporating Environmental, Social and Governance criteria ("ESG") into the investment process.

Background to the Company (continued)

Investment objectives (continued)

Pacific North of South EM Equity Income Opportunities Fund

The investment objective of the Fund is to produce a consistent level of income through investment in high yielding equities while also growing the net asset value.

Pacific North American Opportunities Fund

The investment objective of the Fund is to achieve long-term capital appreciation by investing primarily in North American equity securities.

Pacific Coolabah Global Active Credit Fund

The Fund's investment objective is to achieve a return in excess of global corporate bond markets by investing primarily in global investment grade corporate debt securities and government or sovereign bonds, using derivatives where appropriate.

dVAM Smarter Money Credit PCP Fund*

The Fund's objective is to achieve a return in excess of cash by investing primarily in global investment grade corporate debt securities and government or sovereign bonds, using derivatives where appropriate.

*Launched on 24 October 2024.

LAM Alternatives and Real Assets Fund**

The Fund's investment objective is to provide a total return through a combination of capital growth and income over the long term (5 years +). The Fund also aims to provide a diversified return profile when compared against traditional global equity and global fixed interest markets. Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a 5 year, or any, period.

LAM Global Equity Fund**

The Fund's investment objective is to provide a total return through a combination of capital growth and income over the long term (5 years +). Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a 5 year, or any, period.

LAM Global Fixed Interest Fund**

The Fund's investment objective is to provide a total return through a combination of capital growth and income over the long term (5 years +). Capital is in fact at risk and there is no guarantee that a positive return will be achieved over a 5 year, or any, period.

LAM Multi Asset Stewardship Fund**

The Fund's investment objective is to provide capital growth over the long term (5 years+) primarily through investments which meet sustainable investment criteria (as described in further detail below). There can be no guarantee that the Fund will achieve its investment objective over a 5 year, on any, period.

**Launched on 5 November 2024.

There can be no guarantee that the Funds will achieve their investment objectives.

Full details of the investment objectives and policies of the Funds are set out in the Prospectus and related Supplements.

Directors' Report

The Directors present to the shareholders the statutory report together with the audited financial statements of, the Company for the financial year ended 31 December 2024.

The Company is an umbrella fund with segregated liability between Funds and an open-ended investment company with variable capital incorporated in Ireland on 24 November 2014 with limited liability.

The functional currency of the Pacific Multi-Asset Accumulator – Conservative Fund, Pacific Multi-Asset Accumulator – Core Fund, Pacific Multi-Asset Accumulator – Defensive Fund, Pacific Multi-Asset Accumulator – Plus Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Cautious Active PCP Fund, dVAM Diversified Liquid Alternatives PCP Fund, Pacific MA Sustainable – Balanced Fund, LAM Alternatives and Real Assets Fund, LAM Global Equity Fund, LAM Global Fixed Interest Fund and LAM Multi Asset Stewardship Fund is Pound Sterling (“GBP”) and the functional currency of the Pacific North of South EM All Cap Equity, dVAM Global Equity Income PCP Fund, Pacific G10 Macro Rates Fund, dVAM Global Equity Focus Strategy PCP Fund, Pacific Longevity and Social Change Fund, Pacific North of South EM Equity Income Opportunities Fund, Pacific North American Opportunities Fund, Pacific Coolabah Global Active Credit Fund and dVAM Smarter Money Credit PCP Fund is US Dollar (“USD”).

There was no change in the nature of the Company's business during the financial year.

Results, activities and future developments

The results from operations are set out in the Statement of Comprehensive Income. A detailed review of activities of the Company are contained in the Investment Manager's Report and Sub Investment Manager's Report. The nature of the business is expected to remain the same in the future.

Directors

The Directors who held office at any time during the financial year are detailed below:

Raymond O'Neill* (Irish)

Victoria Parry* (British, Irish resident)

James Davidson** (British)

Mary Elizabeth Murphy**^ (Irish)

* Non-executive Independent Director.

** Non-executive Director.

^ Appointed on 14 August 2024.

Directors' and Company Secretary's interests in shares and contracts

The Directors, the Company Secretary, and their families had no beneficial interests in the share capital of the Company at 31 December 2024. None of the Directors has a service contract with the Company.

Directors' Report (continued)

Dividends

It is not the intention of the Directors to declare any dividend on any share classes in the Multi-Asset range of Funds, the Pacific G10 Macro Rates Fund or the Pacific Longevity and Social Change Fund. However, Pacific North of South EM All Cap Equity can make distributions quarterly and dVAM Global Equity Income PCP can make distributions semi-annually. During the financial year ended 31 December 2024 Pacific North of South EM All Cap Equity Fund declared a dividend of USD 14,907,658 (2023: USD 13,103,112) in relation to the Class GBP Z Dist Shares, Class GBP Inst Dist Shares, Class GBP R2 Dist Shares and Class USD Inst Dist Shares for Q4, Pacific North of South EM Equity Income Opportunities Fund declared a dividend of USD 3,139,355 (2023: USD 1,966,260) in relation to Class GBP Inst Dist Shares and Class EUR Inst Dist Shares for Q4, dVAM Global Equity Income PCP declared a dividend of USD 10,960,086 (2023: USD 7,743,183) GBP E2 Shares, Class USD A2 Shares, Class GBP B2 Shares, Class GBP A2 Shares, Class GBP D2 Shares, Class USD D2 Shares, Class USD E2 Shares, Class EUR A2 Shares, Class EUR E2 Shares, Class EUR D2 Shares, Class EUR B2 Shares, Class AUD A2 Shares, Class USD B2 Shares and Class CHF A2 Shares, Pacific Longevity and Social Change Fund declared a dividend of USD 179 (2023: USD Nil) in relation to Class EUR R4 shares for Q4, Pacific North American Opportunities Fund declared a dividend of USD 24,012 (2023: USD Nil) in relation to GBP R3 Dist Shares for Q4, LAM Alternatives and real assets Fund declared a dividend of USD 8,531 (2023: USD Nil) in relation to Class GBP Inst Dist Shares for Q4, LAM Global Equity Fund Fund declared a dividend of USD 7,967 (2023: USD Nil) in relation to Class GBP Inst Dist Shares for Q4, LAM Global Fixed Interest Fund declared a dividend of USD 10,846 (2023: USD Nil) in relation to Class GBP Inst Dist Shares for Q4 and LAM Multi Asset Stewardship Fund declared a dividend of USD 40 (2023: USD Nil) in relation to Class GBP Inst Dist Shares for Q4.

Accounting records

The Directors ensure compliance with the Company's obligation to maintain adequate accounting records by appointing competent persons to be responsible for them.

The accounting records were maintained by Citibank Europe Plc at 1 North Wall Quay, Dublin 1, Ireland.

Directors' compliance statement

In accordance with Section 225 of the Companies act 2014, as amended, the Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations; and
- (b) confirm that:
 - (i) a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the company with its relevant obligations;
 - (ii) an adequate structure is in place, that in the Directors' opinion, is designed to secure material compliance with the Company's relevant obligations; and
 - (iii) an annual review procedure has been put in place to review the Company's relevant obligation and ensure a structure is in place to comply with these obligations.

Connected Persons

Regulation 43 of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted: a) at arm's length; and b) in the best interest of the unit holders of the UCITS".

The Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43 are applied to all transactions with a connected party; and all transactions with connected parties that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43.

Significant events during the financial year

See Note 14 in the notes to the financial statements.

Significant events after the financial year end

See Note 15 in the notes to the financial statements.

Directors' Report (continued)

Corporate governance statement

The Company is subject to compliance with the requirements of the Companies Act and the Central Bank UCITS Regulations, as applicable to the Company.

The Company assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes as published by the Irish Funds in December 2011 (the "Irish Funds Code"). The Directors adopted the corporate governance practices and procedures in the Irish Funds Code with effect from 6 February 2015.

The Corporate Governance Code recommends that the Directors of the Company include one representative of the investment manager.

Risk management objectives and policies

The main risks arising from the Company's financial instruments are market price, interest rate, foreign currency, liquidity and credit risk. For further information on risk management objectives and policies, please see Note 9 of these financial statements and the Prospectus and Supplements of the Company.

Going concern

The Directors assess the Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and use the going concern basis of accounting unless they either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

Statement on relevant audit information

Each of the persons who are Directors at the approval date of these financial statements confirm:

- as far as the Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- the Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Independent auditors

Deloitte Ireland LLP, Chartered Accountants and statutory audit firm, will continue in office in accordance with Section 383 (2) of the Companies Act.

Audit committee

There is no Audit Committee due to the size, scale and complexity of the fund.

On behalf of the Board of Directors

DocuSigned by:

Victoria Parry F015A6D3EADB42B...

DocuSigned by:

Raymond O'Neill NE013247CB1E284E8...

Date: 16 April 2025

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with the Companies Act.

The Companies Act requires the Directors to prepare financial statements for each financial year. Under the Companies Act the Directors have prepared the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Under the Companies Act the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS and ensure that they contain the additional information required by the Companies Act; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act, as amended and enable those financial statements to be audited.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary who has been appointed as Depositary to the Company pursuant to the terms of a depositary agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Investment Manager's Report

For the financial year ended 31 December 2024

Pacific Multi-Asset Accumulator Range

End of March

Macroeconomic data continued to show resilience in March, particularly in the US. This data pushed back the expected interest rate cutting cycle in the US to later in the second half of the year. Surveys-based measures of activity, such as the ISM Services Index that printed at 52, still show the US economy in expansionary territory. Labour markets and consumer spending data also support this view.

Equity returns were once again strong over the month, with global equities gaining over 3% in sterling terms. Performance was broad based, with UK equities being the strongest regional mover after a period of underperformance. Within US Equities, our holding in a US Value ETF, which invests in undervalued stocks across the sectors of the US stock market, significantly outperformed the S&P 500.

Fixed Income markets were also positive over the month, with yields falling, despite stronger news on economic growth and inflation. Within fixed income a holding in UK Inflation-Linked Gilts added value, benefitting from the fall in yields and the increase in inflation expectations over the month.

Within Alternatives, our holdings in UK property rallied over the month. A holding in UK Commercial Property REIT, a closed-end fund that trades at a discount to net asset value and that has been the subject of a takeover proposal, rallied by 9.5%.

Diversifying assets once again provided returns that are uncorrelated with bond and equity markets. Holdings in the AQR Style Premia and Managed Futures funds, which utilise quantitative signals across Equity, Fixed Income, FX and Commodity markets generated strong returns, bringing their returns over the year to 21% and 11% respectively.

End of June

In June equity and bond markets continued to move together, with both asset classes rallying over the month. Inflation in the US came in at 0.0% month on month, below market expectations, which proved positive for both equities and bonds. Retail sales in the US were also below market expectations, highlighting that the strength of the consumer is softening somewhat, after a very strong start to the year. At the Federal Reserve meeting, whilst the deposit rate was unchanged, the forward projections from the Fed (the Dots), showed just one cut this year, fewer than the two cuts that were previously implied for the year.

Equity markets rallied, with the MSCI World up over 3.0% on the month. Within equities, returns were once again strongest in US markets, and our holding in the iShares MSCI USA SRI was a large contributor to returns, outperforming the S&P 500. Stock markets continue to perform in part due to higher earnings expectations, particularly in businesses involved in AI. European equity markets lagged, beset by rising political volatility, as a surge in the polls for both the far-right and far-left parties in France impacted markets.

Fixed income also generated positive returns, with the 10-year US bond rallying 11bps over the month. Within the asset class, our position in UK Government bonds added value over the course of the month.

A holding in the NextEnergy Solar Fund, which builds and operates solar infrastructure on the UK grid was up significantly on the month, rallying nearly 13%. This was due to announcing the sale of a small portion of its assets and announcing a share buyback programme, both of which closed some of the discount that the vehicle trades at relative to its net asset value.

End of September

Two of the most powerful and influential institutions changed policies in September: the US Federal Reserve and the Chinese Politburo. Both surprised markets and yet globally equity and bond markets were broadly unchanged at the headline level during the month. The Federal Reserve announced a 50-basis point cut, exceeding expectations for a quarter point cut, to kick off their cutting cycle. The Fed cited growing confidence that much had been done to tame inflation and that the focus of the Fed has shifted to the downside risks to unemployment. However, payrolls data released at the end of the month surprised to the upside, indicating that while the labour market had moderated over the course of the year, an imminent growth slowdown in the US still seemed unlikely.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Multi-Asset Accumulator Range (continued)

End of September (continued)

Whilst a cut from the Federal Reserve was well telegraphed, the Chinese authorities launched a coordinated stimulus effort, utilising monetary tools, asset purchasing programmes and the announcement of a fiscal stimulus programme following an unscheduled Politburo meeting chaired by President Xi. These measures are an attempt to address the ailing property market and falling consumption levels in the economy.

Given the measures to support the economy announced in China, emerging market equities outperformed dramatically over the month. Our holding in Chinese technology stocks, which we had bought in January when we believed it represented a deep value opportunity, rallied over 30% in September.

Fixed income markets were also a positive contributor to portfolio performance, with US TIPS outperforming a flat gilt market as inflation expectations rose over the month. Within Diversifying Assets, a position in a 2-10 steepener rallied over the month as the US yield curve moved into positive territory, having been inverted for over two years.

End of December

After a rally in risk-on assets in November, we saw a pullback in equities as investors began to consider the prospect of higher and more persistent inflation, along with concerns around the enactment of tariffs and whether this will disrupt and challenge international trade relations.

The US economy continues to run hot with Q3 GDP growth being revised up to 3.1% (from 2.8%). In contrast, growth outside of the US continues to falter, with UK real GDP growth unexpectedly falling 0.2% over the same period.

It was also another busy month of Central Bank activity with the Federal Reserve and ECB looking beyond rising headline inflation in November, both cutting rates by 25bp to 4.25%-4.5% and 3%, respectively. However, Jerome Powell indicated that the Fed will be "more cautious as we consider further adjustments to our policy rate". The prospect of interest rates remaining higher for longer, as well as concerns around inflation and the expected increase in the supply of bonds, which pushed government bond yields higher in December.

The impact of higher yields was also felt in equity markets, with US equities drifting lower over the month. However, despite the fall the S&P 500 has had another remarkable year, trouncing the returns of other major markets. Whilst developed markets struggled to make further progress, within Emerging Markets we saw positive performance from the Pacific North of South EM All Cap and EM Income Opportunities funds, with another year of outperformance in an environment which has been challenging for active managers.

Finally, our allocation to diversifying assets positively contributed to performance as the strategies continued to demonstrate their low correlation to equities and bonds. The PAM 2s 10s Steepener position benefited as US longer term yields moved up relative to short term yields, a position that we expect to be useful in 2025 as investors demand higher returns for the uncertainty of US policy and the outlook for interest rates.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific G10 Macro Rates Fund

End of March

March started with weaker data, ISM manufacturing and services both coming in lower than expectations especially the prices paid component, drawing the UST 10Yr bond yield down to a monthly low of 4.04%. Powells HH testimony was a masterclass of not rocking the boat, and NFP didn't cause too much trouble before primary rent affected CPI and reversed the price action. The fed meeting in March bought time, with the dot plot retaining the 3 cuts by year end, and the likely starting gun in June, but reducing the 4 cuts in 2025 to 3. The month ended with Waller and Powell talking tough and rather blatantly spelling out a more reserved outlook on rate cuts. With markets closed for Easter, the price action spilled into the month of April.

The ex-US excitement over the month was provided by the BoJ dropping YCC and lifting rates to a positive corridor of 0bp to 10bp after 8 years of NIRP. The SNB was the "first cab out of the rank", cutting rates by 25bp to 1.50% after an easier ride on the inflation rollercoaster than most.

The theme of the month and quarter has been the gradual waning of rate cutting expectations by the market to something more closely resembling central bank communiques. After an embarrassing episode of misdiagnosing transitory inflation, central banks appear to be more accurately recognising latent economic strength relative to the market.

The US 10y closed the month 5bps lower and 5s-30s swap was 1bps flatter.

End of June

June may be remembered as a political storm, with a snap election called in France, result declared in India, full swing canvassing in the UK and ramping up in the US. However, in the world of rates we saw a subtle shift in G10 central banks towards a less restrictive policy stance. This started with the Bank of Canada responding to better inflation data and cutting policy rates by 25bps, without offering any forward guidance. This was swiftly followed by the ECB, with a more contentious 25bps cut. Some members in its governing council were obviously disappointed in the rate cut decision ignoring the most recent uptick in activity data. The cut of 25bp from the SNB, which was the second of this cycle, aimed at tackling CHF currency strength while its domestic inflation is close to target.

Rhetoric from other central banks, including the Fed and the BoE, shifted in June from the previous narrative of strictly following data dependency, towards a more nuanced "dual mandate" stance and the potential of policy rate cuts irrespective of "inflation persistence". This shift raises questions about whether the inflation target will be reached, if the risk of persistent sticky inflation is being fully appreciated by central banks, or whether there has been an economic pivot towards higher unemployment and an output gap yet to appear meaningfully in public data.

Elsewhere in Europe, sovereign credit spreads increased volatility as the French 10y OAT bond spread widened 40bp from the equivalent German Bund on the back of a snap national election called by Macron. The President of France was so shocked by the number of domestic voters swinging to the far right Rassemblement National (RN) party in the European parliamentary elections, that he immediately dissolved his own parliament. This appears to have backfired as his own party, Ensemble, who have since come third in the first-round of voting and now rely on a deal with the far left, Nouveau Front Populaire, to prevent RN from securing a majority.

The odds of a Trump victory in the November US election increased after a poor showing from incumbent President Biden at their head-to-head CNN debate. This is beginning to be reflected in markets with an increased probability of tariffs vs Europe and China.

The above events are providing ample cause for spreads, rates curves and FX levels to move accordingly. We expect this political uncertainty to remain elevated for the remainder of the year.

The US 10y closed the month 10bps lower and 5s-30s swap was 2.5bps steeper.

End of September

September finally delivered the long waited for Fed cut after benign monthly NFP payrolls and CPI data. It was worth the wait with a jumbo 50bp move that had not been fully priced. As usual the market extrapolated a "Fed behind the curve" and "what do they know that we don't" type of response, rapidly pricing in further cuts of that magnitude. The 2-10 treasury curve recent steepening was vindicated and pushed on through into positive territory after a record 2 years and 2 months inverted.

Other G10 central banks were active in September with ECB, Riksbank, BoC and SNB all lowering by 25bp. Economic data in the Euro area continued to surprise to the low side, with thoughts now turning to an increase in pace of cuts.

For the financial year ended 31 December 2024

Pacific G10 Macro Rates Fund (continued)

End of September (continued)

Politically, President Macron of France finally appointed Michel Barnier Prime Minister, which did little to improve the spread of French 10y Oat vs German Bunds, widening back out towards August highs of 80bp. Not least driven by the French fiscal deficit for 2024 revised again, this time to -6% (from an original -4.4%). The US elections being just only a month away is now firmly on the radar and will increasingly move markets in portfolio pre hedging.

The US 10y closed the month 12.2bps lower and 5s-30s swap was 9.9bps steeper.

End of December

December had bond equity correlation flipping positive again, highlighting fragility in the system. 10y UST yields rose 40bps as fears of a US slowdown abated with a solid NFP report, backed up by robust retail sales. The nail in the coffin was the December Fed meeting delivering the expected 25bp cut but trimming their median dot plot for 2025 to only 2 cuts from a previous 4. This dragged up yields across all maturities and steepened the curve. The higher yields continued to strengthen the USD and knock on effects increased debt servicing costs everywhere, notably in the UK with its limited fiscal headroom. Elsewhere German Chancellor Scholz lost a no-confidence vote triggering an election on 23rd February 2025. Continued aggressive tariff talk by Trump keeps investors on their toes, along with a new Department of Government Efficiency (Doge) headed by billionaire Musk.

A busy month for G10 Central banks with Canada and Switzerland cutting 50, and US, Europe and Sweden doing 25bp. Despite some bluster, the BoJ failed to deliver a hike.

The US 10y closed the month 40bps higher and 5s-30s swap was 5 bps steeper.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Longevity & Social Change Fund

End of March

The MSCI World equities index was up 3% in March (in GBP) led by Energy, Materials and Utilities and broad performance across major regions. March reporting by a number of consumer discretionary names introduced some doubt about the resilience of the US consumer confirming our earlier assessment that demand is likely to remain bifurcated. Growth in sectors which proved most resilient so far, such as beauty, seems to be waning. Still, employment data remains stronger than expected with inflation readings surprising on the upside in recent months, all of which points to a greater likelihood of "higher for longer" rates cycle. In this complex environment, we believe the Longevity portfolio offers a balanced defensive stance and remains well placed to benefit from long term demographic trends.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy delivered a positive return but marginally underperformed its global benchmark in March. Strong stock selection in Healthcare and Financials as well as our zero allocation to Information Technology were the main contributors to performance. This was offset by underperformance in our Consumer Discretionary and Staples holdings. On a stock level, the top three absolute contributors to Fund performance in March were Convatec, Exact Sciences and Tandem Diabetes. The primary detractors were Basic Fit, Reckitt Benckiser and lululemon.

Healthcare was again the main contributor to performance with strong gains in Medical Devices and Pharmacy subthemes. On a stock level, Convatec, Tandem Diabetes and AstraZeneca drove the largest contribution to return while Transmedics was the main detractor. Convatec's FY23 results beat expectations on top and bottom line with continued improvement in FCF performance. The company boosted top line guidance, backed by improving product pipeline and indicated cash generation will remain solid. Transmedics gave up some of the prior months' gains and we took the opportunity to increase our allocation as we see the long term growth story intact, backed by expanded logistics offering which is delivering ahead of expectations and helping improve efficiency and penetration. The shares posted a solid recovery in April so far.

Longevity Consumer saw strong performance led by Financial Planning and Travel & Leisure, while Companionship lagged. On a stock level Brunswick, part of the Travel & Leisure subtheme, and Allianz, part of Life & Non-life Insurance subtheme, were the main contributors to performance. Although Allianz's Q4 23 results in February initially underwhelmed on outlook and share buyback, shares recovered in March leading gains in the broader Insurance sector. Pets at Home, part of the Companionship subtheme, was the main detractor from performance as CMA reported it will launch a formal Vet Market investigation. We held follow up discussions with the company and industry experts and remain reassured that Pet's business model, which houses its vet business in JVs and mostly under a group brand umbrella, is likely to mean it will be minimally affected by potential action from the regulator.

Education & Wellbeing was the weakest subtheme with solid trends in Screening and Aesthetics & Vision, while Fitness & Nutrition and Hygiene & Personal Care lagged. On a stock level Basic Fit and lululemon were the main detractors from performance. Basic Fit delivered a solid Q4 report but new club expansion guidance disappointed the market. Our follow-up meetings with the company and analysis confirmed that cash generation should remain a priority for what remains an attractively valued growth stock. Lululemon reported another strong quarter, but decelerating trends in the US and cautious near term guidance prompted a derating in the richly valued share. We still view lululemon as a well-run business, with a strong innovation track record and attractive expansion potential in China, which should support ongoing share gains in the fitness space. Exact Sciences, part of the Screening subtheme, was the main contributor to performance in March. The company reported positive data on CRC study results which showed promising performance of its next generation Cologuard-Plus test.

Outlook

As we look ahead to 2024, we remain focused on the reality that populations around the world are ageing and the social implications around this demographic transformation continues to create significant opportunities for companies that provide products and services that meet the changing consumption patterns driven by this phenomenon. Our Longevity and Social Change strategy is focused on identifying high-quality businesses which have such exposure and can deliver sustainable returns over the long term.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Longevity & Social Change Fund (continued)

End of June

The MSCI World equities index was up 3% in June (in GBP), predominantly driven by Information Technology, while performance across the other sectors was more mixed. Despite a 25bp rate cut by the ECB at the start of June, European equities lagged, weighed down by the announcement of a parliamentary election in France. Inflation readings continued to moderate both in Europe and in the US. US PPI and Core CPI readings for the month of May both came in below expectations, raising the odds that the Fed will begin to ease in Autumn. In the meantime, the weekly initial jobless claims trend continued to tick up, but remains below the peaks seen last August, and stands in contrast to a firming in the May JOLTS data. The US June employment report signalled some cooling in the labour market too, with the unemployment rate increasing slightly to 4.1% and a continued moderation in the annual increase in average hourly earnings. All in all, while the probability of a soft landing appears to be increasing, there is lingering uncertainty in the months to come, perpetuated by a fragile geopolitical landscape, elections and mixed growth trends across key global economies. We believe the Longevity portfolio offers a balanced defensive stance and remains well placed to benefit from long term demographic trends.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy underperformed its global benchmark in May, primarily due to our zero allocation to the Information Technology sector and a retreat in some of our Healthcare, Financials and Consumer holdings. On a stock level, the top three absolute contributors to Fund performance in June were Transmedics, AbbVie and Booking. The primary detractors were GSK, Tandem Diabetes and Brunswick. Education and Wellbeing was the main detractor from performance. Stock weakness was concentrated in the Fitness and Nutrition subtheme, where Nike sold off by close to 20% on the back of a downbeat FY25 guide and concerns over the speed of turnaround and the product pipeline. Basic Fit saw some pressure due to its exposure to France. Topsports provided a disappointing trading update, which indicated consumer trends in China remain weaker than expected.

Healthcare had a mixed performance in June, weighed down by the Medical Devices subtheme. Another strong month of performance in Transmedics was more than offset by weakness in Procept Biorobotics and Tandem Diabetes. In Pharmacy, strong performance in AbbVie and Eli Lilly shares was more than offset by a sharp selloff in GSK. It was announced on May 31 that the Delaware court would permit plaintiff expert testimony as part of the Zantac litigation. GSK views the decision as inconsistent with previous methods used by US courts to determine whether an expert testimony should be admissible at trials and has started the appeal process to overturn the ruling. An additional setback came with the news that the RSV vaccine will not be recommended for the 55-59 age cohort. Additionally, working group decided to show no preference amongst available vaccines, which include Moderna and Pfizer.

In Longevity Consumer, positive contribution from the Companionship subtheme was more than offset by weakness in Financial Planning and Life and Non-Life Insurance. Amundi shares derated sharply, despite earnings upgrades into Q2 results, on concerns over the risks associated with the French elections outcome. In Life Insurance, the Legal & General CMD failed to revive investor enthusiasm. The proposed buyback, while a positive, was counterbalanced by muted capital generation targets and only 2% dividend growth expected for 2024-27. Brunswick, part of the Travel & Leisure subtheme, was one of the top three detractors from overall June portfolio performance as high interest rates continue to delay the recovery in boat registrations, while concerns on dealer inventory are rising.

Later Living was the only positive contributor to performance in June, driven by the Health Insurance subtheme and gains in United Health and Humana. We expect the Q2 reporting season to help improve visibility on unit costs and utilisation rates.

Outlook

As we look ahead to 2024, we remain focused on the reality that populations around the world are ageing. The social implications around this demographic transformation continue to create significant opportunities for companies that provide products and services which meet the changing consumption patterns driven by this phenomenon. Our Longevity and Social Change strategy is focused on identifying high-quality businesses which have such exposure and can deliver sustainable returns over the long term.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Longevity & Social Change Fund (continued)

End of September

The MSCI World equities index was up 0.2% in September (in GBP). Fading concerns over the slowing US economy drove a rotation out of the defensives and into cyclicals. On a sector basis, Consumer Discretionary, Communication Services, and Materials led the gains, while Healthcare was the weakest performer. By region, the positive surprise came out of China, following the Politburo's announcement of plans for new macro and fiscal stimulus aimed at reviving the sluggish domestic economy. Outside of China, the ECB and the Fed, both cut interest rates, with the Fed asserting that its decisive 50 basis point cut was a "recalibration of the policy". This was contrary to some market observer interpretations that the cut was a response to the slowing economy. While the labour market has certainly cooled, it is not translating into broader weakness, widespread layoffs or lower capex spending. Real income is finally on a positive path, supporting purchasing power, and the back-to school season is off to a good start. We maintain our cautiously optimistic view and don't expect a hard landing for the US economy, but we remain mindful of the near-term uncertainty given the upcoming US elections and the ongoing conflict in the Middle East, which may cause near term shifts in sentiment as well as hold implications for inflation. We believe the Longevity portfolio offers a balanced defensive stance and remains well placed to benefit from long-term demographic trends.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy underperformed its global benchmark in September, with most of the underperformance attributable to our overweight allocation to Healthcare. Even though our Healthcare holdings fared better than the sector, some profit taking among our largest holdings weighed on performance. On a stock level, the top three absolute contributors to Fund performance in September were Exact Sciences, Ulta Beauty and Booking. The primary detractors were AstraZeneca, GSK and Icon. Education & Wellbeing was the main contributor to performance, with all subthemes contributing positively and most of our holdings up. Exact Sciences, part of the Screening subtheme, maintained its lead after releasing some positive data on its blood-based test. Ulta Beauty, part of the Aesthetics & Vision subtheme, continued to re-rate off the mid-year lows and on the easing concerns about the state of the US consumer. Topsports, part of the Fitness & Nutrition subtheme, was another meaningful contributor to performance.

A broad improvement in sentiment on China exposed names supported a rerating in the shares despite the company guiding the market down on top line growth earlier in the month. Longevity Consumer subtheme delivered a strong month, with Financial Planning and Travel & Leisure both posting solid gains. Booking, part of the Travel & Leisure subtheme, continued to reach new highs. Carlyle and ICG were the main contributors to performance in Financial Planning with the latter's gains also reflecting a September update on its latest fund close, which materially exceeded expectations. Healthcare performance was weak across the board, but the most meaningful negative contribution came from AstraZeneca, GSK and ICON. Profit taking across the sector, concerns about China exposure and ongoing uncertainty surrounding the US election outcome weighed on the sector's performance. AstraZeneca reached a new high at the end of August but disappointing data on a key cancer drug and news of a probe by the Chinese government into illegal drug import activities by a few of its current and former employees drove the share price weakness in September.

Outlook

As we look ahead to the remainder of 2024, we remain focused on the reality that populations around the world are ageing. The social implications around this demographic transformation continue to create significant opportunities for companies that provide products and services which meet the changing consumption patterns driven by this phenomenon. Our Longevity and Social Change strategy is focused on identifying high-quality businesses which have such exposure and can deliver sustainable returns over the long term.

End of December

The MSCI World equities index was down 1% in December (in GBP), reversing some of the gains seen in November as the market reacted to the Fed's December meeting and to the possible policy shifts post the US election. Information Technology, Consumer Discretionary, and Communication Services were the only sectors to deliver a positive performance. Energy, Materials and Real Estate were the weakest sectors.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Longevity & Social Change Fund (continued)

End of December (continued)

The Fed reduced its benchmark interest rate by 25bps, in line with market expectations, but signalled a more cautious approach to future rate cuts in 2025 and revised its inflation outlook upward. This sent jitters through equity markets as well as Treasuries as yields rose. Our expectation for a resilient path for the US economy remains unchanged, but we are mindful of the relatively rich equity valuations currently and the uncertainty which comes with a Republican sweep, including the potential for a trade war, higher inflation and increased geopolitical tensions. We believe the Longevity portfolio offers a balanced defensive stance and remains well placed to benefit from long-term demographic trends.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy underperformed its global benchmark in December, with most of the underperformance attributable to our overweight allocation to Healthcare and zero allocation to Information Technology.

On a stock level, the top three absolute positive contributors to Fund performance in December were Lululemon, Ulta Beauty and Medicover. The primary detractors were Transmedics, Brunswick and Service Corp International. Education and Wellbeing was the strongest contributor to performance led by Fitness & Wellbeing and the Aesthetics & Vision subthemes. Lululemon reported stronger than expected Q3 results, with stable trends in the US and continued strength in International reassuring investors that the growth algorithm is intact. Ulta Beauty also gained on the back of its Q3 report with growth and margins both posting a positive surprise. The company recently announced CEO succession plans and provided a positive update on holiday trading. While it is too early to say whether stronger trading results reflect an improving competitive environment it is nevertheless reassuring and should stabilise valuation levels following a turbulent 2024.

The weakest performers were Exact Sciences, Cooper, and Hologic. Cooper reported a Q4 EPS beat but a slight miss on revenues and FY25 top line growth guidance drove a derating in the shares. We believe Q4 and November deceleration seen by the company was likely temporary and expect Cooper to return to share gains in contact lenses going forward. Longevity Consumer was held back by weakness in Brunswick and Booking, both part of the Travel & Leisure subtheme. While retail momentum and dealer sentiment improved post the election, a delayed rate cutting cycle is seen as a negative for Brunswick, as persistent high rates are likely to weigh on affordability of the boating products. We view weakness in Booking shares as a temporary reversal. The company presented at an investor conference in London and laid out several cost rationalisation initiatives.

We expect travel and leisure to remain one of the most resilient consumer categories the coming year. In Financial Planning, Carlyle and Ameriprise were the main detractors from performance, while Amundi made a positive contribution. Life & Non-Life Insurance subtheme made a positive contribution with Legal & General the main driver of this. The company held a deep dive on its Institutional Retirement business and signalled a potential for higher capital returns, which was welcomed by the market. Healthcare was the main detractor from fund performance in December driven primarily by a sell-off in our Medical Devices holdings. Transmedics hosted its first capital markets day, showcasing the innovation pipeline and aiming to alleviate investor concerns over competing technologies, but a cut to FY24 guidance on recent transplant volume weakness and the planned CFO transition weighted on the shares. The shares reversed December losses in January as flight data showed an improvement in activity in December, providing a solid set up into the company's Q4 report vs the rebased expectations.

The other detractors included Procept Biorobotics, Conmed and Convatec, while Icon Plc was the main positive contributor.

Outlook

As we look ahead into 2025, we remain focused on the reality that populations around the world are ageing. The social implications around this demographic transformation continue to create significant opportunities for companies that provide products and services which meet the changing consumption patterns driven by this phenomenon. Our Longevity and Social Change strategy is focused on identifying high-quality businesses which have such exposure and can deliver sustainable returns over the long term.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific North American Opportunities Fund

End of March

During March the NAV of the Fund increased +3.8%.

The key contributors to performance were aerospace investments Woodward, AerCap and Safran, hazardous waste handler Clean Harbors, as well as Avantor and BioLife Solutions, two of our healthcare investments.

The key detractors in the period were healthcare companies ICU Medical and Danaher, financial investments Intercontinental Exchange and Intact Financial, and waste collection company GFL Environmental.

The market continues to remain focused on the timing and scale of potential cuts to short-term interest rates, and large cap technology shares continue to lead the market with NVIDIA, Alphabet and Microsoft performing well in the month.

End of June

During June the NAV of the Fund declined -0.6%

The key contributors to performance were GFL Environmental, a Canadian based waste hauler who was subject to takeover rumours, ICU Medical, Clean Harbors, BWX Technologies and KKR.

The key detractors in the period were Avantor, CRH, Woodward, and aerospace investments Melrose and Safran.

While markets continue to be focused on the trajectory of interest rates, we saw added volatility in the month due to potential repercussions of elections in France and the USA. Large cap technology continues to lead the broader market with NVIDIA and other 'Magnificent 7' stocks appreciating significantly in the period.

End of September

During September the Fund modestly underperformed most North American equity indices, which appreciated modestly.

The key event in the quarter was the US Federal Reserve's much anticipated decision to cut the Federal Funds Rate by 0.50%, followed then by a variety of actions by the Chinese government to stimulate their markets and economy.

The most significant contributor to performance was our largest holding, ICU Medical, whose shares have continued to appreciate after its Q2 earnings report, as well as industrial investment BWX Technologies, whose important position in the nuclear energy value chain has become more appreciated. The Fund saw positive contributions from a number of other investments across industries.

Key detractors in the month were GFL Environmental and CBIZ, defensive stocks that we think were temporarily out of favour in a market with a greater appetite for risk. The Fund had a number of other minor detractors across industries with the greatest concentration of these in healthcare.

End of December

During December most small and mid-cap indices fell by 6 to 8%, and the Fund declined similarly. Market cap weighted indices outperformed based on significant strength in the Magnificent 7 technology shares.

The key detractor in the period was healthcare investment UnitedHealth Group, which drew scrutiny following the murder of one of its executives. Other key detractors were waste companies Clean Harbors and GFL Environmental, as well as ICU Medical – none of these companies released any meaningful updates. The key contributor in the period was Avantor, a significant healthcare investment, which recovered modestly from oversold levels. The market remains focused on the impact of Donald Trump's administration, with longer-term interest rising steadily in anticipation of persistent inflation.

Sub Investment Managers' Report

For the financial year ended 31 December 2024

Pacific North of South EM All Cap Equity Fund

End of March

A positive relative performance of 0.4% in March has led us to finish the first quarter of 2024 with an outperformance of 2.3% against the MSCI Emerging Markets index.

The largest contribution to performance during the quarter came from South Korea, driven by our value-oriented positioning in the market. This was followed by Taiwan, in particular technology-oriented names. We also saw a positive contribution through stock selection from China despite still being somewhat underweight the market.

A pullback in some of our Brazilian mid-cap stocks, some weakness in our Polish positions and our underweight in India offset some of that outperformance during the quarter.

We have been taking profits in Taiwan and reduced our overweight to the market since the start of the year. At the same time we have added to Korean exposure even as we have been shifting out of some stocks such as banks that have had very strong moves on the current value-up theme.

A core concept of the North of South investment philosophy is the idea that investors in a given country have choices when deploying their liquid savings. They can keep their money in the bank or purchase domestic bonds, earning a fixed rate of interest. Alternatively, they can invest in equity markets. In countries with high interest rates like Brazil there is a real tension between returns available from fixed income and the equity market.

In Taiwan, domestic interest rates have been extremely low for decades. We have always been bemused how inefficiently the Taiwanese equity market was priced relative to the paltry returns of 1-2% available on domestic deposits and bonds. For many years, the equity market offered a much higher dividend yield of around 4%. This was not due to lack of growth – even prior to the post-Covid boom, dividends paid out from the MSCI Taiwan index nearly doubled between 2014 and 2019 thanks to expanding earnings. These figures understate the true opportunity available to investors willing to go beyond mega-cap stalwarts like TSMC that benefit from a US ADR listing. Many of our mid- and smaller- capitalization stocks offered high single digit dividend yields and have unsurprisingly formed the backbone of North of South's income strategy.

Over the past year, this has begun to change. Domestic financial institutions found traction among retail investors by launching specialized ETFs that targeted dividend paying companies, in particular in the technology sector. These funds pay out progressively higher monthly dividends often in excess of actual dividends received on their portfolios, offering clients a super-charged income profile relative to bank savings. Paying investors "income" out of their capital has elicited grumblings from the regulator but is an effective marketing strategy. This is particularly effective as strong inflows have helped drive up the shares held in these funds, providing capital growth to investors on top of the income.

Taiwanese domestic ETF assets have mushroomed from around US\$4bn at the end of 2019 to more than US\$45bn, with most of the growth coming in the last two years. Last month saw two additional ETF launches which attracted an additional US\$4bn of new money into this space. Much of the new money has been focussed on smaller and mid capitalization stocks and in many cases the ETFs have ended up owning significant stakes in these companies. We have watched as many of our holdings have moved from significantly discounted levels towards fair value and in some cases beyond. The Taiwan FTSE Mid-Cap index now trades on a forward P/E of 19x against a historic range of 10-14x. Its dividend yield has dropped to a record low 3%. The yields offered to investors on these ETFs remain in the high single digits as they are partly funded by returning capital. This is not a sustainable form of income and will one day lead to problems but for now remains attractive to retail investors.

Our valuation discipline has required us to reduce and exit some of these positions. At the same time, we acknowledge that some Taiwanese companies are also seeing a real tailwind from AI driven demand. This means near term growth rates and profitability can be higher and justify higher valuations. Disaggregating flow driven performance from fundamental changes in the business is both a challenge and an opportunity. We will continue to adjust our positioning to take advantage of these type of developments.

Sub Investment Managers' Report

For the financial year ended 31 December 2024

Pacific North of South EM All Cap Equity Fund (continued)

End of June

During Q2 24, the fund lagged the MSCI Emerging Markets index by 4.5%. Most of this difference accrued during June when we saw a series of elections generate significant volatility in markets.

The quarter's underperformance was driven by four distinct geographies. In China we saw an unfavourable stock selection effect as the highly discounted internet stocks that we owned reversed earlier gains. In contrast, some of the more expensive and growth-oriented names continued to perform well and created a major disconnect. The Brazilian market as a whole was hit hard by a reversal in Fed rate cut expectations. This impacted domestic cost of capital and caused a currency sell-off, which in turn hurt our smaller and mid-sized stocks disproportionately. In Mexico, the emphatic win by the incumbent Morena party's candidate has raised fears of excessive concentration of power and led to a market and currency selloff. Finally, elections in India where we are underweight have led to a market rally despite an unfavourable outcome for the reformist government.

Our positions in Taiwan and Korea have continued with a positive contribution but this was not sufficient to offset the other areas. It has been an unusual quarter in the sense that this time our portfolio diversification was overwhelmed by multiple unrelated unfavourable developments.

We have been active in response to these developments, both in reassessing some existing positions and in taking the opportunity to enter new ones. Our overall exposure to domestic Brazil has fallen in response to the higher for longer rate environment but we have also been buying US\$ earners in the energy space that have been unfairly discounted. A similar shift is taking place in our Mexican portfolio where we are more concerned about the upcoming US election than the incoming presidency of Claudia Sheinbaum. We have added a new highly discounted internet stock in China and some new ideas in Korea and the UAE. Finally, we are building up some exposure to South Africa where the new centrist unity government may help reduce the cost of capital. Combined with a gradual improvement in the energy supply situation, this could allow some resumption of growth in the country.

At the half-way point in the year, EM markets have diverged significantly in performance, especially when taking account of currency moves. The strong US dollar has disproportionately hurt returns in Brazil but also affected most Asian markets. The latter currencies seem to have largely moved in sympathy with the volatile Japanese Yen.

We don't believe that it is possible to consistently forecast near- or mid-term currency movements. Over time however, we expect these to inversely correlate to the yield premium that local bond markets offer to the dollar. Countries with insufficient domestic savings rely on foreign portfolio flows for domestic investment and need to offer high yields. When these flows dry up, the currencies depreciate as we have witnessed in Brazil this year.

Looking at inflation adjusted exchange rates, we note that the Turkish Lira, Brazilian Real and South African Rand have been the weakest major EM currencies since 2010 although during that time they also enjoyed periods of stability thanks to their carry trade status.

While the Korean Won and Taiwan dollar have also dropped over the past three years, this is only a recent phenomenon and unlikely to be due to structural issues. These countries continue to enjoy cheaper financing terms than the US thanks to plentiful domestic savings. Given their export oriented corporate sectors, such a depreciation is a tailwind for earnings even though translating into dollars affects returns for foreign equity investors.

Given the US\$ strength over the past few years there is at least room for some reversal, especially against fundamentally strong currencies. How this actually plays out may depend on policies implemented by the next White House occupants. Among the big macro moves, there are bound to be opportunities to pick up fundamentally sound companies whose valuations have been buffeted by global dislocations.

Sub Investment Managers' Report

For the financial year ended 31 December 2024

Pacific North of South EM All Cap Equity Fund (continued)

End of September

During the 3rd quarter, the fund lagged the MSCI Emerging Markets index by 3.4%. The greatest drag came from Korea and Taiwan as well as our Latin American energy positions. This was partly offset by a very strong performance from our Chinese portfolio which was up by an average of 29%, largely during the final days of September. Investors rushing to rebuild positions in China by selling everything else as well as numerous market holidays did cause some unusual end of month moves in other Asian markets.

The rally in our Chinese holdings has taken us from a neutral to a modest overweight position against the index. We did reposition the portfolio even more towards consumer stocks and reduced exposure to banks in China as we see the latter being asked to support the former by the government. We have also used weakness in Taiwan and elsewhere to add to companies that are exposed to a possible Chinese recovery but have been used as a source of funds by global investors. We have reduced exposure to oil and gas given the unfavourable medium term supply/demand outlook but maintain a few smaller positions that show extreme undervaluation.

As we write these words some weeks after the initial excitement, it remains unclear how large or how effective Chinese stimulus efforts will be. What has been signalled is that the highest levels of government have begun to take the economic malaise seriously. It finally seems possible that China could implement the largest and most co-ordinated package of monetary and fiscal measures since the global financial crisis, but details are only being trickled out gradually. This may be because decisions have not yet been taken or part of a deliberate strategy to ensure markets are constantly anticipating further good news. Clearly there is no silver bullet for all of China's problems but there may be a pathway towards restoring some economic balance. Either way, it will only become obvious in hindsight whether the measures succeed in pulling China out of its current malaise. Their effectiveness depends on kick-starting a positive feedback loop where confidence is restored to consumers leading them to open their wallets and generating growth. It is classic 'animal spirits' as described by Keynes.

While we can't predict the outcome, markets need to start pricing some possibility of success in shoring up demand. With Chinese stocks having been highly depressed and under-owned by global investors, it is not surprising that we have had a sharp rally. This has taken the MSCI China index back to near 11x P/E, somewhat above middle of its recent range – no longer extraordinarily cheap but certainly not in bubble territory. However, the valuation is based on depressed earnings – should stimulus measures be successful, we could see meaningful upwards revisions in earnings expectations. Internet retailers' earnings are especially highly geared to a possible recovery as they have been working on improving efficiency during the difficult times. The rally in stock markets, if it continues, could help build up fragile confidence that might eventually become self-sustaining.

Of course, there remains the possibility that government measures prove ineffective due to timid implementation, geopolitics or simple bad luck – we are dealing with animal spirits after all! Such a scenario would lead to even worse outcomes as a resumption in falling stock markets would produce a negative wealth effect across China's 200m retail investors to compound the impact from falling property prices. It would potentially leave the government with little ammunition to address an even more depressed consumer and likely out of good ideas (but potentially trying out some bad ones). It is also clear that engineering a cyclical rebound will not solve deep structural issues – these require a deep re-think of the government's economic objectives including long-cherished growth targets.

Looking ahead, we need to consider all possible scenarios. Our bottom-up valuation analysis keeps us invested in China even after the rally as markets remain sceptical of positive outcomes. Our appreciation of the challenges faced by the leadership and uncertainty about decision making prevent us from building more aggressively overweight positions. And yet, this is as positive as we have been on the market for a number of years.

Sub Investment Managers' Report

For the financial year ended 31 December 2024

Pacific North of South EM All Cap Equity Fund (continued)

End of December

During 2024 the Pacific North of South EM All Cap Equity Fund outperformed the MSCI Emerging Markets total return index by over +1.9%, helped by strong relative performance of +6.5% during the final quarter. This marks the ninth consecutive year of the North of South EM All Cap Equity Strategy outperforming the index.

We went into last year excited about the Value-Up programme in Korea and the likely support for rate sensitive Latin American markets from continuing monetary easing. While these themes seemed to be playing out during the initial months of 2024, Brazil, Mexico, and Korea ended up among the worst performing markets in the world in dollar terms last year and provided a major headwind for our portfolio. Fortunately, we were able to more than offset these through our local stock picking (especially in Korea) and diversification. In this respect, our positions in the UAE and Taiwan, as well as smaller markets like Argentina and Greece, made significant contributions. At a total portfolio level, stock selection was the primary driver of outperformance, while country allocation created a drag.

During the year the rising cost of capital in Brazil and Mexico led us to reduce exposure to those markets and shift towards export-oriented businesses with dollarised funding costs. On the flipside, we have been adding to domestic consumer stocks in China, where the cost of capital is declining, and the government is showing signs of support for domestic demand. We have also become more positive on South Africa, where declining rates make valuations more attractive. While we remain positive on Taiwanese technology, we have taken some profits and reduced our overweight position in the market. India remains the most significant underweight in the portfolio, as valuations remain stretched in the face of a slowing economy.

Looking ahead into 2025, politics will likely continue to be impactful with seismic shifts taking place. The world waits with bated breath to see what policies a Trump/Musk team will implement – ranging from tariffs and budget decisions to immigration and geopolitical repositioning of the US. Many other developed countries are also seeing dramatic changes in the establishment with an upsurge in populism. Most of our markets, aside from the Korean presidential soap opera, appear more politically predictable. Notably, Greece, South Africa, Poland and dare we say Argentina and Turkey seem to be moving in the right direction on economic policy. China remains a significant question mark on both the domestic and international front, but we remain (very cautiously) optimistic that authorities will be compelled to adopt a more proactive fiscal stance to stimulate consumer demand.

Outside of, or perhaps alongside, politics, we remain mindful of the interest rate environment and its impact on equity and currency markets. US 10-year yields are at the highest levels since before the 2008 financial crisis. Remarkably, the S&P500 is trading at a 50% higher forward P/E multiple (22x) than at its pre-crisis peak in 2007 (15x). The MSCI Emerging Markets index on the other hand is trading at a discount (12x) compared to its 2007 highs (15x). This reflects the relative de-rating of Emerging Markets over the past decade and a half. However, we are now entering a different macro and political environment where anything can happen. Betting on a continuation of the status quo can be risky during times of change.

For now, rising US rates are putting pressure on Emerging Market (and other) currencies, most visibly the Brazilian Real, which has been caught in a vicious cycle of imported inflation leading to higher rates and debt servicing costs. This, in turn, exacerbates the government deficit and increases government debt levels, further pressuring the currency. The Central Bank is forced to step in, but fiscal concerns dominate. Brazil remains uniquely vulnerable with its combination of high government debt levels and high real rates driven by its government's inability or unwillingness to accept fiscal consolidation. It is the canary in the coal mine with other EM markets further from a tipping point thanks to higher real growth (e.g. India) or lower levels of debt/GDP (e.g. Indonesia, Mexico, Poland, and Korea). Unlike during the 1990s Asian debt crises, Emerging Markets government debt is now largely domestic, and the likelihood of sovereign default, even for Brazil is minimal. High real rates are, in fact, a reflection of concerns about future monetisation of debt via currency debasement.

Sub Investment Managers' Report

For the financial year ended 31 December 2024

Pacific North of South EM All Cap Equity Fund (continued)

End of December (continued)

On the flipside, Argentina has been a standout performer since President Milei wielded his proverbial chainsaw. In stark contrast to Brazil, the government has dramatically reduced expenditure. Inflation has been high, but market confidence has allowed for a much slower depreciation of the currency, leading to strong appreciation in real terms. Middle-class Argentines who can travel and access dollars are suddenly finding their inflated wages go a long way, especially when in neighbouring Brazil. Milei has so far pulled off an incredible balancing act, pleasing both markets and the electorate despite high inflation and a recession. Inflation is now falling, and growth has resumed. The overvaluation of the currency is a concern, but if this can be managed without major upheaval Argentine shock therapy could become a model for its larger neighbour at some point. While the country was dropped from the Emerging Markets Index years ago, we have benefitted from exposure to its burgeoning energy sector, which has helped underpin the reforms.

As always, we do not claim to have a crystal ball and aim to prepare for the unexpected in the coming year. 2025 is likely to be eventful and full of surprises. Our cost of capital approach, disciplined focus around valuations, and diversification should provide a measure of safety and continue to deliver a favourable risk/reward skew, as they have over the past nine years.

Sub Investment Managers' Report (continued)

For the financial year ended 31 December 2024

dVAM Diversified Liquid Alternatives PCP Fund

End of March

dVAM DLA returned +2.14% in March (GBP A1 shares, net of fees) and has returned +1.79% year-to-date. The annualised return since inception net of fees is +2.69%.

The US economic juggernaut continues largely unabated, with March rounding off a strong quarter for most risk assets. The month saw most global equity markets up by between 1% and 4%, with the US S&P Index up by 2.1%. Credit spreads, an additional reflection of risk appetite, were generally tighter. Although corporate defaults are picking up, they do so from low levels and remain at or below longer-term averages. Further, tight spreads are helping to offset the impact of higher interest rates as companies seek to refinance their debt in advance of impending maturities.

While inflation is significantly lower than at this time last year, the path of decline appears to have paused and the market has interpreted that this, coupled with stable growth, means interest rates need not be cut as quickly and by as much as it had fervently believed in January. This kept bond yields in check and was supportive for the US dollar. The benign environment meant that Gold and Oil both enjoyed a strong month, with the former reaching a fresh all-time high.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets +1.3% contribution

It was a good month for many of dVAM DLA's Real Asset investments, with each of the three strategies contributing roughly equally. Within Infrastructure, a recovery in clean energy stocks led to good gains from Duff & Phelps while the other Infrastructure managers retraced losses from earlier in the year. Each of the internal themes added to returns, as they did in REITs, where there was also something of a recovery across the board. Within Natural Resources, we reallocated dVAM DLA's Gold investments following the above-mentioned sharp rally and also enjoyed gains from Neuberger Berman, our external Commodities manager. Finally, the Energy Transition Theme performed particularly well given higher legacy energy prices.

Alternative Credit +0.2% contribution

In a relatively supportive environment, demand for higher yielding assets drove corporate and securitised spreads tighter while bond yields were relatively stable. Furthermore, dVAM DLA's investments also enjoyed healthy income. Each strategy added to returns accordingly, although local currency Emerging Market Debt lagged as the strength of the US dollar dominated lower bond yields.

Diversifiers and Portfolio Hedges +0.7% contribution

There were healthy gains across Risk Premia, Relative Value and Long/Short Equity Strategies. Fulcrum's Multi-Asset Trend Fund continued its strong start to the year, making gains from equity, commodity and currency positioning and our Dispersion Fund also prospered. Among the external managers, BlackRock's Systematic Asia Pacific Equity Absolute Return and Fidelity's Emerging Market Long/Short Equity funds both led, extending their strong runs this year.

Outlook

Ongoing tensions in the Middle East and Ukraine seem not to be derailing global trade to a significant degree and there is confidence that economies are heading towards the fabled soft landing, with moderating growth and inflation rather than anything more severe. Markets are certainly pricing this in and leaving little room for error, be that economic or political. Indeed, the S&P closed at an all-time high no fewer than 22 times in the first quarter. The AI/Tech-related drivers of this have been well documented but many of the Real Assets that dVAM DLA owns began to participate more fully in March and their attractive relative valuations should be supportive for returns in the months to come if macroeconomic developments continue along the current path, which remains our core scenario.

Sub Investment Managers' Report (continued)

For the financial year ended 31 December 2024

dVAM Diversified Liquid Alternatives PCP Fund (continued)

End of June

dVAM DLA returned -0.12% in June (GBP A1 shares, net of fees) and has returned +2.43% year-to-date. The annualised return since inception net of fees is +2.68%.

European politics were prominent in the headlines following the results of the European Parliamentary elections and President Macron's snap decision to call for a French legislative vote. With far-right and far-left parties polling first and second, this led to a sell-off in French Government bonds and equities, weakened the euro and dragged the yields of peripheral European bonds higher, while German Bunds rallied.

The European Central Bank delivered its first rate cut amid weakening growth while the Bank of England (BoE) and a relatively hawkish US Federal Reserve (Fed) remained on hold. Both announced they were awaiting clearer evidence that key inflationary metrics are indeed softening. Of additional concern to the Fed perhaps is that the policies of both Trump and Biden are held to be somewhat inflationary.

US Technology stocks were again on a tear, driven by positive earnings reports from Nvidia and A.I.-related announcements from Apple. Equity returns elsewhere were more muted and were negative in Europe for the reasons noted above. Commodities were somewhat volatile but trended down, in part as a reflection of weakening US consumer confidence, while the dollar was resilient given the Fed's relatively hawkish rhetoric. Infrastructure equities struggled but REITs (outside the Residential sector) performed well, and spreads were generally tighter as demand for yield continued. The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets -0.4% contribution

Infrastructure assets detracted from returns in June. The defensive-oriented sector remained out of favour in the higher-for-longer macro environment, with would-be investors preferring to seek income from higher yielding credit markets. That said, losses were led by a retracement in Clean Energy stocks following last month's robust gains. Most Commodity-related investments realised losses, but these were somewhat offset by gains in REITS, notably the Digital REITS Theme.

Alternative Credit +0.2% contribution

There were positive contributions from across the Alternative Credit managers, the only exception being from local currency Emerging Market Debt, which was negatively impacted by the strong US dollar. Within dVAM DLA's universe, higher quality bonds outperformed, and the new issue market remained open and active, enabling more credit-worthy borrowers to term out their liabilities. While tight spreads can be an indication of complacency with respect to credit risk, it is worth noting that default/restructuring risks are being reflected in the spreads of lower quality bonds, to which dVAM DLA has minimal exposure.

Diversifiers and Portfolio Hedges +0.1% contribution

Returns were led by Fidelity's FAST Emerging Market Equity Fund together with Relative Value managers Marshall Wace and BlackRock. We are pleased to note that BlackRock's systematic Asian equity market neutral strategy has had a very strong 12 months, making positive contributions to returns every month this year. There were modest losses from the Systematic Macro strategies and the JPY/US dollar hedge as the dollar remained strong.

Outlook

All eyes remain on the Fed and when we will see their first interest rate cut. Currently, just one is priced in, for September, while the BoE has signalled its first cut will come in August. Before then, we will see the results of the (potentially market-sensitive) French and UK government elections and will experience the continued lead up to the US elections, the narrative about which is gaining momentum following the recently held first presidential debate.

Sub Investment Managers' Report (continued)

For the financial year ended 31 December 2024

dVAM Diversified Liquid Alternatives PCP Fund (continued)

End of June (continued)

Outlook (continued)

Election issues aside, as the interest rate environment becomes more supportive, Real Assets should prosper, and our Credit investments will also benefit from lower bond yields.

End of September

dVAM DLA returned +1.39% in September (GBP A1 shares, net of fees) and has returned +5.80% year-to-date. The annualised return since inception net of fees is +3.20%.

The US Federal Reserve delivered a 50bps cut to interest rates, which was at the higher end of expectations, as they seek to insure against downside risks to the labour market. This was broadly well received by risk-on markets, with equities rallying and credit spreads tighter. Longer dated bond yields fell in the lead up to the rate cut but began to increase again in the second half of the month, particularly after the Chinese government announced a raft of stimulus measures. This was also positive for Commodities, where increasing tensions in the Middle East, with fears of damage to regional oil fields, led to a recovery in the price of oil as well as a continued appreciation by gold. The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets +0.8% contribution

All three sectors contributed to returns, led by Infrastructure, a key beneficiary of lower bond yields. Our external managers all made valuable contributions. The external REITs managers also performed well, although the Digital REITs Theme detracted modestly. Within Natural Resources, our Commodities manager performed strongly, with the Energy Transition and EV Materials themes augmenting returns. We introduced a new Natural Resources manager who got off to a good start. They focus on technologies, products and services relating to the extraction, transformation or efficient processing of materials.

Alternative Credit +0.4% contribution

All mandates added to returns as bond yields shifted lower and confidence in the benign credit cycle continued to buoy investor demand for spread assets. Markets remain open for companies to refinance their debts; the aforementioned rate cut, coupled with tight spreads encouraged such activity. A weaker US dollar boosted returns in dVAM DLA's local currency Emerging Market Debt exposure, while Convertibles were the top performer in the constructive environment.

Diversifiers and Portfolio Hedges +0.3% contribution

Our Multi-Asset Trend Fund made gains from its interest rate, equity and currency positioning, and Crabel, our shorter-horizon external Trend manager, also performed well. Returns were mixed within the Long/Short Equity managers but consistently positive across the Relative Value managers, led by Marshall Wace. Lastly, the JPY/USD tail hedge continued to register gains as markets priced in the declining interest rate differential between the two currencies.

Outlook

Geopolitics look set to dominate the headlines in the coming period, with the deepening conflict in the Middle East and the US Presidential election being front of mind. From an economic perspective, the Chinese stimulus packages and central bank rate cuts are a boon, with data releases not yet indicating signs of any deep recessions or material job losses. In this context, and given the more supportive interest rate outlook, during the month we increased dVAM DLA's exposure to REITs and Infrastructure from Diversifiers.

Sub Investment Managers' Report (continued)

For the financial year ended 31 December 2024

dVAM Diversified Liquid Alternatives PCP Fund (continued)

End of December

dVAM DLA returned -1.32% in December (GBP A1 shares, net of fees) and has returned +4.62% year-to-date. The annualised return since inception net of fees is +2.83%.

The final month of 2024 proved to be a challenging one, with many equity and bond markets ending the month in negative territory as they reassessed the likely path of interest rates, with the “higher for longer” narrative gaining traction, and pondered the implications of the forthcoming Trump Presidency. The biggest moves came after the December meeting of the Federal Open Market Committee (FOMC). Although officials cut interest rates for the third time this year, robust growth and labour markets led them to increase their median interest rate projection for 2025, implying just two cuts over the next year. They also postured that core inflation was likely to be closer to 2.5% rather than the 2.2% previously signalled. This led the US dollar to rally by close to 3%. Technology stocks bucked the trend, as did energy and agricultural prices within Commodities.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets -1.5% contribution

Infrastructure assets performed relatively poorly in the above context, particularly those more sensitive to the macro environment or associated with Clean Energy. The ramifications of how the next US Presidency plays out remains a source of great debate; an example being that one of dVAM DLA's managers suffered a material write down on a holding given speculation about how Elon Musk's governmental involvement might impact 'his' competitors in the Satellite industry. Digital REITs performed best but our other Real Estate investments were negatively impacted by expectations of higher terminal interest rates and a weakening European economy. Natural Resources held their value better, particularly direct Commodities, although those accessed via equities detracted slightly.

Alternative Credit +0.1% contribution

Income and relatively stable spreads helped offset the impact of higher bond yields, meaning most investments oscillated around flat. Our Emerging Market Total Return manager clipped a healthy return and also benefited from the strong US dollar, a position it has held for much of the year. The only notable detractor was Convertibles, which gave back some of last month's gains in sympathy with equity markets.

Diversifiers and Portfolio Hedges +0.2% contribution

Gains by many of dVAM DLA's Long/Short Equity, Event and Relative Value managers comfortably offset losses in Small Cap within Alternative Equity and our JPY/USD tail hedge. With respect to the latter, and as noted above, Trump's growth and protectionist policies are supportive of a strong US dollar, and we have now exited the position.

Outlook

While investor demand for Technology stocks may continue to support prices, lofty large cap equity valuations, additional rate cuts and more compelling discount rates make the case for select Real Assets ever more compelling, we believe. We do acknowledge that some Real Assets appear to be more susceptible to US policy changes in the short term, eg tariffs, but believe this to be more of a short-term phenomenon. Furthermore, Real Asset attributes, like income, underlying asset stability and their diversification properties, should lead to robust longer-term performance. The outlook for Credit appears benign, with defaults in check, and implying a year of coupon-like returns. Spreads are tight by most measures, so our relatively defensive stance feels appropriate, and interest rate duration should offer a potential offset should spreads widen. dVAM DLA's Diversifiers continue to offer important portfolio ballast as well.

Investment Manager's Report

For the financial year ended 31 December 2024

dVAM Global Equity Income PCP Fund

Q1 2024

Performance

The Fund underperformed the benchmark (MSCI World Index).

Top Performers • Eaton (+30.3%) - US industrial power management company.

Taiwan Semiconductor Manufacturing Company (+24.5%) - World's largest semiconductor foundry.

Also benefited from individual stocks in Healthcare with Novo Nordisk (+24.2%) and AbbVie (+18.6%).

Detractors

Reckitt Benckiser; weakest performer, falling -17.5% due to giant sell off as a US court awarded \$60m in damages over allegations about Reckitt's infant formula. Despite this, still optimistic about the long-term outlook for the business.

Sonic Healthcare, also had a tough start to the year, falling -11.0% following softer-than-expected quarterly results.

Overweight in Consumer Staples which underperformed the index by over 5% and therefore acted as a headwind.

Underweight allocation to IT alongside the zero allocation to Energy and Communication Services also acted as a drag, as these were three of the four best-performing sectors in the index. Dividend Updates (YTD 2024):

Dividend updates from 21 of 35 holdings: - 19 companies announced increases for their 2024 dividend vs 2023; - 2 companies announced a flat dividend vs 2022; - No companies announced dividend cuts or cancellations.

General Comments

No changes made to the portfolio in Q1.

The portfolio continues to deliver on key tenets: quality, value, dividend, and conviction.

The Fund continues to offer a portfolio of consistently highly profitable companies with strong balance sheets, at a small premium to the benchmark despite its quality and yield advantages.

Unchanging approach; focusing on quality compounders and dividend growers.

Investment Manager's Report

For the financial year ended 31 December 2024

dVAM Global Equity Income PCP Fund (continued)

Q2 2024

Performance

The Fund underperformed the benchmark (MSCI World Index).

Top Contributors

Taiwan Semiconductor Manufacturing Company (+22.7%) - World's largest semiconductor foundry.

Broadcom (+21.5%) - Developer, manufacturer and supplier of semiconductor software products.

Stock selection within Industrials.

Zero weighting to Consumer Discretionary, Energy, Materials, and Real Estate, which all posted negative returns.

Detractors

Diageo (-14.8%) - weak sentiment over the large drinks company amid a soft consumer environment.

Underweight allocations to Information Technology and Communication Services, the two strongest sectors.

Overweight in Consumer Staples, which underperformed. Dividend Updates (YTD 2024):

Dividend updates have been received this year from 27 of 35 holdings: - 25 companies announced increases for their 2024 dividend vs 2023; - 2 companies announced a flat dividend vs 2022; - No companies announced dividend cuts or cancellations.

General Comments

In Q1 we sold Henkel, whose quality characteristics are declining, after a rally from recent lows.

We replaced it with Publicis, the French advertising & media agency.

The portfolio continues to deliver on key tenets: quality, value, dividend, and conviction.

The Fund continues to offer a portfolio of consistently highly profitable companies with strong balance sheets, at a small premium to the benchmark despite its quality and yield advantages.

Unchanging approach; focusing on quality compounders and dividend growers.

Investment Manager's Report

For the financial year ended 31 December 2024

dVAM Global Equity Income PCP Fund (continued)

Q3 2024

Equity returns were generally positive over Q3, buoyed by news late in September of a bumper 50bp rate cut by the US Federal Reserve (Fed). Asia ex-Japan was the top-performing major region, aided substantially by a Chinese-driven rally over September following news of accommodative government support for the economy; Emerging Markets also fared well.

Fund Q3 outperformance vs the benchmark MSCI World Index can be attributed to value outperforming growth over the period, the Fund's sizeable overweight to Consumer Staples and Industrials, both of which outperformed the index, and to strong stock selection in (Aflac +25.8%, BlackRock +21.3%), Healthcare (Roche +15.6%, Medtronic +15.3%) and Information Technology (Paychex +14.1%). The Fund's zero-allocation to Utilities and Real Estate, the two best-performing sectors over the quarter, was a slight headwind. The Quarter can be divided into five distinct periods.

The first period (30th June-16th July) saw growth in Small-caps and Defensives, followed by the release of positive inflation, jobs and Purchasing Managers' Index data which all pointed to constructive US rate cuts, triggering a market rally. In the second period (16th July-5th August) there was a shift of sentiment and a retraction in equities owing to concerns that the Federal Reserve (Fed) had waited too long to cut interest rates, further exacerbated by a rate hike in Japan and the unwinding of the yen carry trade. Period 3 (5th August - 2nd September) saw the market rebound to its former position following positive retail sales data and encouraging comments from Fed Chair Jerome Powell, soothing fears of a recession.

Volatility, however, returned in Period 4 (2nd-6th September) when weak manufacturing and non-farm payrolls figures raised concerns about a US domestic slowdown. The sell-off was led by IT, with growth stocks also performing poorly. In Period 5, on the 18th of September, the Fed cut rates by an unprecedented 50 bps (0.05 percentage points), triggering a market rally led by Large-cap tech stocks. More good news came from the Chinese economy as Beijing launched an economic stimulus package and Chinese domestic equities had their best week since 2008.

Aflac was the Fund's top performer over the quarter (+25.8% in USD). The US supplemental health and life insurer, which derives c.2/3 of their revenues from Japan, saw strong performance following a promising set of quarterly results. Much of the focus for the Japanese segment is on restarting new-policy sales growth, which has been sluggish over the mid-term, but this quarter saw new sales increase +4.5% to ¥16.8 billion, primarily driven by uptake of a new life insurance product. The US business also remains in good shape, having grown sales at a c.9% CAGR since 2020. Novo Nordisk was the Fund's bottom performer over the quarter (-18.2% in USD).

The Danish-based pharmaceutical giant has suffered from competition with peers including Roche, Amgen, Pfizer and AstraZeneca in development of GLP1 drugs. Its August earnings report, despite delivering solid returns (+53% Wegovy, +30% Ozempic), still failed to meet analysts' projections. The company has adopted a multi-pronged strategy to maintain market leadership, including price adjustments, tackling supply constraints, as well as announcing a \$6 billion/ 6 years investment to boost manufacturing capacity, which should enable the company to strengthen its competitive position and raise barriers to entry in the lucrative GLP-1 drug market. We remain confident in its future outlook.

Investment Manager's Report

Dividend Actions in 2024

34 companies grew their dividend.

1 company kept their dividend flat.

0 companies announced a dividend cut.

0 companies announced dividend cancellations.

Average dividend growth (all companies) = 8.2%

General Comments

We made no changes to the portfolio in the quarter.

The Fund continues to deliver on key tenets: quality, value, dividend, and conviction.

The Fund continues to offer a portfolio of consistently highly profitable companies with strong balance sheets at a small premium to the benchmark despite its quality and yield advantages.

We have kept our approach unchanged, continuing to focus on quality compounders and dividend growers.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Multi Asset Active Range

Q1 2024

Performance

All of the dVAM Multi-Asset Active funds generated strong absolute returns over the course of the quarter.

Top Contributors

Equities were a large contributor, with both the US and Japanese sectors up over 8%. The Mercer Global Equity fund performed strongly, up over 10% over the course of the quarter. Diversifying assets added value over the quarter. Returns from a trend following fund, the Schroder GAIA Bluetrend fund, which utilises momentum signals to generate returns across assets, was up 9%.

Detractors

Fixed income was a slight drag over the course of the quarter – as yields moved higher.

Q2 2024

Performance

All of the dVAM Multi-Asset Active funds generated positive returns over the course of the quarter. Equities continued to rally, bringing year to date returns in Global Equities to 14% in Sterling terms.

Top Contributors

Equities were a large contributor, with both the US and UK rallying over 2.5%. Within UK Equities, the JO Hambro UK Equity Income fund performed strongly, up 6.2% over the quarter. Fixed income added value, with holdings in Investment Grade Corporate bonds and Absolute Return bonds rallying. The PGIM Absolute Return Bond Fund rallied 2% over the quarter.

Detractors

Diversifying Assets were a small drag over the course of the quarter, as performance was mixed within the asset class. Crucially, their correlation to equity and bond markets remains low however, helping diversify portfolios during periods of volatility.

Q3 2024

Performance

All of the dVAM Multi-Asset Active funds generated positive returns over the course of the quarter. Equities continued to rally, bringing year to date returns in Global Equities to 18.9% in Sterling terms.

Top Contributors

Fixed Income was a large contributor to returns, with both the Investment Grade and Government bonds up over 3%. The PGIM Global Corporate bond fund was up 4.8% over the period. Equity also added value, particularly in the UK, with the JO Hambro UK Equity Income fund up over 5.4%

Detractors

Diversifying Assets were a small drag over the course of the quarter, as performance was mixed within the asset class. Crucially, their correlation to equity and bond markets remains low however, helping diversify portfolios during periods of volatility.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Multi Asset Active Range (continued)

Q4 2024

Performance

All of the dVAM Multi-Asset Active funds generated positive returns over the course of the quarter. All of the dVAM Multi-Asset Active funds generated strong positive returns over the course of the year, with returns ranging from 7.4% to 11% across the risk profiles in GBP terms. Equities were the top contributor in asset class terms over the course of the year, led by US markets.

Top Contributors

Over Q4, US equities were the strongest contributor, returning 9% as a basket in GBP terms. Japanese and Global Equities were also strong regions. A holding in the Raymond James Eagle US Small Cap strategy, was a strong performer, up 9.5% over the quarter.

Detractors

Fixed Income was a small detractor, as yields rose as a result of the election of Donald Trump, and the possibility of higher inflation under his proposed policies. Some of this was mitigated by the use of absolute return bond funds, such as the PGIM Absolute Return Bond fund, which generated positive returns of 2% despite the weakness in the bond market.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund

End of Q1

The MSCI All-Country World Index (ACWI) returned 9.6% in local currencies in the first quarter (Q1) of 2024. Sentiment was boosted by increasing optimism that major economies would navigate “soft landings” and strong corporate results, especially among large-cap technology companies. This helped risk assets overcome headwinds from geopolitical tensions in the Middle East and bond yields rising as expectations about the pace of monetary easing in 2024 were dialled back. In March, markets were lent additional impetus as central banks in the US, the UK and the eurozone appeared to turn more dovish, which rekindled hopes that interest-rate cuts would materialise mid-way through the year. US stocks enjoyed a strong three months amid the ongoing resilience of the country's economy. Treasury yields rose in January and February when the Federal Reserve (Fed) pushed back market expectations for interest-rates cuts in 2024 due to uneven progress on inflation. However, strong corporate results boosted equities, with large technology companies leading the way amid ongoing AI enthusiasm. The tech rally paused briefly in early March, but sentiment strengthened again following the Fed's March meeting, amid relief that policymakers' projections pointed to three quarter-point interest cuts over the year. European stocks rose as the eurozone's economic downturn appeared to have passed its nadir, with the composite purchasing managers' index moving higher over the period and almost escaping contractionary territory in March. Meanwhile, inflation edged closer to the European Central Bank's (ECB's) 2% target, resulting in markets anticipating rate cuts by mid-2024. The ECB's own messaging then turned more dovish in March, helping European equities to a strong finish. UK equities underperformed, partly due to stubborn UK inflation, and strong wage growth early in the year triggered concerns that the Bank of England (BoE) might delay rate cuts longer than other central banks. On the economic front, the UK slipped into a technical recession in Q4 2023, but more recent indicators pointed to a rebound in Q1 2024. UK equities rallied in March due to a larger-than expected decline in inflation and signals from the BoE that it was getting closer to cutting rates. The pound weakened in this environment, providing a boost to the many overseas earners in the UK market. Japanese stocks performed well throughout the quarter, aided by strong company earnings and corporate governance reforms. The export-heavy market was also boosted by weakness in the yen.

The Bank of Japan maintained a loose monetary policy relative to other key central banks, even as it raised rates for the first time in 17 years and ended its yield curve control in March. Emerging markets (EMs) were impacted by China's ongoing economic concerns. However, increased stimulus measures from Beijing later in the quarter spurred a modest recovery. In local currency terms, Japanese stocks fared best, helped by a weak yen. US equities also outperformed the index on the back of sizeable gains in the country's large tech sector, while Europe ex UK was also ahead of the MSCI ACWI, albeit more modestly. EMs underperformed due to the aforementioned China woes and headwinds from higher Treasury yields. The UK fared worst due to the market's limited exposure to technology stocks, although it still posted a positive return. Technology stocks rode the ongoing AI enthusiasm to emerge as the top-performing sector in the ACWI. Communication services followed, while energy stocks also posted strong gains, especially late in the period when oil prices rose. Healthcare, the consumer sectors and materials underperformed. Utilities and real estate brought up the rear as both sectors were particularly sensitive to moderating expectations for interest-rate cuts.

Performance

Gross of fees, the fund outperformed its benchmark in Q1. Security selection was the primary driver of the relative gains, led by choices in technology. Our picks in materials and consumer discretionary also helped, while those in financials detracted. Sector allocation was modestly helpful. Our overweight in technology proved beneficial amid the AI-related rally. The zero weights in real estate and utilities also aided performance. On the other side, the materials overweight and communication services underweight detracted. At the stock level, the zero weight to Apple made the largest positive impact during a difficult period for the firm, partly due to concerns about falling iPhone sales in China.

Our Nvidia holding was also favourable. Nvidia's shares rose in January after the company announced a variety of improved offerings related to AI at the Consumer Electronics Show, as well as an AI chip for the Chinese market designed to comply with US export regulations. The stock continued to rise over the rest of the period after the chipmaker's fiscal Q4 2024 revenue and earnings came in well above expectations, with major year-on-year increases. The firm's revenue projections for Q1 of its 2025 fiscal year were also ahead of analyst forecasts.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q1 (continued)

Performance (continued)

On the other side, HDFC Bank weighed on relative returns. Shares underperformed after the firm's Q3 results, released in January, showed a decline in net interest margins for the second quarter running.

Activity

In terms of activity, new purchases included Applied Materials, Insulet and AMETEK. Applied Materials provides equipment, software and services for manufacturing semiconductor chips. The company is a market leader in the growing wafer fab equipment industry but also boasts strong positions in several other segments, which bodes well for its long-term profitability.

Surprisingly strong lagging-edge tool demand from Chinese chip companies adds another tailwind. We remain optimistic that the company will benefit from improving memory fundamentals, strong growth in advanced packaging applications (such as high bandwidth memory), new etch and deposition intensive transistor architectures (such as "gate all around" transistors), and the overall increasing complexity and number of transistors required for massive new AI processors. Moreover, electronic devices are growing more complex and challenging to test, which should help companies such as Applied Materials over the long term. Insulet is a medical device company that develops, manufactures and markets an insulin infusion system for people with insulin-dependent diabetes. The company is gaining market share in the US, heading towards a top position in pumps with its Omnipod system. Insulet also has potential to expand beyond the 25 end-market countries it currently services. The firm's manufacturing facility illustrates its focus on using automation to drive quality and efficiencies, while it also benefits from an experienced leadership team. In addition, Insulet's pay-as-you-go business model with disposable pumps makes it more attractive as a long-term investment.

AMETEK is a global leader in the production of advanced analytical, testing and measurement instruments for the energy, aerospace, power, research, medical and industrial markets. We favour the firm for its diversified revenue base rooted in a history of strong operational execution, returns-focused investments and disciplined acquisition strategy, which should continue to enhance the portfolio and support performance against peers through various cycles. Sales included the aforementioned HDFC Bank in March. We also sold out of Ashtead during the quarter in order to pursue other opportunities. We exited Sony as we have some concerns around the firm's capital allocation given its conglomerate structure and plans to acquire Indian media assets.

Outlook

Markets were narrowly led in 2023 as investor sentiment was dominated by optimism around AI and, especially, the so-called Magnificent 7 tech stocks. Looking ahead, we believe the market rally will broaden, as evidence of inflation coming under control and interest rates peaking should see investors refocus on fundamentals. We have already started to see evidence of this so far this year. In this environment, we believe that diversification will remain important as investment to tackle issues such as decarbonisation, deglobalisation and energy efficiency creates a broad opportunity set. Our focus continues to be on building a diversified portfolio of quality businesses that are multi-year compounders, with pricing power and less gearing to the broader economy. We believe that our bottom-up approach will allow us to find these quality growth companies across a range of sectors and geographies.

End of Q2

Global equities rose in May, with the MSCI All Country World index (ACWI) returning 3.8% in local currencies amid healthy first-quarter (Q1) earnings and optimism that the global economy is heading for a "soft landing". Markets were also supported by expectations of interest-rate cuts later this year, although concerns about the timing of these cuts led to equities giving back some gains late in the month. US stocks posted positive returns in May, helped by a favourable start to the Q1 earnings season, with technology companies delivering especially strong results.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q2 (continued)

The Federal Reserve (Fed) left rates unchanged, as expected, at its meeting at the beginning of the month. Although policymakers pushed back on expectations of an imminent rate cut, markets took comfort in messaging that indicated further rate hikes are “unlikely”.

Signs of softness in the labour market and a decline in inflation contributed to falling Treasury yields in early May, which boosted appetite for risk assets. However, equities pared some gains later in the month when resilient economic data strengthened the view that the Fed will leave rates on hold until after the presidential election in November. European equities also rose, helped by signs of an ongoing recovery in the eurozone economy, including improvements in the purchasing managers' index readings for both services and manufacturing, along with expectations that the European Central Bank will cut its key rate in June. Less positively, towards the end of the month, a disappointing inflation print caused markets to question the ECB's trajectory for the rest of the year. UK equities delivered moderately positive returns, helped by some encouraging economic data, including confirmation that the economy had emerged from recession in Q1. However, elevated services inflation and the unexpected announcement that a general election will be held on 4 July stoked anticipation that the Bank of England might refrain from cutting interest rates until later than previously expected. The resulting stronger pound weighed on the many overseas earners in the UK market. Japanese equities were also positive but lagged other developed markets.

The weak yen helped export-oriented companies, but deteriorating consumer sentiment in the country weighed on the domestic economic outlook. Elsewhere, emerging markets (EMs) rose modestly but were behind their developed market counterparts. A weaker dollar, the improving global economic backdrop and news of further Chinese stimulus measures bolstered sentiment, but this was tempered by ongoing concerns about China's economy and property sector. In local currencies, US stocks fared best, driven by the resilient economy and gains in the market's large tech sector. Europe ex UK performed broadly in line with the MSCI ACWI. UK and Japanese stocks underperformed, with the latter impacted by concerns that the Bank of Japan could tighten policy again in the coming months. EM stocks posted the lowest returns. By sector, technology led the MSCI ACWI, buoyed by strong Q1 earnings. Utilities and communication services also performed well. Laggards included the consumer discretionary and materials sectors, with energy performing worst as oil prices fell from their elevated April levels.

Performance

Gross of fees, the strategy modestly underperformed its benchmark in May. However, it maintained its year-to-date outperformance. Security selection detracted in May, particularly in financials and technology, although picks in industrials and healthcare added value. Sector allocation was beneficial for relative returns, mainly due to the favourable impact of the overweight in technology and the zero weight in energy. Relative performance was hurt by the underweight in Apple. The shares outperformed following forecast-beating quarterly results, with revenue falling less than some had feared despite softening demand in China. Apple also announced a record-breaking \$110 billion share buyback scheme and an increase to its dividend. The holding in Mastercard was another notable detractor.

Shares fell after the leading payments firm lowered its 2024 projections for full-year revenue and earnings. However, its Q1 results beat expectations and extended Mastercard's streak of double-digit earnings growth to four quarters in a row. We retain our conviction in the stock. Mastercard benefits from several advantages, including its dominance in an oligopolistic industry, strong brand and global reach. With these competitive edges, Mastercard has a powerful network effect. The firm is also ahead of its peers in terms of penetration and its superior offering of value-added services. In our view, Mastercard is well placed to benefit from key structural themes, such as the shift from cash to card and the expansion of e-commerce. Positive contributors included Howmet Aerospace and Microsoft. Howmet Aerospace beat forecasts for quarterly revenue and earnings, with commercial aerospace sales up by almost 25%. The company also raised its full-year guidance on the back of robust demand in other areas. Howmet boasts a strong reputation, as a world-class producer of aero engine and industrial turbine components.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q2 (continued)

Performance (continued)

We also see Howmet as being at the forefront of innovation and change in manufacturing components. The company's advanced manufacturing expertise in innovation is helping to improve the efficiency of equipment and driving high performance engineered solutions. Furthermore, Howmet is able to provide differentiated technologies that are transforming the aerospace and commercial transportation industries. The company also benefits from strong partnerships with transportation giants like Airbus. We believe that Howmet stands to be a key beneficiary of the growing demand for travel, particularly in emerging market countries. Following the release of forecast-beating results in April, Microsoft's shares were boosted in May after the firm announced new capabilities in its AI assistant tools and cloud computing platform, along with news of the latest version of ChatGPT, GPT-4o.

On the AI front, Microsoft has benefited from a head start over sector peers and continues to expand its capabilities. Microsoft boasts large distribution channels and an installed customer base, which serve as durable advantages in the industry. We believe this competitive edge and the company's Azure platform place the firm in a strong position to benefit from the business world's transition to cloud technology. Other growth drivers for Microsoft include its Office 365 software - a subscription package which promotes recurring revenues. The firm continues to build its presence in gaming with the expansion of its Xbox cloud gaming service. Management recently emphasised that the company is well positioned to help its customers - for instance, by improving productivity - amid tougher macroeconomic conditions.

Activity

We opened a new position in Argentina-based MercadoLibre. We favour the firm for its unique combination of leadership in e-commerce and accelerating growth in fintech. MercadoLibre is well placed to benefit from the expansion of e-commerce in Latin America, which remains significantly underpenetrated compared to more developed markets such as the US and Western Europe. The firm boasts strong innovation in digital capabilities and has established one of the most efficient e-commerce logistics networks in Latin America. We sold out of Ametek and Pearson as we see better opportunities elsewhere.

Outlook

Markets were narrowly led in 2023 as investor sentiment was dominated by optimism around AI and, especially, the so-called Magnificent 7 tech stocks. Looking ahead, we believe the market rally will broaden as evidence of inflation coming under control and interest rates peaking should see investors refocus on fundamentals. We have already started to see evidence of this in recent months. In this environment, we believe that diversification will remain important as investment to tackle issues such as decarbonisation, deglobalisation and energy efficiency creates a broad opportunity set. Our focus continues to be on building a diversified portfolio of quality businesses that are multi-year compounders, with pricing power and less gearing to the broader economy. We believe that our bottom-up approach will allow us to find such quality growth companies across a range of sectors and geographies.

End of Q3

The MSCI All-Country World index (ACWI) returned 5.0% in local currencies in Q3. Growing expectations for monetary policy easing helped stocks overcome bouts of volatility due to weakening economic data and some Q2 earnings disappointments from leading technology companies. US stocks started the quarter well amid hopes the Federal Reserve could cut rates as soon as September. Then, lacklustre earnings reports from some of the 'Magnificent 7' companies caused high-growth tech stocks to give back some of their year-to-date gains in July as investors focused on segments of the market that had previously underperformed. Labour-market data weakened over the period, and recession concerns triggered sell-offs in early August and September.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q3 (continued)

However, the downturns were more than offset by the upswings as falling consumer price inflation and increasingly dovish signals from Fed policymakers caused Treasury yields to fall and restored risk appetite. The Fed subsequently satisfied investors' hopes of a larger 50-basis-point (bp) cut – as opposed to a 25-bp move – at its September meeting, while also indicating a further 50 bps of cuts before the end of the year. In the UK, the prospect of an era of political certainty following the Labour Party's victory at the general election lifted sentiment early in the period.

The Bank of England (BoE) cut interest rates by 25 bps on the first day of August, as had been widely expected. However, markets increasingly took the view that the BoE may ease policy more slowly than the Fed due to sticky services inflation and relatively upbeat economic data. The resulting stronger pound weighed on the many overseas earners in the UK equity market. In Europe, increasingly fragile economic data hurt sentiment at times but also raised expectations for the European Central Bank's (ECB's) pace of monetary easing.

The results of France's parliamentary elections in July, where a far-right victory was avoided, also supported risk appetite. Eurozone inflation then fell to a three-year low in August, paving the way for the ECB to cut rates in September. Although the eurozone manufacturing sector remained weak, a raft of stimulus measures in China in September buttressed a strong end to the quarter; many European manufacturing firms are heavily exposed to the Chinese economy. The Bank of Japan (BoJ) unexpectedly raised rates for the second time this year at the end of July, which triggered the sudden unwinding of yen carry-trade positions (where investors had borrowed yen at low interest rates to invest in assets in other currencies offering higher potential returns). This led to a sudden sell-off followed by an equally sharp rebound.

Japanese stocks fell again later after Shigeru Ishiba won the ruling party's leadership contest and was subsequently confirmed as prime minister. Markets initially viewed Ishiba as more likely to support tighter monetary and fiscal policies. Emerging markets (EMs) were supported by the weaker dollar for much of Q3. China's economy formed an ongoing concern, but new monetary and fiscal stimulus measures from Chinese authorities bolstered sentiment.

The raft of measures in September provided a particularly strong boost as they signalled that Beijing is committed to achieving China's annual growth target. In local currencies, EMs posted the highest returns on the back of the strong end to the period. Fed easing resulted in US stocks also outperforming the MSCI ACWI. UK and Europe ex UK both underperformed, although they still finished in positive territory. Japan brought up the rear with negative returns as the BoJ proceeded with its monetary policy normalisation.

By sector, interest-rate-sensitive real estate and utilities stocks posted the highest returns in the index. Financials, industrials and materials delivered strong gains as the rally broadened beyond high-growth tech stocks. Both consumer sectors also outperformed. Communication services lagged the index, while technology was weaker still due to some profit-taking following the earnings disappointments. Energy fared worst; oil prices were volatile due to demand concerns amid the weakening growth outlook in major economies.

Performance

Gross of fees, the strategy underperformed its benchmark in Q3. Security selection was the primary driver of the underperformance, especially choices in technology and consumer discretionary. Sector allocation had a moderately negative impact in aggregate due in part to the technology overweight and zero weight in utilities. However, the zero weight in energy and overweight in healthcare made favourable contributions.

At the stock level, Lam Research was the largest detractor as it underperformed the market during the wider tech sell-off early in the quarter. Chip stocks were also hurt by reports that the US was planning to impose more stringent restrictions on exports of semiconductor equipment to China. However, performance improved later after the firm posted largely positive quarterly and full-year results during the period.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q3 (continued)

Performance (continued)

We continue to favour Lam for its market leadership, scale and resilient business model. The company also boasts one of the best reputations in the industry for innovation in edge equipment. In addition, Lam remains well positioned to benefit from growing demand for technology, as well as expanding capital-intensity trends in materials-based engineering and manufacturing processes.

Dexcom also detracted due a downturn in July after the company cut its full-year guidance. We later sold the stock in order to pursue better opportunities elsewhere. On the positive side, Howmet Aerospace aided relative performance. The stock outperformed on the back of above-expectation Q2 results, led by a jump in commercial aerospace revenues. The firm, which makes components used in jet engines, also upgraded its 2024 guidance. Our conviction in Howmet rests on its strong reputation as a world-class producer of aero engine and industrial turbine components. We also see Howmet as being at the forefront of innovation and change in manufacturing components. The company's advanced manufacturing expertise and innovation is helping to improve the efficiency of equipment and driving high-performance engineered solutions. Furthermore, Howmet is able to provide differentiated technologies that are transforming the aerospace and commercial transportation industries. The company also benefits from strong partnerships with transportation giants such as Airbus.

We believe that Howmet stands to be a key beneficiary of the growing demand for travel, particularly in EM countries. Our Mastercard holding was also helpful. Its shares rallied in the run-up to its Q2 earnings release at the end of July due to optimism that consumer spending and online payments would remain resilient. The subsequent results confirmed this hope, with profits exceeding expectations, leading to favourable onward performance. The leading global payments firm benefits from several advantages, including its dominance in an oligopolistic industry, strong brand and global reach.

These competitive edges give Mastercard a powerful network effect. The firm is also ahead of its peers in terms of penetration and its superior offering of value-added services. In our view, Mastercard is well placed to benefit from key structural themes, such as the shift from cash to card and the expansion of e-commerce.

Activity

In terms of activity, new purchases included Broadcom, 3i and AIA Group. Broadcom is a leading semiconductor manufacturer that helps design custom AI chips for large companies such as Alphabet. The firm boasts a strong market position, particularly in data centres, networking and recurring software. We see it as a highly profitable company, operating in sectors that benefit from powerful long-term secular tailwinds. Therefore, we believe that Broadcom should benefit from growing demand related to generative AI, and its chip business is increasingly driven by investments in accelerators and network connectivity for AI. 3i is a leading international investment company. The private-equity group holds attractive growth potential due to its strong investment track record, healthy balance sheet and diversified investment portfolio.

We hold conviction in 3i's largest investment in Action, a non-food discount retailer, which we see as a best-in-class retailer that delivers strong cashflow generation. Even after 3i's gains over the past 18 months, we view the company as a stable compounder. In this time of macroeconomic and geopolitical uncertainty, we believe that the firm's resilient portfolio, combined with its rigorous and disciplined approach to capital allocation, positions it well to navigate the challenging conditions.

Pan-Asian life insurance group and wealth manager AIA enjoys a strong competitive position in an industry with high barriers to entry owing to its established presence and far-reaching distribution network. Since its initial public offering, AIA has grown the value of new business by over 10% per year. The company also stands to benefit from favourable structural trends in Asia, including the emerging middle class, positive demographics and low public provisions for healthcare and retirement.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q3 (continued)

Activity (continued)

In addition to the aforementioned Dexcom, we switched out of Advanced Micro Devices to fund the Broadcom purchase as we view the latter as a less risky option with greater upside. We also profitably sold Applied Materials and Becton Dickinson after strong performance.

End of Q4

Global equities posted positive returns in the fourth quarter (Q4) of 2024 in local currency terms. Generally favourable corporate earnings and a US-led rally following Donald Trump's victory in the US presidential election buoyed markets, helping overcome moderating expectations for monetary policy easing alongside economic and geopolitical concerns in some regions.

The MSCI All Country World Index (ACWI) ended the period 1.4% higher in local currency terms. In the US, equities started on the backfoot as some better-than-expected labour market data and a smaller-than-expected decline in inflation in September dashed hopes the Federal Reserve would implement a 50-basis-point (bp) rate cut in November, as it had done in September. However, US stocks rallied sharply in November, as Trump's victory, combined with the Republican Party gaining control of both the Senate and House of Representatives, paved the way for a prospective policy mix that includes tax cuts and extra fiscal spending. Small caps and other stocks closely exposed to the domestic economy led the way. The Fed would subsequently implement 25-bp rate cuts in November and again in December, but Treasury yields rose over the period, as markets viewed Trump's plans to implement tariffs on several trading partners as inflationary.

As a result, expectations for rate cuts in 2025 were dialled back amid the favourable economic backdrop, which moderated demand for risk assets in the final weeks of 2024. European equities faced headwinds from ongoing economic concerns in the eurozone. The quarter began with news that the region's composite purchasing managers' index had slipped into contractionary territory in September, before falling further in November after a moderate recovery in October. Political instability also impacted markets.

The coalition government in Germany broke apart following disagreements over national debt levels, while the French Prime Minister Michel Barnier was ousted following a no-confidence vote in early December. Separately, the threat of fresh US import tariffs eroded sentiment toward European exporters. However, the European Central Bank (ECB) provided support by cutting rates by 25 bps in October and December, as expected. Although annual inflation in the eurozone ticked higher late in the year, policymakers struck a largely dovish tone. In the UK, annual inflation for September unexpectedly fell to its lowest level in three years, paving the way for the Bank of England (BoE) to cut interest rates by 25 bps in November. However, the new Labour government's autumn Budget weighed on sentiment as markets focussed on the planned increases in public spending, which will be funded by higher taxes on businesses and increased government borrowing.

Concerns arose that the fiscal expansion and extra borrowing could reduce the pace of the BoE's easing cycle next year. Annual inflation reached an eight-month high in November, albeit in line with expectations, while wage growth accelerated. Consequently, the BoE left rates unchanged in December, and policymakers noted that cuts would likely be gradual in 2025. Indications that the UK economy could be slowing also weighed on sentiment. However, this, along with expectations of a slower pace of US interest-rate cuts, resulted in the pound weakening against the dollar over the quarter, which boosted overseas earners within UK equities. Elsewhere, the Bank of Japan (BoJ) left interest rates unchanged and signalled it may continue to cautiously unwind its ultra-loose monetary policy stance in 2025. This combined with some encouraging economic data to fuel a strong quarter for Japanese equities.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q4 (continued)

Meanwhile, the stronger dollar was detrimental for emerging-market (EM) stocks as it tempered demand for higher-yielding assets. Concerns about the US trade policies and Chinese growth also hindered EMs, but performance improved late in the period following Chinese authorities' pledges of additional stimulus measures in 2025 as part of a "vigorous" effort to boost consumption.

Japan posted the highest regional return in the ACWI, boosted by a weaker yen, which approached its lowest level since the early 1990s. The US also outperformed on the back of its strong post-election rally. On the other side, EMs fared worst followed by Europe ex UK. UK stocks also underperformed the index. By sector, consumer discretionary came out on top, followed closely by communication services and technology. Financials also outperformed the index, helped by expectations of reduced regulation under a Trump presidency. On the other side, materials posted the lowest return as concerns about China's growth caused metal prices to fall.

Healthcare stocks also weakened, due to Trump's nomination of Robert F. Kennedy Jr as US health secretary. Kennedy's proposed policy changes could create uncertainty around the development and approval of new drugs. The rate-sensitive real estate and utilities sectors also underperformed.

Performance

Gross of fees, the strategy outperformed its benchmark in Q4. Security selection was the main contributor, led by choices in industrials and materials. Our picks in consumer discretionary and healthcare also made favourable impacts, but stock picks in financials and technology partially offset relative gains. Sector allocation was also helpful. An overweight in technology proved beneficial as most AI-related stocks continued to post strong corporate earnings. The zero weight in consumer staples also added value.

However, the materials sector overweight had an unfavourable impact. At the stock level, Broadcom was the top contributor over the quarter. Broadcom's shares surged in December after the chipmaker's quarterly earnings and guidance for the current quarter beat forecasts. The firm also reported record revenue for its full fiscal year, citing the successful integration of software company VMware and a significant increase in revenue from AI products. The stock further benefited from news that Apple is collaborating with Broadcom to develop a new AI chip. As a leading semiconductor manufacturer, the firm boasts a strong market position, particularly in data centres, networking and recurring software. We see it as a highly profitable company, operating in sectors that benefit from powerful long-term secular tailwinds. Therefore, we believe that Broadcom is well placed to benefit from growing demand related to generative AI, and its chip business is increasingly driven by investments in accelerators and network connectivity for AI.

Our Amazon holding was also helpful. Shares also hit fresh all-time highs during the quarter, after releasing estimate-beating results in October. The company's cloud-computing and advertising businesses enjoyed particularly strong growth. Amazon benefits from unmatched scale and advantage in e-commerce and has a loyal customer base. In our view, the company's strong mobile positioning and infrastructure advantages should help it benefit from continued growth in online retail. Meanwhile, away from the e-commerce business, Amazon has a dominant cloud-computing presence through its Web Services unit and stands to benefit from growth in digital advertising, which should further strengthen the firm's market position. On the other side, the zero weighting in Tesla was the largest detractor as the stock performed well following the US election.

Our Elevance Health holding also detracted. Shares of health insurance companies declined due to concerns about the potential policy implications of the US election. Elevance's quarterly earnings also missed forecasts, impacted by increased costs from medical claims and lower Medicare and Medicaid payments due to changes to government policy. Due to ongoing regulatory uncertainty in the US healthcare market, we exited our position in Elevance during the period.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

dVAM Global Equity Focus Strategy PCP Fund (continued)

End of Q4 (continued)

Activity

In terms of activity, new purchases included Meta, Schneider Electric and Orix Corporation. Meta is one of the largest social media and online communication platforms, and we see upside in the company's competitive position and valuation. The company has an established and active userbase that is still growing strongly, particularly on mobile devices, and its targeting abilities remain appealing to advertisers. Advertising on Facebook and Instagram "Reels", for example, should continue to drive growth for the business. The firm consistently demonstrates a high return on its investment, and earnings are expected to be further supported by recent cost-control measures.

Schneider is a global leader in electrical distribution, automation and energy management products that improve efficiency and sustainability for customers. Over the long term, Schneider should benefit from the global drive towards carbon neutrality, as its products enable customers to control and monitor the carbon output of buildings. In addition, the current energy dynamics in Europe are positive for Schneider's business as the EU puts in place a number of energy-saving and transformative initiatives.

Orix is a multinational financial services group based in Japan. The company provides a range of different innovative products and services to a diversified client base, consisting of both corporate and retail customers. We like the firm for its strong market position in Japan and globally, as it constantly pursues new businesses in a diverse array of sectors and geographies. Orix's reputation and track record form strong intangible assets. The company also boasts a strong credit rating, and its financial profile gives it a cost advantage when borrowing, which results in improving rates of return. Consequently, the stock looks attractively valued, in our view. We sold out of Eaton Corporation following its strong performance. Valuations had become stretched, and we see better opportunities elsewhere, such as the aforementioned Schneider Electric. Other sales included the aforementioned Elevance Health and Marsh & McLennan.

Outlook

The macro environment has shifted, with the US election out of the way, and lower interest rates easing some of the financial pressure on companies and consumers. Additionally, while the so-called Magnificent 7 continue to dominate markets, we are beginning to see this market rally broaden. We face a number of geopolitical risks going into 2025, from tensions in the Middle East to uncertainty around Trump's economic policies.

Trade tariffs pose a key threat to global economic stability, while the impact of Trump's policies on input inflation and in turn US corporate profitability is also something to monitor. However, we see reasons to remain bullish on equities; high-quality, well-managed companies should continue to perform well over the longer term. In our view, those companies with strong fundamentals that have weathered the challenging operating environment of the past few years will likely continue to outperform.

We also continue to believe that in environments like this, diversification will remain important, particularly as investment to tackle issues such as decarbonisation, deglobalisation and energy efficiency creates a broader opportunity for earnings growth. Our focus remains on building a diversified portfolio of quality businesses that are multi-year compounders, with pricing power and less gearing to the broader economy. We believe that our bottom-up approach will allow us to find such quality growth companies across a range of sectors and geographies.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific North of South EM Equity Income Opportunities Fund

End of March

The fund gained 3.1% in March bringing the Q1 return to 8.85% and the one-year return to 28.1%. The first quarter dividend of £0.094033 is above last year's £0.07224, mainly due to our South Korean holdings moving 2023 ex-div dates from year-end into Q1. The 12-month trailing yield is 7.02%, which represents a healthy spread over UK inflation of 3.2% yoy for March.

Taiwanese technology led the gains followed by Financials at the sector level and was led by Kaspi, the on-line marketplace and payments company. This month we've also seen some solid performance from allocations that have been relative laggards such as China and Materials. The improvement in China has been relatively broad-based across our holdings following a weak start to the year. The strength in commodities is attributable to copper and our holding in ferrochrome producer Merafe.

The UAE also posted strong performance, although Emaar has proved to be an interesting challenge. So far, we've only owned Emaar Development, which is the listed subsidiary of Emaar Properties, and is the most profitable developer in our coverage by a fair margin. The dividend policy is a fixed notional amount, most of which is up streamed to cover the dividend for Emaar Properties. Following full year earnings that significantly exceeded expectations, there were some expectations that Development would propose a special dividend given the significant cash pile. In the end it's been Emaar Properties that proposed a higher-than-expected payout which means they both have similarly attractive yields of c6-6.5%. As around half of Property's revenues are recurring (primarily from Dubai Malls) and therefore of 'higher quality' we're now somewhat spoilt for choice. We're expecting more clarity on new longer-term policies for both to come later in the year, but for now we're hedging our bets and have switched some of our holding into Emaar Property.

It hasn't all been plain sailing this month, in Brazil political interference has again raised its head in Petrobras following a quarterly dividend proposal that did not include expected special dividends. We sensed this could be a risk and had reduced our holding ahead of the announcement which was not received well by the market. Free cashflow generation remains very high and the stock is deeply discounted, for the moment we are keeping a smaller position and are on the sidelines until this important matter is clarified.

Our interpretation of the SOE law is that these funds should be distributed and cannot be used for alternative purposes, so it will be an interesting test to see how this plays-out. Our suspicion is that there will be a middle ground sought which will still mean the company has yields in the mid-teens whilst the balance sheet will continue to strengthen.

The strong momentum in Taiwan took several positions to valuations and yields that were no longer interesting, so we've been recycling capital where we don't see scope for further earnings upgrades. This is complicated by the fact that the rapid adoption of AI is now catalysing a broader upgrade of other parts of computing architecture that have to keep-up with Nvidia processors, so there's now potentially a rising tide for earnings in a broadening spectrum of the industry.

Across the Luzon Strait, the result of the Korean election was that the main opposition Democratic Party secured a landslide victory humbling President Yoon Suk-yeol's party. Whilst this will scupper significant tax reform, core elements of the 'Value-up' program are still likely to be pushed by the President. We expect to be seeing tangible proposals in the coming weeks.

End of June

In June the fund rose by 1% bringing the year-to-date return to 9.8%. The second quarter dividend was £0.322536 which returned a net 12-month dividend yield of 7.2%, a spread of 530bp over UK inflation. Performance was led by South Korea and Taiwan but offset by weakness in Mexico and Brazil. This was also reflected at the stock level with Hyundai Motor and MediaTek providing the highest returns, whilst Fibra Macquarie and Banco del Bajio the weakest.

Investment Manager's Report (continued)

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of June (continued)

Whilst the momentum in AI has continued, it's been a relatively chaotic few weeks in emerging markets caused mainly by macro factors. Various elections have been the main culprit, but there's also been shifts in sentiment on the Chinese market and reduced hopes for monetary easing given the US inflation outlook.

Much of this has been reflected in heightened currency volatility, particularly in crowded 'carry trades' such as the Mexican Peso and Brazilian Real. The Mexican market corrected sharply on the back of proposed constitutional changes, but with a balanced team announced for the incoming administration it's now recovered much of the weakness.

For the next few months, in both these countries, the political agenda is likely to continue to overshadow the market. We've therefore shifted some of our exposure towards dollar exporting businesses and taken advantage of the recent weakness in Petrobras and Petroreconcavo, which currently has a 20% free cashflow yield on a net cash balance sheet, giving significant upside potential for dividends.

By contrast, the outcome of the South African election has been about as positive as one could reasonably hope for. The 'Government of National Unity' has been sworn-in and whilst it's early days, for the first time in a very long time, we can be cautiously optimistic.

Added to this power-outages (known as "load-shedding") which have been a significant drag on the economy for some time, ceased back in April and it looks like it's structural shift. As with other key services in South Africa the private sector has provided the solution, in this case it's solar power. Both households and businesses have reduced demand on the grid by installing significant solar capacity, with more to come over coming years.

This is a significant game-changer as not only will operating costs decline, but combined with a more balanced political backdrop, energy reliability re-opens the door to investments that have been stalled for a decade. We've added two new positions in financials and we expect to add more in due course.

Similar to Brazil, South African risk-free rates are significantly wider than both policy rates and inflation. With the scope for a more positive feedback loop following the election this risk premium is likely to ease, putting upward pressure on the currency and our positions.

When politics are aligned with both monetary policy and investors, it tends to provide fertile ground for profitable investments. It's interesting to note that the EMEA region is now probably the most comprehensively aligned in this regard. But the trajectory is also positive in some of the smaller ASEAN markets where we are likely to increase in exposure in coming months.

End of September

In September the fund appreciated by 1.7% in GBP, bringing the nine month return to 9.2%. The quarterly dividend was 0.198545p giving a 12-month running yield of 6.7% after withholding taxes, or 500 basis points over UK CPI. At their simplest, markets are driven by the "5 Ps" – Policy, Politics, Positioning, Profits and Price. Certainly for the past few months it's the first two that've been firmly in the driving seat. Probably the most poignant policy move was the long awaited, and larger than expected US Fed rate cut, but this was only one out of an avalanche of 28 Central Bank cuts implemented worldwide over the period. The notable exception was Japan which bucked the-trend by raising rates for the first time in 17 years. Such significant and tightly packed moves resulted in higher market volatility, most notably the dramatic unwind of the Yen carry trade, the other side of which had percolated into some of the higher yielding Latam currencies.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of September (continued)

On the political front there were many positive and negative repercussions from the various recent elections, but the most significant move came from China. In the closing days of the quarter there was a clear change in policy within the Politburo, probably triggered by a likely miss of their self-imposed growth targets. The prior 'Keep calm and carry on' approach with incremental policy adjustments quickly shifted to a much more proactive stance. Details are still being released as not all decisions are finalised, but it's possible they're in the process of implementing the largest and most co-ordinated package of monetary and fiscal measures since the global financial crisis.

As always, the market is focused on quick fixes and so has become pre-occupied by the size of a hinted TARP-like fiscal 'bazooka'. In part this is because they've done it before and it worked, in 2016 and during the GFC when the stimulus package was over 12% of GDP, so expectations are quite high. The big issue is whether these new measures are likely to represent a meaningful resolution to the increasingly well-understood and entrenched problems, or simply another adrenalin shot.

One of the most obvious and intractable problems is reversing the debt deflation cycle caused by falling real estate prices. This has not only undermined the fiscal foundations of regional governments but has been a doom-loop for consumer sentiment.

So far, significant new measures there've announced include a facility to swap regional government debt to mitigate a payments crisis, a further cut in existing mortgage rates and more funding for the repurchase of excess inventory from developers. Whilst there's some early signs of improvement in sentiment, in the past these have proved short-lived.

The basic problem remains that Tier 1 cities are still overpriced, Tier 2 is overpriced and oversupplied and Tier 3 is simply oversupplied, unfortunately there's no magic bullet. We're now unlikely to hear about further fiscal stimulus until after the US election, but even then there's still an ongoing debate as to what it could be spent on. Back in 2008 it was focused on much needed infrastructure, so there was a positive economic multiplier. Given today's excess capacity, the multiplier effect on infrastructure is going to be minimal.

End of December

In December the fund appreciated by 1% bringing the full year return to 13.6%. A fourth quarter dividend was declared of 0.109366p giving a full year net yield after withholding taxes of 6.4% which compares to December UK CPI of 2.5% year on year.

This compared favorably with the underlying market both in December and over the year where the fund outperformed the MSCI Emerging Market index by 4% and the MSCI World High Dividend index by 3.6%. Since inception in June 2023 the fund has now outperformed both of these net of fees by 27% and 17% respectively, and with lower or similar volatility.

The December performance was driven by strong returns in the UAE and Taiwan whilst the most significant detractors came from South Korea following President Yoon's declaration of martial law on the 3rd December, which was discussed in last month's commentary. The most notable positive contributor came from Emaar Development which following strong earnings received a further boost when the parent company (Emaar Properties) announced a doubling of the company's dividend.

We've held a position in Emaar Dev since launch given the valuation, profitability and dividend potential. Having doubled in value last year we've now started to rotate into Emaar Properties as it has a more diversified revenue stream with a higher proportion of recurring revenue, and now a higher yield.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of December (continued)

Looking back at 2024, although it was the Chinese year of the Dragon the history books will remember it as the year of the election. Across both the developed and emerging world electorates voted for seven significant changes in President and at least nine changes to government or ruling coalitions.

Many of these have been a symptom of the inflation spikes of the past years, but we finish the year having cleared most of the political overhang in our EM countries. The remaining uncertainty pervading in the market surrounds the new US administration, primarily in connection with tariffs.

We are somewhat more sanguine about the investment risks to the Emerging world. In part this comes from experience in that realized outcomes are rarely as dramatic as extreme hypotheses, especially in this context when considering the feedback loop into US inflation. But higher US tariffs may also have a moderately positive effect, such as adding pressure on Chinese policy makers to stimulate domestic consumption and/or they could stimulate further intra-EM trade which is increasingly relevant proportion of GDP.

As always there will be winners and losers within the Emerging world but thinking about EM risk 'in aggregate' across the asset class, on factor may come as a surprise. Such has been the convergence of economic stewardship between the two asset classes that we close 2024 with a portfolio weighted average sovereign cost of capital of 4.5%, which is below the US equivalent rate of 4.6%. As this strategy is unencumbered by the typical emerging market benchmark, we are able to achieve this by allocating to areas of the emerging world that offer higher yields and the more attractive risk adjusted returns.

If you would like to receive a more granular review of performance and outlook please refer to our quarterly report.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Coolabah Global Active Credit Fund

End of March

The Pacific Coolabah Global Active Credit Fund performed in line with its benchmark for March. As of 31 March, the Fund's weighted average yield to expected maturity is 5.78% (USD), which compares favorably with the benchmark yield of 4.88%.

Despite global inflation readings continuing the trend observed so far this year of exceeding both economist expectations and central banks' targets, both core yields and risk assets performed surprisingly strongly in March.

The 10yr US Treasury yield decreased by 5 basis points to 4.20% while 10yr German Bund yields declined by 11bps to 2.30%. Equity markets also seemed to disregard higher inflation prints, taking them as a signal of stronger economic activity with the S&P 500 up 3.2% on a total return basis and the NASDAQ 100 up 1.2%.

European bourses returned in excess of 4% with the UK's FTSE 100 index up 4.8% and the Eurostoxx 50 index up 4.4%. All returns are quoted on a total return basis.

Turning to credit markets, broad synthetic IG CDS indices were marginally tighter, although cash corporate bond indices outperformed. European issuers continued the trend of February outperforming their US peers with the average credit spread on European names tightening by 8bps to 1.12% and the corresponding US index tightening by 6bps to 0.89%.

March saw eagerly awaited Euro-denominated primary issuance from large US banks, JP Morgan and Morgan Stanley, which the Fund participated in. With such supply of Euro denominated debt having been sparse over recent years, both banks coincidentally came to market on the same day. During the month, the Fund also participated in deals issued by Bank of Ireland and Allied Irish Banks, which marked the Investment Manager's first investments in Irish credits following an exhaustive fundamental credit research evaluation process.

End of June

In June, the PCGA base USD share class outperformed the benchmark Bloomberg Global Aggregate Corporate Index by 0.09%, returning 0.79% compared to the index's 0.70%, due primarily to activity in primary issuance markets. The headline performance of the benchmark index hides the volatility of many underlying market moves. Core 10-year government bond yields in the US, German and UK markets were approximately 15bps lower. Benchmark credit spreads, as measured by the Bloomberg USD Corp Agg and EUR Corp Agg indices, were 9 and 12bps wider to 93 and 119bps respectively.

These moves were principally driven by French President Macron's decision to call surprise parliamentary elections. Government bond markets reacted to a potential post-election deterioration in French fiscal discipline, pushing French government bond yields over 30bps wider to German Bunds, taking them to a spread of 82bps, a level not seen since the 2010-2012 Eurozone crisis.

The PCGA GBP share class outperformed by a similar margin of 0.11% (0.79% v 0.68%).

Since its 10 October inception, PCGA's GBP share class has outperformed the benchmark by 1.83% (net of fees of approx. 0.36%, which yields gross outperformance of 2.19%) with an absolute return of 9.48% net of fees (vs the index return of 7.65%).

PCGA volatility is similar to the index at 5.46% v 5.43% annualised and, accordingly, PCGA's since inception Sharpe Ratio of 1.7 times has been superior to the index's 1.1 times. PCGA's current weighted average yield to expected maturity is 6.13% compared to the index's 5.04%. PCGA's weighted-average credit rating of A is higher than the index's BBB+ rating. The weighted average rating of the active exposures is also A.

As a result of the elevated market volatility, the volume of new issues was somewhat reduced compared to previous months, limiting alpha generation. This was also a result of the significant pre-funding that many companies had undertaken earlier in the year. However, this volatility generally results in higher new issue premia and typically is an attractive market environment for this strategy. PCGA took part in primary deals globally, including from issuers such as Commonwealth Bank of Australia, JP Morgan, Macquarie Bank and Nomura and a number of sub-sovereign agencies.

Investment Manager's Report (continued)

For the financial year ended 31 December 2024

Pacific Coolabah Global Active Credit Fund (continued)

End of September

In September, the PCGA USD share class outperformed the benchmark Bloomberg Global Aggregate Corporate Index. Outperformance was driven by active security selection, having identified a number of attractively priced instruments that benefited from a potential upcoming regulatory change.

The main economic development during September was the Fed's 50 basis point cut to US policy rates. While a rate cut was widely flagged, market expectations ahead of the decision were evenly split between a 25 and 50bps cut. Market pricing as of 30 September signals that a further 185bps of cuts are expected to the end of 2025.

This anticipated path of US policy rates, coinciding with economic data supporting the view that the Fed may be successfully engineering a 'soft landing', continues to be supportive for risk assets globally, particularly in the US. Benchmark US credit spreads for corporate bonds, as measured by the Bloomberg USD Corp Agg Index, tightened 4bps on the month to 88bps. The corresponding European benchmark was unchanged at 116bps. European underperformance was driven by wider spreads on French government bonds.

The absolute performance of PCGA was largely driven by the rally in global government bond yields. The US 10-year yield declined by 12bps to close the month at 3.78%, with German 10yr yields following suit with an 18bps rally to 2.12%.

According to JP Morgan, this was the second heaviest September in history in terms of European IG supply with €66bn of deals. Despite this, issuance continued to be marked by slim new issue premia with issuers able to take advantage of supportive risk sentiment to bring deals at or through where Coolabah saw fair value.

PCGA took part in 6 primary deals globally, including from financial and corporate issuers such as state-owned Belfius Bank (previously known as Dexia), Citigroup, Credit Agricole, Novartis and QBE Insurance Group.

End of December

The fund's absolute performance was largely driven by the rally in global sovereign yields and was also supported by a generally positive risk sentiment in the US following the election results. Benchmark US credit spreads for corporate bonds, as measured by the Bloomberg USD Corp Agg Index, tightened by 6bps over the month to 77bps. In contrast, the European benchmark underperformed, widening by 3bps to 107bps, primarily due to the widening spreads of French government bonds.

Since its inception on October 10, PCGA's GBP share class has outperformed the benchmark by +2.38% net (+2.95% gross), with an absolute return of 14.85% net of fees (15.42% gross) compared to the index return of 12.47%.

PCGA's annual volatility is comparable to the index (5.1% vs. 5.0%), and its Sharpe Ratio since inception of 1.7 times has been superior to the index's 1.2 times.

Currently, PCGA's weighted average yield to expected maturity is 5.39%, compared to the index's 4.54%. PCGA's weighted-average credit rating of A- is higher than the index's BBB+ rating. The weighted average rating for PCGA's active (as opposed to passive) exposures is also A-.

PCGA participated in 16 primary deals globally, including issuers such as ABN Amro, Australia & New Zealand Banking Group, Barclays, Belfius, Citibank, Commerzbank, Commonwealth Bank of Australia, ING, Lloyds, National Australia Bank, QBE Insurance Group, Societe Generale, Swedbank, Westpac, Woolworths Group, and the sub-sovereign issuer State of Queensland.

Report of the Depositary to the Shareholders

We have enquired into the conduct of the Pacific Capital UCITS Funds plc ('the Company') for the financial year 1 January 2024 to 31 December 2024, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company, in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the UCITS Regulations, as amended. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations, as amended. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Regulations, as amended, and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association and by the UCITS Regulations, as amended, ('the Regulations'); and

(ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association and the Regulations.

Yours sincerely,

Sheenagh Carroll

Authorised Signatory

Citi Depositary Services Ireland DAC is regulated by the Central Bank of Ireland under the Investment Intermediaries Act, 1995

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

Report on the audit of the financial statements

Opinion on the financial statements of Pacific Capital Ucits Funds PLC (the 'Fund')

In our opinion the Fund's financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Fund as at 31 December 2024 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and the requirements of the Companies Act 2024.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 16, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the Unit Trusts Act, 1990 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the financial statements*" section of our report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Fund's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the director with respect to going concern are described in the relevant sections of this report.

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

Other information

The other information comprises the information included in the Directors' Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The director is responsible for the other information contained within the Directors' Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

as explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the director determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the director either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Fund were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which requires us to report to you, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the Fund's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Fund's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

For the financial year ended 31 December 2024

1. BASIS OF PREPARATION

These statutory audited financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and the Central Bank UCITS Regulations.

The audited financial statements have been prepared on the going concern basis and under the historical cost convention as modified by the measurement of certain financial assets and financial liabilities held at fair value through profit or loss.

The preparation of audited financial statements in conformity with IFRS requires the Company to make certain accounting estimates and assumptions that may affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The Directors believe that any estimates used in preparing the financial statements are reasonable and prudent.

Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

i) Judgements

Information about judgment made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the Functional and presentation currency disclosure note 2.2 and Note 9 Financial Instruments and Associated Risks, Fair Value Measurements for greater detail on Levelling classifications of each sub-fund.

ii) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 31 December 2024, is included in Note 9 and relates to the determination of fair value of financial instruments with significant unobservable inputs.

These audited financial statements are presented in US Dollar ("USD"). For the purposes of producing the Statement of Financial Position of the Company, the Statements of Financial Position of the individual Funds which are not recorded in the presentation currency are translated to USD using the exchange rates as at 31 December 2024 and accumulated for preparation of the Statement of Financial Position. For the purpose of producing the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows from the accounts of the individual Funds, average exchange rates for the financial year are used.

The principal accounting policies applied in the preparation of these financial statements are consistent with the accounting policies applied in the preparation of the Audited Financial Statements for the financial year ended 31 December 2023.

2. ACCOUNTING POLICIES

2.1 Financial assets and financial liabilities at fair value through profit or loss

(a) Classification

Financial assets at fair value through profit or loss have two sub-categories: financial assets and financial liabilities held for trading and those designated by management at fair value through profit or loss at inception. Financial assets or financial liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short-term. Forward foreign exchange contracts and all other derivatives fall into this category. Equities are designated by the Directors at fair value through profit or loss at inception. Gains and losses from changes in the fair value of the financial assets at fair value through profit or loss category are included in the Statement of Comprehensive Income.

Financial assets and liabilities previously classified at fair value through profit or loss:

The Company holds investments with a total value of USD 6,088,816,598 (2023: USD 3,693,203,656).

(b) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed as incurred in the Statement of Comprehensive Income (see Note 2.7).

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(b) Recognition, derecognition and measurement (continued)

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Realised gains and losses are presented in the Statement of Comprehensive Income as net gain/(loss) on investment activities.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. The investment objective of the Company is to provide investors with a total return, taking into account both capital and income returns and to achieve long-term capital appreciation and its portfolio is managed on a fair value basis. The Company therefore applies the business model allowed by IFRS 9 paragraph 5.1.1 which requires its portfolio to be classified at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are included in net gain/(loss) on investment activities in the Statement of Comprehensive Income.

(c) Fair value estimation

(i) Investments

IFRS 13 provides a precise definition of fair value. The Company values listed financial assets and liabilities at the last traded price.

If an asset or a liability measured at fair value has a bid price and an ask price, the standard requires valuation to be based on a price within the bid-ask spread that is most representative of fair value and allows the use of mid-price or other pricing conventions that are used by market participants as a practical expedient for fair value measurement within a bid-ask spread. Listed assets and liabilities were valued using last traded prices as this has been deemed a practical expedient of fair value.

The value of any investment which is not listed or dealt in an active market or of any investment which is normally listed or dealt on a market but in respect of which no price is currently available or the current price does not in the opinion of the Directors represent fair market value, shall be the probable realisation value thereof estimated with care and in good faith by the Directors, or by the Sub-Investment Managers. The Sub-Investment Managers have been appointed as “competent persons” for the purposes of determining the value of investments which cannot be priced in accordance with the pricing rules as outlined in the Prospectus or if prices obtained under such rules are not representative of fair value and has been approved for such purpose by the Depositary. In fair valuing securities, the Sub-Investment Managers utilise the services of their valuation committees and are required to report quarterly to the Directors.

Estimates of fair value utilised by the Funds as described above may differ from the value realised on the sale of those securities and the differences may be material to the Net Asset Value (“NAV”) of the Funds.

(ii) Forward foreign exchange contracts

The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the period date. Unrealised gains and losses on open foreign exchange contracts are included on the Statement of Financial Position and are detailed in the Schedule of Investments. Realised gains and losses are recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income.

(iii) Futures contracts

The fair value of futures contracts is based upon daily quoted settlement prices. Changes in the value of the contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income by “marking to market” the value of the contract at the period end date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income. The unrealised gain or loss at the financial year end is reported as an asset or liability, as applicable, in the Statement of Financial Position.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(c) Fair value estimation (continued)

(iv) Contract for differences

A contract for difference ("CFD") is as an agreement between the Fund and a CFD counterparty to pay or receive the change in the value of an underlying security.

In a long CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have increased in value had it been invested in the underlying security or securities. The Fund pays the counterparty a floating rate of interest on the notional amount of the CFD. The return to the Fund on a CFD contract will be the gain or loss on the notional amount plus any dividends accrued less the interest paid on the notional amount.

In a short CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have decreased in value had it been invested in the underlying security or securities. The Fund agrees to pay the counterparty the amount, if any, by which the notional amount of the CFD contract would have increased in value had it been invested in the underlying security or securities. The Fund must also pay the counterparty the value of any dividends that would have been received on those securities. The Fund receives from the counterparty a floating rate of interest on the notional amount of the CFD.

At each valuation point the difference in price between the opening price of the CFD and the market price of the underlying security is recorded at the fair value (unrealised gain or loss) of the CFD in the Statement of Financial Position. Changes in unrealised gains or losses are recognised in the Statement of Comprehensive Income.

When the CFD is closed the difference between the opening price of the CFD and the closing price is recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income. The interest received or paid are recorded as dividend income/expense in the Statement of Comprehensive Income.

(v) Options

Options have two forms, put and call options. Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. Options may also be cash settled. The daily changes in contract value are recorded at the fair value (unrealised gain or loss) in the Statement of Financial Position. Changes in unrealised gains or losses are recognised in the Statement of Comprehensive Income. The Funds recognise a realised gain or loss when the contract is closed.

When the Fund purchases an option, an amount equal to fair value which is based on the discounted* premium paid is recorded as an asset. When the Fund writes an option, an amount equal to fair value which is based on the premium received by the Fund is recorded as a liability. These are marked to market on a regular basis and the daily changes in contract value are recorded as unrealised gains or losses in the Statement of Comprehensive Income.

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security of foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.

*Forward premiums discounted

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(c) Fair value estimation (continued)

(vi) Swaps

Swaps are agreements between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time year, usually the terms are initially set so that the present value of the swap is zero. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other. Unrealised gains and losses on swap contracts are recognized in the Statement of Financial Position. Realised gains and losses or any swap related income/expenses are recognised in net gain/(loss) on Investments in the Statement of Comprehensive Income. Swap Interest income is recognised as Interest Income in the Statement of Comprehensive Income.

A swaption is an option to enter into a swap. In exchange for an option premium, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment financial year. The Funds' maximum risk of loss for total return swaps from counterparty risk or credit risk is the discounted value of the payments to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive. The risk is mitigated by having a netting arrangement between the Funds and the counterparty and by the posting of collateral to the Funds to cover the Funds' exposure to the counterparty.

2.2 Foreign currency

(a) Functional and presentation currency

Items included in the financial statements of the Company are measured in the currency of the primary economic environment in which the Funds operate (the "functional currency"). The financial statements of the Company are presented in USD.

(b) Foreign currency translation

Transactions in currencies other than USD are recorded at the rates of exchange prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of financial period end exchange rates of monetary items and non-monetary assets and liabilities that are denominated in foreign currencies are recognised in the Statement of Comprehensive Income in the financial period in which they arise. Net foreign exchange gains/(losses) on non-monetary and monetary financial assets and liabilities is included in the Statement of Comprehensive Income within net gain/(loss) on investment activities.

2.3 Revenue recognition

Dividend income is recognised when the Funds' right to receive the payment has been established, normally being the ex-dividend date. Dividend income is recognised gross of withholding tax, if any. Interest income on cash is recognised on an effective interest rate basis.

Bank interest income is recognised as income on an effective yield basis.

Interest income on bonds is recognised using the effective interest rate method.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.4 Cash and cash equivalents

Cash and cash equivalents include cash in hand and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. All amounts are subject to insignificant changes in fair value.

2.5 Collateral and margin cash

Margin cash is held by or due to brokers for open futures contracts and cleared swaps. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is as such restricted and is reported separately to the unrestricted cash on the Funds' Statements of Financial Position.

Cash collateral provided for CFDs, swaps, swaptions, futures and FX options by the Funds is identified in the Statement of Financial Position as cash collateral and is not included as a component of cash and cash equivalents.

2.6 Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

2.7 Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of forward foreign exchange contracts and swaps are included in the purchase and sale price of the investment.

Transaction costs on purchases and sales of equities and futures contracts are included in the purchase and sale price of the investment for the Funds, these include identifiable brokerage charges, commissions, transaction related taxes and other market charges.

Custody transactions costs are included in custody fees. These costs are separately identifiable transaction costs and the total costs incurred by the Funds during the financial year are disclosed in Note 8, these include transaction costs paid to the Depositary.

2.8 Repurchase Agreements

A repurchase agreement ("repo") is the sale of a security with a commitment by the seller to buy the same security back from the purchaser at a specified price at a designated future date. For the party selling the security (and agreeing to repurchase it in the future at a specified time and price) it is a repurchase agreement and will generally be used as a means of raising short-term finance and its economic effect is that of a secured loan as the party purchasing the security makes funds available to the seller and holds the security as collateral. A reverse-repurchase agreement ("reverse repo") is the same repurchase agreement from the buyers viewpoint, not the seller's. By convention, whether the transaction is called a repo or a reverse repo agreement is determined by viewing the transaction from the perspective of the dealer (i.e. The fund counterparty). The counterparty liability is included under 'Repurchase agreement payable' in the Statement of Financial Position.

2.9 Redeemable participating shares

In accordance with the requirements of the Prospectus, the Funds issue redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back into the Funds at any time for cash equal to a proportionate share of the Funds' NAV. The redeemable participating share is carried at the redemption amount that is payable at the financial period end date if the holder exercises the right to put the share back into the Funds.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.9 Redeemable participating shares (continued)

Redeemable participating shares are issued and redeemed at the holder's option based on the Funds' NAV per share at the time of issue or redemption.

The Funds' NAV per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares by the total number of outstanding redeemable participating shares. Expenses or management fees or charges not attributable to a particular Class may be allocated amongst the Classes based on their respective NAV. In accordance with the provisions of the Funds' regulations, investment positions are valued based on the latest available price for the purpose of determining the NAV per share for subscriptions and redemptions.

2.10 Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

Receivables are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition origination. They are subsequently measured at amortised cost using the effective interest yield method, less provision for impairment, impairment would be considered as part of the expected credit loss model under IFRS 9.

2.11 Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expenses are not offset in the Statement of Comprehensive Income unless required or permitted to by an accounting standard or interpretation, as specifically disclosed in the financial reporting framework of the Company.

2.12 Payables

Payables are recognised initially at fair value and subsequently stated at amortised cost. The difference between the proceeds and the amount payable is recognised over the period of the payable using the effective interest method.

Trade and other creditors are payable at various dates in the next three months in accordance with the suppliers' usual and customary credit terms.

2.13 Withholding Tax

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

2.14 New standards, amendments and interpretations

(a) Standards and amendments to existing standards effective 1 January 2024:

- (i) General Requirements for Disclosures of Sustainability-related Financial Information – IFRS S1.
- (ii) Climate-related Disclosure – IFRS S2.
- (iii) Classification of Liabilities as Current or Non-current – Amendments to IAS 1.
- (iv) Non-current Liabilities with Covenants – Amendments to IAS 1.

The amendment to IAS 1 is to modify the requirements introduced by Classification of Liabilities as Current or Non-Current on how an entity classifies debt and other financial liabilities as current or non-current in particular circumstances.

(b) New standards, amendments and interpretations effective after 1 January 2025 and have not been early adopted: These are not expected to have a material effect on the financial statements of the Company.

- (i) Lack of Exchangeability – Amendments to IAS 21.
- (ii) Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7
- (iii) Presentation and Disclosure in Financial Statements – IFRS 18

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

2. ACCOUNTING POLICIES (continued)

2.15 Fund Assets Cash Balances

Fund asset cash balances are reflected at a Fund level on the Statement of Financial Position. They represent umbrella cash collection account balances attributable to the individual Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Fund, as Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

6. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended, (the “Taxes Consolidation Act”). On that basis, it is generally not chargeable to Irish tax on its income and gains. However, Irish tax may arise on the occurrence of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, are held by the Company; and certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.
- Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investments income/gains are received and such taxes may not be recoverable by the Company and its shareholders. Withholding tax and reclaims incurred on dividends are recorded on ex-date. Dividends receivable are shown net of withholding taxes payable, if any, in the Statement of Financial Position. Withholding taxes and Capital Gains Taxes are shown are recorded on the Statement of Comprehensive Income.
- The Funds may be subject to taxes imposed on realised and unrealised gains on securities of certain foreign countries in which the Funds invest. The foreign tax expense, if any, was recorded on an accrual basis and is included in “Capital gains taxes” on the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in “Capital gains tax payable” on the Statement of Financial Position.

7. EFFICIENT PORTFOLIO MANAGEMENT

The Investment Manager and Sub-Investment Managers may, on behalf of the Funds and subject to the conditions and limits set out in the Central Bank UCITS Regulations, employ techniques and instruments relating to transferable securities for hedging purposes (to protect an asset of a Fund against, or minimize liability from, fluctuations in market value or foreign currency exposures) or for efficient portfolio management purposes.

The Funds may enter into stock lending agreements subject to the conditions and limits laid down by the Central Bank of Ireland for efficient portfolio management purposes only.

During the financial year, forward currency contracts, futures, FX options and swaps transactions were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

8. FEES AND EXPENSES

Manager Fees

The Manager shall be entitled to an annual management fee of up to 0.02% of the Net Asset Value (the “Management Company Fee”) of the relevant Fund. The Management Company Fee is based on a sliding scale applied to the aggregate assets across all Funds, subject to an annual minimum fee of €50,000 based on a single Fund and an annual minimum fee of €10,000 for each of five additional Funds and €7,500 per annum for each additional Fund thereafter.

The Management Company Fee shall be subject to the imposition of VAT, if required. The Management Company Fee will be calculated and accrued daily and is payable monthly in arrears.

The Manager shall be entitled to be reimbursed by the Company out of the assets of the relevant Fund for reasonable out of pocket expenses properly incurred and any VAT on all fees and expenses payable to or by it.

Manager fees amounting to USD 265,206 (31 December 2023: USD 306,121) were charged to the Funds for the financial year ended 31 December 2024 of which USD 75,721 (31 December 2023: USD 19,467) was payable as at the financial year end.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

8. FEES AND EXPENSES (continued)

Investment Manager's Fee

The Investment Manager is entitled to charge a percentage fee per annum of the NAV attributable to each share class, up to a maximum, as detailed below. The Investment Manager's fees were accrued daily based on the NAV of the previous day attributable to each class and were paid monthly in arrears. The Investment Manager may pay part or all of the Management fee to the Sub-Investment Manager. The Investment manager may, in its sole discretion, during any period, elect to waive a portion of its fees with respect to the Fund or any Class without notice to Shareholders.

A portion of the IM fee for the dVAM range will be paid to dVAM for product advisory services as per the agreement with the fund.

For the financial year ended 31 December 2024

8. FEES AND EXPENSES (continued)

Investment Manager's Fee (continued)

Investment management fees amounting to USD 35,428,606 (31 December 2023: USD 25,465,633) were charged to the Funds for the financial year ended 31 December 2024 of which USD 4,393,103 (31 December 2023: USD 3,546,778) was payable as at the financial year end.

Performance Fee – Pacific North of South EM All Cap Equity, Pacific G10 Macro Rates Fund and Pacific Longevity and Social Change Fund, Pacific North American Opportunities Fund and Pacific Coolabah Global Active Credit Fund.

There were USD Nil Performance Fees charged to the Pacific G10 Macro Rates Fund for the financial year ended 31 December 2024 (31 December 2023: USD 2,190).

In addition to the Investment Management Fee, the Investment Manager shall be entitled to receive out of the assets of the Fund attributable to Performance Fee Shares of the Fund a performance fee (the "Performance Fee") which will accrue on each Valuation Day and be paid either annually in arrears at the end of each twelve month period ending on 31 December in each year or upon redemption of Shares (the "Calculation Period").

The entitlement to the Performance Fee arises when the percentage return is above that of the Benchmark (as defined below) (outperformance of the Benchmark) and simultaneously the Net Asset Value per Share (adjusted for any dividend) is higher than the High Water Mark (as defined below) (outperformance of the High Water Mark). Both conditions must be fulfilled. The Performance Fee in each case amounts to 10% of the outperformance of High Water Mark or outperformance of the Benchmark, the lower of the two percentage outperformance values serving as a basis for calculation.

Dividend distributions paid out shall not be deemed to impact the performance of the Share Class. The percentage return is the difference between the Net Asset Value per Share on the last Valuation Day of the previous Calculation Period and the Net Asset Value per Share on the last Valuation Day of the current Calculation Period before the deduction of performance fees (or in the case of the first Calculation Period, the difference between the initial offer price applicable to the relevant class and the Net Asset Value per Share on the last Valuation Day of the current Calculation Period before the deduction of performance fees).

The Performance Fee shall be calculated by the Administrator (subject to verification by the Depositary) based on the finalised Net Asset Value per Share (adjusted for any dividend) of the relevant class of Shares of the Fund as at the relevant Valuation Day. Further information on the performance fee calculation can be in the prospectus.

Included in the calculation of the Performance Fee shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Calculation Period. As a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

The Pacific Multi-Asset Accumulator – Conservative Fund, Pacific Multi-Asset Accumulator – Core Fund, Pacific Multi-Asset Accumulator – Defensive Fund, Pacific Multi-Asset Accumulator – Plus Fund, dVAM Global Equity Income PCP Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Cautious Active PCP Fund, dVAM Diversified Liquid Alternatives PCP Fund, dVAM Global Equity Focus Strategy PCP Fund, Pacific MA Sustainable - Balanced Fund and Pacific North of South Emerging Markets Equity Income Opportunities Fund are not subject to performance fees.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

8. FEES AND EXPENSES (continued)

Depository's Fees

The Depository shall be entitled to a fee of up to 0.02% per annum of the NAV of the Funds, subject to a minimum annual fee of USD 15,000 per annum. This minimum fee may be waived by the Depository for such period or periods of time as may be agreed between the Company and the Depository from time to time. The Depository is also entitled to be reimbursed out of the assets of the Fund for any sub-custodian fees (at normal commercial rates) in respect of any custodian appointed by it as well as agreed upon transaction charges (at normal commercial rates). Other fees and expenses, payable to the Depository, include fees in respect of transaction processing fees. These fees are at normal commercial rates and are primarily charged on a 'per-transaction' basis.

These fees (plus VAT, if any) will accrue on a daily basis and shall be payable monthly in arrears on the last Business Day of each month.

The Company will reimburse the Depository out of the assets of the Fund for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred by the Depository and for reasonable out-of-pocket expenses of any sub-custodian appointed by the Depository and will be liable for transaction charges. The expenses of the Depository shall accrue on a daily basis and shall be payable monthly in arrears.

Trustee fees charged for the financial year amounted to USD 654,939 (31 December 2023: USD 496,542). At the financial year end, USD 183,985 (31 December 2023: USD 212,617) was payable.

Depository fees charged for the financial year amounted to USD 1,133,041 (31 December 2023: USD 1,139,132). At the financial year end, USD 191,399 (31 December 2023: USD 554,406) was payable.

Administrator's Fees

The Administrator is entitled to be paid by the Funds for administration, accounting and transfer agency services. The Administrator is entitled to a maximum variable annual fee of up to 0.06% of the NAV of the Funds, subject to a minimum annual fee of USD 25,000 for Pacific Multi-Asset Accumulator – Conservative Fund, Pacific Multi-Asset Accumulator – Core Fund, Pacific Multi-Asset Accumulator – Defensive Fund, Pacific Multi-Asset Accumulator – Plus Fund, Pacific North of South EM All Cap Equity Fund, Pacific G10 Macro Rates Fund, dVAM Diversified Liquid Alternatives PCP Fund and Pacific Longevity and Social Change Fund.

The Administrator is entitled to a maximum variable annual fee of up to 0.04% of the NAV of the Funds, subject to a minimum annual fee of USD 25,000 for dVAM Global Equity Income PCP Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Cautious Active PCP Fund and dVAM Global Equity Focus Strategy PCP Fund.

This minimum fee may be waived by the Administrator for such period or periods of time as may be agreed between the Company and the Administrator from time to time. Other fees and expenses, payable to the Administrator, include fees in respect of additional Share Class costs, financial reporting, transfer agency and fees for tax reclaim services. These fees are at normal commercial rates and are primarily charged on a 'per-transaction' basis. These fees (plus VAT, if any) will accrue on a daily basis and shall be payable monthly in arrears on the last Business Day of each month.

The Company will reimburse the Administrator for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred out of the assets of the Fund. The expenses shall accrue on a daily basis and shall be payable monthly in arrears.

Administration fees charged for the financial year amounted to USD 948,288 (31 December 2023: USD 1,127,412). At the financial year end USD 99,875 (31 December 2023: USD 465,245) was payable. Transfer agency fees charged for the financial year amounted to USD 795,149 (31 December 2023: USD 683,194). At the financial year end USD 159,158 (31 December 2023: USD 246,697) was payable.

Directors' Fees

The Directors are entitled to remuneration for their service at a rate to be determined by the Company, provided that the aggregate fees of the Directors do not exceed EUR 100,000 in any one financial year without the approval of the Board of Directors. The Board of Directors may also be paid, inter alia, for travelling, hotel and other expenses properly incurred by them in attending meetings of the Directors or in connection with the business of the Company. For the financial year ending 31 December 2024 the Directors received fees of USD 71,044 (31 December 2023: USD 66,472). At the financial year end the Directors' fees payable was USD 44,879 (31 December 2023: USD 35,550). Directors' fees are only applicable to independent directors.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

8. FEES AND EXPENSES (continued)

Auditor's Remuneration

The remuneration for all work carried out for the Company by the statutory audit firm in relation to the audit (including out of pocket expenses) of the Company's financial statements amounted to USD 111,245 (31 December 2023: USD 171,549) for financial year ended 31 December 2024. At the financial year end, USD 69,243 (31 December 2023: USD 112,512) was payable. There were no other fees paid to Deloitte Ireland LLP for Taxation services, other assurance services and non-audit services during the financial years ended 31 December 2024 or 31 December 2023.

Expense Cap

An expense cap reimbursement is in place to ensure that the total expenses of the Funds may not exceed a certain threshold. All expenses, except the Distribution fees are subject to this expense cap. It is calculated using different rates in respect of each type of share classes. Those rates ranging from 0.60% to 2.65% of the average daily NAV.

The expense cap for the financial year end 31 December 2024 is USD 1,145,767 (31 December 2023: USD 1,060,560). At the financial year end, USD 3,453,833 (31 December 2023: USD 1,535,237) was receivable.

Transaction fees

As disclosed in Note 2.7, transaction fees are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Under purchases and sales transaction fees detailed below are the transaction fees on the purchases and sales of equities.

Due to operational challenges in extracting the transaction costs on the purchase and sale of forward foreign exchange contracts and swaps, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note.

For the financial year ended 31 December 2024, the Funds incurred transaction fees as follows:

Funds	Fund CCY	Purchases and sales transaction fees for equities
Pacific Multi-Asset Accumulator – Conservative Fund	GBP	52,056
Pacific Multi-Asset Accumulator – Core Fund	GBP	326,892

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS

General risk management process

As an investment company, the management of financial instruments is fundamental to the management of the Company's business. The Investment Manager is responsible, subject to the overall supervision and control of the Board of Directors, for managing the assets and investments of the Funds of the Company in accordance with each Fund's investment objectives, any guidelines approved by the Board of Directors and the investment policies set forth in the Prospectus and its Supplements in accordance with the UCITS Regulations.

In pursuing its investment objectives, the Company may hold a number of investments, including:

- Equities and Bonds;
- Cash and liquid resources; and
- Contracts for difference, futures contracts, forward foreign exchange contracts, interest rate swaps, options and swaptions.

These instruments may be volatile, involve certain specific risks and expose investors to a high risk of loss. The low initial margin deposits normally required to establish a position in such instruments permit a high degree of leverage.

As a result, a relatively small movement in the price of a contract may result in a profit or a loss that is high in proportion to the amount that the Funds actually placed as initial margin and may result in unlimited further loss exceeding any margin deposited.

Furthermore, when used for hedging purposes there may be an imperfect correlation between these instruments and the investment or market sectors being hedged. Transactions in over the counter derivatives may involve additional risk as there is no exchange market on which to close out an open position.

As defined in the accounting standard IFRS 7, risk can be separated into the following components; market risk, credit risk and liquidity risk. Each type of risk is discussed in turn and qualitative and quantitative analysis are provided where relevant to give an understanding of the risk management methods used by the Investment Manager.

Risk Management Framework

The Company's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Company.

The Board of Directors reviews reports from the Investment Manager in relation to the Funds' performance and risk profile on a quarterly basis, or more frequently as required in relation to the Company's performance and risk profile. The Investment Manager is also responsible for ensuring that the Funds are managed in accordance with the terms of the Funds' investment objective, policy, guidelines and limits as set out in the Prospectus and relevant Supplement, as well as the Investment Manager's own internal investment guidelines and limits.

The Company's Depositary is responsible for independent day to day monitoring of compliance of the Funds' investment guidelines and limits, reporting any breaches to the Investment Manager or Company, as appropriate. These guidelines and limits are set to ensure that the risk borne by the Funds are appropriate. In addition, the Investment Manager reviews and monitors risk, exposure and performance reports received from the individual Sub-Investment Managers, supplemented with internally generated analysis using data fed directly from the Depositary.

Role of the Investment Manager

The Investment Manager has responsibility for the selection and monitoring of Sub-Investment Managers. To that end, the Investment Manager undertakes regular due diligence reviews of each Sub-Investment Manager. As part of this process the Investment Manager will review the proposed use of Financial Derivative Instruments ("FDIs") and the Sub-Investment Managers' risk management processes. Additionally, Sub-Investment Managers will agree with the Investment Managers that their use of FDIs will comply with the provisions of the Funds'/Company's Risk Management Process ("RMP"). Any material deviations to a Sub-Investment Managers use of FDI and risk management process require the prior notification of and approval of the Investment Manager. This is a condition of the investment management agreements with the Sub-Investment Managers. Each Sub-Investment Manager must provide monthly compliance questionnaires and are subject to periodic compliance reviews by the compliance function of the Investment Manager.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

Role of the Investment Manager (continued)

The risk management team within the Investment Manager monitors the Funds on an ongoing basis. Any inappropriate use of FDIs (such as a non-approved FDI) or excessive exposures will typically be picked up as part of their ongoing review.

Role of the Administrator

The Administrator provides fund administration services and valuation of all assets and liabilities including FDIs used by the Funds at each valuation point. Any issues that are identified by the Administrator are immediately brought to the attention of the Investment Manager for further investigation.

Role of the Depositary

The Company's Depositary carries out a separate and independent compliance monitoring role to those carried out by the Investment Manager, Investment Service Providers, and Administrator. As part of its fiduciary role to a regulated fund, the Depositary reviews all of the investment objectives and limits (including FDI limits) on an ongoing basis. While not appointed by the Investment Manager (the Depositary is appointed by the Company), any breaches identified by the Depositary are immediately brought to the attention of the Investment Manager for investigation and resolution.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

Role of Sub-Investment Managers

As mentioned above, discretionary investment management has been outsourced to the Sub-Investment Managers and also managed internally. In addition to the oversight and independent monitoring being carried out by the Investment Manager, Administrator and Depositary, each Sub-Investment Manager must have adequate controls and procedures in place to manage their respective portfolios within the limits prescribed under the UCITS Regulations and the Central Bank guidance in respect of FDIs.

Each Sub-Investment Manager must have a RMP in place which is designed to be UCITS compliant. As outlined in the various Sub-Investment Managers' RMP documents, each Sub-Investment Manager is required to manage its portfolio in accordance with the UCITS Regulations and the Central Bank's guidance on FDIs. Furthermore, the Sub-Investment Managers will only use the FDIs outlined in their respective RMPs. If a Sub-Investment Manager wishes to use a FDI not covered by the existing RMP, this change will necessitate an amendment to their RMP document and, by implication, the Fund's RMP. This will require the approval of the Central Bank before the FDI can be used.

(a) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is divided into three distinct sections; market price risk, currency risk and interest rate risk.

(i) Market price risk

Market price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Value at Risk ("VaR")

VaR represents the potential losses from adverse changes in market factors for a specified time period and confidence level. It is the maximum loss not exceeded with a given probability defined as the confidence level, over a given period of time.

The Investment Manager estimates VaR using historical simulation. This involves running the current portfolio across a set of historical price changes to yield a distribution of changes in portfolio value, and computing a percentile (the VaR).

The Funds global exposure is measured either using VaR or the commitment approach as defined by the individual sub funds supplements. Where the fund is subject to an advanced risk management process which, in compliance with the UCITS Regulations aims to ensure that on any day the absolute value-at-risk of the Funds may not exceed 20% of the NAV of the Fund. The value-at-risk of the Portfolio is an estimation of the maximum loss which the Fund may incur over a one month holding period and is arrived at through quantitative simulations with a one-tailed confidence interval of 99% and a historical observation period of 2 years.

The table below shows the calculated VaR using 5 year historical simulation of the portfolio as at 31 December 2024 for the Pacific Multi Asset Accumulator Funds and 1 year historical simulation of the portfolio as at 31 December 2024 for the Pacific G10 Macro Rates Fund.

Funds	Method	Value under method
Pacific Multi-Asset Accumulator – Conservative Fund	VaR 20 day - 99%	8.24%
Pacific Multi-Asset Accumulator – Core Fund	VaR 20 day - 99%	10.25%
Pacific Multi-Asset Accumulator – Defensive Fund	VaR 20 day - 99%	5.89%
Pacific Multi-Asset Accumulator – Plus Fund	VaR 20 day - 99%	12.6%
Pacific G10 Macro Rates Fund	VaR 20 day - 99%	5.53%

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(a) Market Risk (continued)

(ii) Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency, i.e. in a currency other than the functional currency in which they are measured. The value of the Company's investments can be affected by currency translation movements as some of the assets and income may be denominated in currencies other than the base or functional currency of that Company.

A portion of the assets of the Funds are denominated in currencies other than the functional currency of each Fund. The Funds are therefore exposed to currency risk, whereby the net assets and total return can be significantly affected, favourably or unfavourably, by currency movements.

In line with the Prospectus, in some cases the Company manages the Funds' exposure to foreign exchange movements by entering into foreign exchange hedging transactions, while in others the Company elects not to hedge the foreign currency risk but take the effect of the exposure.

The tables below summarise the foreign currency risk exposure of the Funds' assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The sensitivity details the effect of a 5% increase in relevant foreign currency exchange rates. A 5% decrease in exchange rates would have an impact that in all material effect would be equal and opposite.

(iii) Interest rate risk

Interest rate risk is the risk that the value of an investment that is impacted by interest rates (such as fixed income investments) will fluctuate due to changes in market interest rates.

Interest rate risk is managed, in part, by the security selection process of the Investment Manager which includes predictions of future events and their impact on interest rates, diversification and duration. The Investment Manager monitors the interest rate risk in accordance with their risk policy.

The Company is exposed to interest rate risk to the extent that it receives interest income on its cash and cash equivalents balances, the value of investments in interest rate bearing securities may also be subject to price volatility due to changes in interest rates. The Funds have no material cash flow risk arising from interest on these balances. The value of investments in interest rate bearing securities may be subject to price volatility due to changes in interest rates.

Notes to the Financial Statements (continued)

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(b) Liquidity Risk

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities. The risk associated with the need to satisfy shareholders' requests for redemptions is mitigated by the fact that the Funds hold substantial liquid assets, including cash, which can satisfy usual levels of demand.

The Board of Directors may in their discretion limit the number of shares of the Funds redeemed on any dealing day to shares representing not more than 10% of the NAV of each Fund on that dealing day. In this event, the Directors may defer the excess redemption applications to subsequent dealing days. The limitation will apply pro rata so that all shareholders wishing to have shares of each Fund redeemed on that dealing day realise the same proportion of their shares. Shares that are not redeemed, but which would otherwise have been redeemed, will be carried forward for redemption on the next dealing day and will be dealt with in priority (on a pro rata basis) to redemption requests received subsequently.

As at 31 December 2024 and 31 December 2023 the Company has no non-derivative liabilities over 3 months. Some funds have longer dated derivative liabilities however these liabilities are managed in line with the funds' investment policy and risk management process.

(c) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it entered into with the Company on behalf of the Funds.

In managing credit risk the Investment Manager reviews the creditworthiness of counterparties with which the Company contracts. The Company may enter derivative or other agreements with counterparties approved by the Investment Manager subject to the investment restrictions set out in the Prospectus and Supplements.

Substantially all of the cash and securities held by the Company are held via the Citi Depositary Services Ireland Designated Activity Company which is the global depositary for the Funds and is permitted to appoint sub-custodians to provide custody services on their behalf. Bankruptcy or insolvency of the Depositary or sub-custodians may cause the Company's rights with respect to cash and securities held by them to be delayed or limited.

The Company's securities are separately identified on the books and records of the sub-custodians, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary or sub-custodians, the Company's assets are segregated and protected. However, in the case of a credit event, access to assets may be delayed. Cash, unlike securities, is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. However, for all major currencies, the cash at the sub-custodian is maintained in correspondent accounts of the sub-custodian.

(d) Capital Management

The capital of the Company is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a daily basis, as the Company is subject to daily subscriptions and redemptions at the discretion of the shareholders.

A redemption request by a significant shareholder may have a significant impact on the liquidity of the Company and its ability to continue as a going concern. Refer to the Liquidity Risk section above for details of how this risk is mitigated.

The Company's objective when managing capital is to safeguard its ability to continue as a going concern in order to achieve its overall objective of long-term capital growth and to maintain a strong capital base to support the development of its investment activities.

The Investment Manager monitors capital on the basis of the value of net assets attributable to holders of redeemable participating shares.

(e) Fair Value Hierarchy

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Certain inputs for the asset or liability are not based on observable market data (that is, unobservable inputs).

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(e) Fair Value Hierarchy (continued)

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes “observable” requires significant judgment by the Investment Manager. The Investment Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, IFRS 13 requires the Company to disclose the level within the fair value hierarchy within which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Assets and liabilities, not carried at fair value are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Cash and cash equivalents include deposits held with banks and other short-term investments in an active market and they are categorised as Level 1.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company.

Payable for investments sold and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

Total	(113,680)	(504,883)	–	(618,563)

**Launched on 11 October 2023.

There were no significant transfers between Level 1 and Level 2 of the fair value hierarchy during the financial year.

As at 31 December 2023 there are no securities categorised as Level 3.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13.

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

10. SOFT COMMISSIONS

There were no soft commission arrangements in existence during the financial years ended 31 December 2024 and 31 December 2023.

11. RELATED PARTY TRANSACTIONS

The Manager earned fees of USD 265,206 (31 December 2023: USD 306,121) during the financial year of which USD 75,721 (31 December 2023: USD 19,467) remained payable. For further details on the Manager's fees, see Note 8.

The Investment Manager earned fees of USD 35,428,606 (31 December 2023: USD 25,465,633) and reimbursed fees of USD 1,145,767 to the Funds (31 December 2023: USD 1,060,560) during the financial year of which USD 4,393,103 (31 December 2023: USD 3,546,778) remained payable and USD 3,453,833 (31 December 2023: USD 1,872,343) remained receivable at the financial year end. The impact of the above cross-investment transactions has been eliminated from the total column for the umbrella fund in the Statement of Financial Position, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Comprehensive Income.

Connected Party Transactions

Regulation 43(1) of the Central Bank UCITS Regulations states that “A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm’s length, and b) in the best interest of the unit-holders of the UCITS”.

The Directors are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected party and all transactions with connected parties that were entered into during the period to which the report relates, complied with the obligations that are prescribed by Regulation 43(1).

Notes to the Financial Statements (continued)

For the financial year ended 31 December 2024

12. DIVIDENDS

It is not the intention of the Directors to declare any dividends on any Share Classes for the Multi-Asset range of Funds. The net investment income on the Funds' investments attributable to Shares is expected to be retained by the Funds, which will result in an increase in the NAV per Share. It is anticipated that the dVAM Global Equity Growth Fund can make distributions half yearly and the Pacific North of South EM All Cap Equity can make distributions quarterly. Any such distributions will be paid from the net income.

During the financial year ended 31 December 2024 Pacific North of South EM All Cap Equity Fund declared a dividend of USD 29,819,572 (December 2023: 23,341,148), dVAM Global Equity Income PCP Fund declared a dividend of USD 10,960,086 (December 2023: 7,743,183), Pacific North of South EM Equity Income Opportunities Fund declared a dividend of USD 5,076,053 (December 2023: 3,082,924), Pacific Longevity and Social Change Fund declared a dividend of USD 272 (December 2023: Nil), Pacific North American Opportunities Fund declared dividend of USD 43,068 (December 2023: Nil), LAM Alternatives and Real Assets Fund declared dividend of USD 8,531 (December 2023: Nil), LAM Global Equity Fund declared dividend of USD 7,967 (December 2023: Nil), LAM Global Fixed Interest Fund declared dividend of USD 10,846 (December 2023: Nil) and LAM Multi Asset Stewardship Fund declared dividend of USD 40 (December 2023: Nil). Please see dividend breakdown in table below:

Fund	Share Class	Base Currency	Dividend Amount

Article 6 Sub Funds

Sustainable Finance Disclosure Regulation (in fund specific part)

This Fund integrates sustainability risks but does not promote ESG characteristics or has a sustainable investment objective according to the Sustainable Finance Disclosure Regulation (SFDR).

EU Taxonomy (in general part)

The EU Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the “Climate Objectives”).

The EU Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria. Investors should note with respect to Funds that do not promote ESG characteristics or have a sustainable investment objective, the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

Article 8 Sub Funds

Sustainable Finance Disclosure Regulation (in fund specific part)

This Fund promotes ESG characteristics as stated in the Sustainable Finance Disclosure Regulation (SFDR). The Fund Manager can confirm that the environmental and social characteristics as stated in the fund documentation have been implemented and have been complied with.

EU Taxonomy Regulation (in general part)

The EU Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the “Climate Objectives”).

The EU Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria.

Supplemental Information (Unaudited) (continued)

For the financial year ended 31 December 2024

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (continued)

EU Taxonomy Regulation (in general part) (continued)

For each Fund that promotes ESG characteristics, the investment policy, as set out in the relevant Supplement and/or fund specifications, describes how the relevant Fund promotes ESG characteristics through, amongst other things, consideration of a wide range of environmental characteristics, including the Climate Objectives.

In order for an investment to qualify as environmentally sustainable as at the date hereof, it must meet a number of different criteria, including that it contributes substantially to a Climate Objective, as measured according to the technical screening criteria set out in the EU Taxonomy Regulation, and that it must not significantly harm any of the other environmental objectives set out in the EU Taxonomy Regulation.

The technical screening criteria are very detailed and require the availability of multiple, specific data points regarding each investment. As at the date hereof, there is insufficient data available to be able to assess investments using the technical screening criteria. As such, the Fund is not in a position to describe: (a) the extent to which the investments of the Fund are in economic activities that qualify as environmentally sustainable pursuant to the technical screening criteria; (b) the proportion, as a percentage of the portfolio as a whole, of investments in environmentally sustainable economic activities; or (c) the proportion, as a percentage of the portfolio as a whole, of enabling and transitional activities (as such are described in the EU Taxonomy Regulation). Therefore, the Fund Manager considers that the most prudent course of action, at present, is to disclose that 0% of such Funds' investments are in environmentally sustainable economic activities for the purposes of the EU Taxonomy Regulation.

The "do no significant harm" principle referred to above applies only to those investments underlying the relevant Fund that take into account the EU criteria for environmentally sustainable economic activities; investors should note that at present none of the relevant Funds take into account the EU criteria for environmentally sustainable economic activities.

The Fund Manager is keeping this situation under active review and where sufficient reliable, timely and verifiable data on the investment becomes available, it will re-evaluate its approach to the EU Taxonomy Regulation and relevant documentation will be updated.

Appendix I Remuneration Disclosure (Unaudited)

For the financial year ended 31 December 2024

The Manager has designed and implemented a remuneration policy (the “Policy”) in line with the provisions of S.I. 257 of 2013 European Union (Alternative Investment Fund Managers) Regulations 2013 (the “AIFM Regulations”), S.I. 352 of 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the “UCITS Regulations”) and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the “ESMA Guidelines”). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The Manager’s remuneration policy applies to its identified staff whose professional activities might have a material impact on the Company’s risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the Company. The Manager’s policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the Manager to operate a fully flexible policy, with the possibility of not paying any variable component. When the Manager pays a variable component as performance related pay certain criteria, as set out in the Manager’s remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice. The Manager’s remuneration policy is consistent with, and promotes, sound and effective risk management and does not encourage risk-taking which is inconsistent with the risk profile of the funds it manages.

These disclosures are made in respect of the remuneration policies of the Manager. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the Manager fully or partly involved in the activities of the Company that have a material impact on the Company’s risk profile during the financial year to 31 December 2024 (the Manager’s financial year):

Fixed remuneration	EUR
Senior Management	3,377,918
Other identified staff	-
Variable remuneration	
Senior Management	732,962
Other identified staff	-
Total remuneration paid	4,110,880

No of identified staff – 20

Neither the Manager nor the Company pays any fixed or variable remuneration to identified staff of the Investment Manager.

There have been no material changes made to the Remuneration Policy or the Manager’s remuneration practices and procedures during the financial year.

Pacific Capital UCITS Funds plc

Securities Financing Transactions Regulation Disclosures (“SFTR”) (unaudited)

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation (“SFTR”) which came into effect on 12 January 2016.

A Securities Financing Transaction (“SFT”) is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

The Sub-Fund was engaged in securities lending transactions during the financial year ended 31 December 2024 (31 December 2023: None). In addition, SFTs that meet the above definition were held by the Sub-Fund as at 31 December 2024 (31 December 2023: None).

There were securities and commodities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) as at 31 December 2024 (31 December 2023: None).

In accordance with Article 13 of the Regulation, the Fund’s involvement in and exposures related to repurchase transactions and Total Return Swaps for the year ended 31 December 2024 are detailed below:

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Pacific G10 Macro Rates

Legal entity identifier: 21380081MZI87Z1WS280

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes both environmental and social characteristics by investing in sovereign and quasi-sovereign issuers which score in the highest 50% of issuers. The scoring system assesses the relevant issuer against a range of environmental, social and political metrics deployed by the Investment Manager and described in further detail below.

100% of the Fund's holdings were aligned with E/S characteristics.

The following list are environmental characteristics promoted by the fund as a result of its investment approach:

- reduced exposure to air pollution contributors;
- reduction of greenhouse gas footprints; and
- contribution to biodiversity and ecological protection.

The following list are social characteristics promoted by the fund:

- equality at senior levels of society;
- access to health care; and
- digital inclusion.

The following list are governance and freedom characteristics promoted by the fund:

- application of the rule of law;
- protection of legal rights;
- Insulation from corruption; and
- Political freedom and freedom of expression.

The Fund strives to mitigate detrimental effects on nature and communities by utilizing an in-house methodology to assess ESG attributes of target issuers. In this context, the environmental and social characteristics of a given instrument will have regard to the relevant sovereign issuer. For example, an investment in a US Treasury Bill will have regard to the performance of the United States against the relevant criteria and an investment in German Bunds will have regard to the performance of Germany. In the context of a trade which has regard to the currency or instruments of more than one sovereign issuer, the Fund will have regard to each individual issuer. For example, a USD / AUD currency swap will assess each of the United States and Australia against the relevant criteria.

The Fund generates positive returns from its exposure to sovereign or quasi-sovereign instruments. The Fund undertakes a relative value investment process, so takes both long and short positions in these instruments with the aim to profit when the price reverts to what is considered fair value. This investment process is equivalent to liquidity

provision to the sovereign and quasi-sovereign markets, which enables the efficiency of markets and helps facilitate price discovery within those markets.

Within the context of this investment framework and its implementation in Fund, the exclusion of liquidity provision to a sovereign or quasi-sovereign market is the expression of a negative view on ESG characteristics and the inclusion is the expression of a positive view on ESG characteristics (in each case as determined using the ESGP scoring system described in further detail below). The inclusion / exclusion criteria are set by a minimum environmental and social score for each sovereign or quasi-sovereign issuer. Therefore, both long and short positions to a sovereign or quasi-sovereign are seen as positive exposures insofar as they provide liquidity in respect of the relevant sovereign issuer and its instruments. The Fund will not take any positions, whether long or short, in relation to sovereign or quasi-sovereign issuers who are excluded on the basis set out in this Supplement.

In addition to investing in currencies and sovereign and central bank debt of sovereign and quasi-sovereign or supranational agencies, the Fund may invest in bonds of the highest credit quality (broadly equivalent to AAA) issued by banks in relevant jurisdictions and guaranteed by governments. In applying its ESG scoring system, the Fund will have regard to the jurisdiction of the relevant bank and guaranteeing government and apply the scoring which would apply to the relevant sovereign issuer.

● *How did the sustainability indicators perform?*

All underlying investments met the minimum sustainability requirements with the ESGP score of all issuers being within the highest 50%. The 2024 average ESGP score for the fund was 76. A score of 76 is in the 90th percentile within the investment universe.

The Fund's S & G score were both high at 73.2 and 86.2, respectively.

The Fund E score was 50.8, this is relatively low compared to the S, G and P score predominantly because the United States has a relatively high CO2 emissions per capita.

Fund E, S, G and ESGP scores throughout 2024:

	Mar-24	Jun-24	Sep-24	Dec-24	2024
E Score	50.8	51.7	50.6	49.9	50.8
S Score	73.9	73.9	73.1	72.0	73.2
G Score	86.6	86.5	86.1	85.5	86.2
P Score	94.2	94.2	93.8	93.4	93.9
ESGP Score	76.4	76.6	75.9	75.2	76.0

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***...and compared to previous periods?***

Periodic Sustainable indicators for the Pacific G10 Macro Rates:

	2023	2024
E Score	47.0	50.8
S Score	71.4	73.2
G Score	82.1	86.2
P Score	93.9	93.9
ESGP Score	73.6	76.0

The Fund's higher exposure to the UK and lower exposure to the US in 2024 compared to 2023, has helped increase the E, S and G score of the Fund. This helped the Fund ESGP score rise from 73.6 to 76.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were calculated for the Fund such as CO2 emissions, however many of these PAIs still lack the coverage required to be useful measurements and countrywide data tends to take several years to be calculated.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is the average weight over 2024 calendar year.

Sector	Assets
Curve	30%
Spreads	19%
X Currency	15%
Volatility	15%
Duration	10%
Inflation	7%
FX	4%
The Trade Types above are an average weight over 2024 calendar year.	

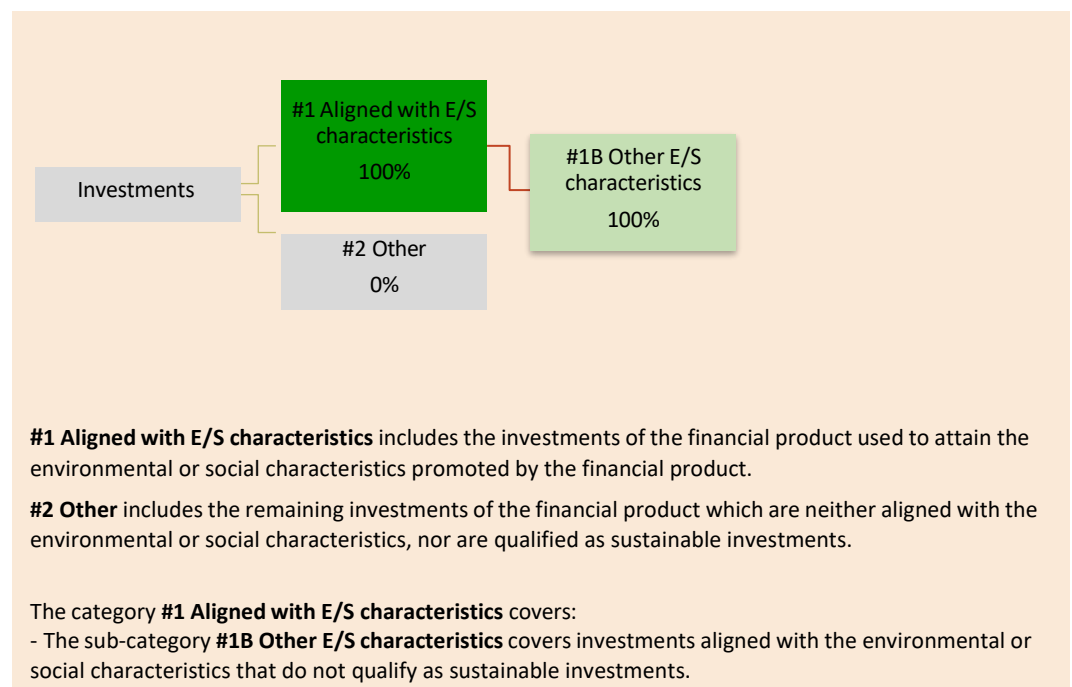

What was the proportion of sustainability-related investments?

The table below sets out details of the sustainability related investments within the portfolio using a quarterly average throughout 2024.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Region	Assets
UK	24.1%
North America	19.9%
Japan	6.4%
Europe	31.0%
Australasia	18.7%
The Trade Types above are an average weight over 2024 calendar year.	

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the portfolio was aligned to the EU Taxonomy. The Fund does not commit to investment in Taxonomy aligned investments and none of the Fund's holdings during the reference period were so aligned.

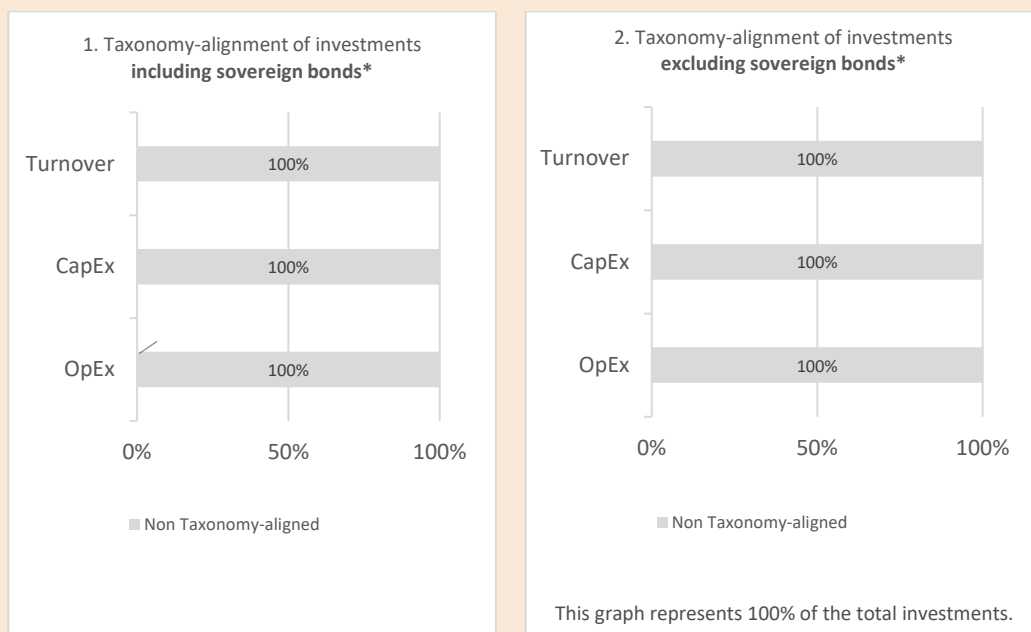

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

● ***What was the share of investments made in transitional and enabling activities?***

As the Fund has not committed to make investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments?

Not applicable

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

From time to time there may be investments that are currently difficult to categorise against the ESGP criteria and which are placed in “#2 Other”. These may include, but are not limited to, (i) new instruments issued from entities that are government related but whose categorisation is challenging, such as instruments issued by the EU, where categorisation is more challenging due to the number of sovereigns within the EU or (ii) instruments which are issued with such a minimal quantity that market standards used to assess them for ESG purposes is evolving. These investments are to assist in achieving the financial long-term goals of the financial product. There are no minimum environmental or social safeguards in respect of these assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Pacific Asset Management utilised World Bank & Freedom House data to ensure sovereign investments are within the highest 50% of the universe. The team used this data to assess each country's ESGP credentials.

How did this financial product perform compared to the reference benchmark?

- *How does the reference benchmark differ from a broad market index?*
NA
- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*
NA
- *How did this financial product perform compared with the reference benchmark?*
NA
- *How did this financial product perform compared with the broad market index?*
NA

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: dVAM Diversified Liquid Alternatives PCP

Legal entity identifier: 213800WH8KO5AVV6DP92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ____%

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Fulcrum Asset Management LLP ("**Fulcrum**", the "**Investment Manager** or "**we**") considers the environmental and social characteristics promoted by dVAM Diversified Liquid Alternatives PCP ("**the Fund**") have been met in the calendar year 2024. Further details in relation to the implementation of the investment strategy and the degree of alignment of the Fund with the environmental and social characteristics promoted by the Fund are set out hereunder.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In making investments on behalf of the Fund, Fulcrum seeks to invest, directly or indirectly through underlying funds managed by a professional investment adviser (each an "**Underlying Fund**") in companies that have good corporate sustainability practices in place, treat employees fairly and have good governance. In particular, the Fund seeks to promote environmental characteristics relating to the goals of climate change mitigation and adaption, the sustainable use and protection of water and marine resources and the transition to a circular economy. The Fund is also committed to investing in organisations and initiatives focusing on creating sustainable financial markets. The Fund is not managed to a reference benchmark.

In implementing its investment strategy, the Investment Manager has engaged with the managers of the relevant Underlying Funds on their corporate governance practice, commitments to the Net Zero Asset Managers initiative and other matters set out herein.

● ***How did the sustainability indicators perform?***

The Fund may invest directly in target assets or through Underlying Funds (with investment through underlying funds being between 50% and 90% of the net asset value of the Fund at any time).

The Fund's weighted average environmental, social and governance ("**ESG**") score on a scale of one to four (where one represents a poor score and four represents a leading score) using Fulcrum's proprietary scoring framework (the "**Framework**") was 2.6 out of a total possible score of 4.0, with individual scores of Underlying Funds ranging from 1.5 to 3.8 (the last annual underwriting of the portfolio was in January 2024).

There has been no significant change in the average sustainability score of the portfolio compared to the prior year. No investments were made in new strategies with an average sustainability score of '1'. The listed Real Asset investments in the portfolio have the highest average scores (above 3), whereas the Diversifiers layer in the portfolio had the lowest, although the average score for these investments was still above 2.

During 2024, Fulcrum spent time engaging with the managers of Underlying Funds on ways in which they may improve their sustainability score in the future. This included topics such as climate change, their overall approach to ESG integration as a business and sharing best practices. Fulcrum has been pleased with the response of the managers and their willingness to listen and collaborate on the engagement plans.

As a more general reminder, Fulcrum's application of the Framework has contributed to sustainable investments by reviewing the following four areas for each Underlying Fund, as set forth in more detail in the Fund's Supplement dated 31 May 2024 to the Prospectus of Pacific Capital UCITS Funds plc, ensuring a degree of consideration to sustainability when Third-Party Sub-Advisers manage their share of the Fund's investments:

- 1) The manager's approach and mandate design

- 2) The fund's asset allocation and portfolio construction
- 3) The manager's security selection and implementation
- 4) The manager's asset class specific considerations

This process results in the following key benefits:

- It prompts a proactive search for investment opportunities with positive scoring sustainability characteristics (e.g. clean energy and recycling companies, or third-party managers who themselves have strong sustainability characteristics); and
- It provides a very clear audit trail for marginal decisions, where the sustainability scores can be very influential.

Fulcrum will also assess carbon metrics when investing in companies and Underlying Funds. In this context, the focus is on greenhouse gas emissions and, as a metric for this, Fulcrum has applied the Fund's Weighted Average Carbon Intensity ("WACI", a measure of carbon emissions having regard to revenues) to measure and disclose the carbon intensity of the Fund's investments. We believe this is currently most appropriate metric given that the availability of sustainability investment-level data is still developing. Whilst all metrics have inherent limitations, we note that the Taskforce on Climate-Related Financial Disclosures has recommended asset managers to use WACI as a core metric to disclose in its 2017 final report.

As at the date of this report, the WACI figure for the portfolio was 155.7 tons CO₂ per \$m sales. This represents a decrease compared to the previous year, which was 206 tons CO₂ per \$m sales. Fulcrum's analysis suggests that the WACI of the Fund would have decreased further, i.e. 146.8 tons CO₂ per \$m sales were they to have made no changes to the asset allocation (methodology: assume 2023 portfolio weights and 2024 Underlying Fund's WACI).

The coverage ratio for the portfolio was 74.2%. Fulcrum continues to work on the Underlying Funds that are not currently providing WACI data, but this generally relates to strategies where WACI is harder to measure (i.e. Diversifiers).

The three key reasons for the decrease in WACI can be attributed to:

1. More coverage in actual data: WACI data from managers, especially from our Diversifiers, is lower than the proxy data that Fulcrum has historically used. Fulcrum is more conservative in its proxy data selection.
2. Data issues: A lot of our managers are still working on their carbon calculation and while we have tried to push for data for the report, we may find changes as they formalise their data.
3. Generally, the data given by corporates used to calculate WACI has been lower at an industry level, while this may be a sign of progress and

decarbonisation, we assume that it could also be due to a use of carbon offsets.

In assessing Underlying Funds, Fulcrum seeks to achieve diversity across the Fund in terms of the location, gender diversity, experience, decision making and resources of the management team and investment professionals of the relevant Underlying Funds.

The portfolios geographic exposure (see below) is similar to that of global equities, albeit with a slight overweight to UK assets.

Source: Fulcrum Asset Management, 31 December 2024

Six of the underlying managers have lead female fund managers out of a total of 32. The location of the underlying managers is highly diversified, with managers based across North America (11), Europe (17), Asia (1) and Australia (3). There are also a wide variety of different investment styles (i.e. value, growth, quality etc) and investment decision making styles (81% discretionary, 19% quantitative).

On a full look-through basis, The Fund's exposure to companies generating significant revenues from certain sectors will be limited. The list of excluded sectors as at the date of this document includes but is not limited to tobacco, controversial weapons and predatory lending. Investments in companies that have a record of poor-quality governance practices and systematic breaches of environmental and social standards that are expected to continue are not acceptable as they pose uncontrollable risks to long-term investment performance.

There was no direct exposure to any of the excluded sectors as at December 31st 2024. On a full lookthrough basis, any indirect exposure to such sectors was below the frictional tolerance level that Fulcrum has in place for Underlying Funds. This was monitored as part of Fulcrum's ongoing annual operational due diligence questionnaire process.

● **...and compared to previous periods?**

As of end December 2023, the WACI figure for the portfolio was 206 tons CO2 per \$m sales. Fulcrum's analysis suggests that the WACI of the Fund would have decreased further, i.e. 174 were they to have made no changes to the asset allocation (methodology: assume 2022 portfolio weights and 2023 Underlying Fund's WACI).

This represents a decrease increase compared to the previous year. The coverage ratio for the portfolio was 71%. Fulcrum continues to work on the Underlying Funds that are not currently providing WACI data, but this generally relates to strategies where WACI is harder to measure.

In assessing Underlying Funds, Fulcrum seeks to achieve diversity across the Fund in terms of the location, gender diversity, experience, decision making and resources of the management team and investment professionals of the relevant Underlying Funds.

The portfolios geographic exposure (see below) is similar to that of global equities, albeit with a slight overweight to UK assets.

Source: Fulcrum Asset Management, 31 December 2024

Five of the underlying managers have lead female fund managers out of a total of 32. The location of the underlying managers is highly diversified, with managers based across North America, Europe, Asia and Australia. There are also a wide variety of different investment styles (i.e. value, growth, quality etc) and investment decision making styles (82% discretionary, 18% quantitative).

There was no direct exposure to any of the excluded sectors as at December 31st 2024. On a full lookthrough basis, any indirect exposure to such sectors was below the frictional tolerance level that Fulcrum has in place for Underlying Funds. This was monitored as part of Fulcrum's ongoing annual operational due diligence questionnaire process.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable. While the Fund promotes environmental and social characteristics as outlined above, the Fund does not commit to any sustainable investments as defined in Article 2(17) of SFDR.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager has mainly taken indicators for adverse impacts on sustainability factors into account by applying the Framework, including an evaluation of each Third-Party Sub-Adviser’s use of indicators for adverse impacts on sustainability factors.

Fulcrum considers 18 mandatory indicators when investing into companies, sovereigns, real estate assets and other types of assets (as applicable). Furthermore, we have chosen two additional principal adverse indicators (“**PAI**”), when investing into companies, relating to the lack of a deforestation policy, and the number of identified cases of severe human rights issues and incidents.

Fulcrum’s full “Statement on Principal Adverse Impacts of Investment Decisions on Sustainability Factors” for the calendar year 2024 can be found at <https://www.fulcrumasset.com/inst/uk/en/important-information/>

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
PGIM Emerging market Debt Total Return	Emerging market Debt	6.0%	United States
Man GLG UK Absolute Alpha	Equity Long/Short	3.8%	United Kingdom
Kite Lake Event Driven	Event Driven	3.7%	United Kingdom
PGIM Emerging Market Debt Local Currency	Emerging market Debt	3.6%	United States
Sky Harbor Short Duration	High Yield Bonds	3.6%	United States
Fidelity ARGE	Absolute Return Equity Dispersion	3.5%	United Kingdom
MSIM Global Mortgage Securitised	Mortgage Backed Securities	3.1%	United States
Neuberger Berman	Commodities	3.1%	United States
Crabel	Macro Strategy	3.0%	United States
BlackRock	Asia Pacific Diversified Equity Absolute Return	3.0%	United States

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31st December 2024

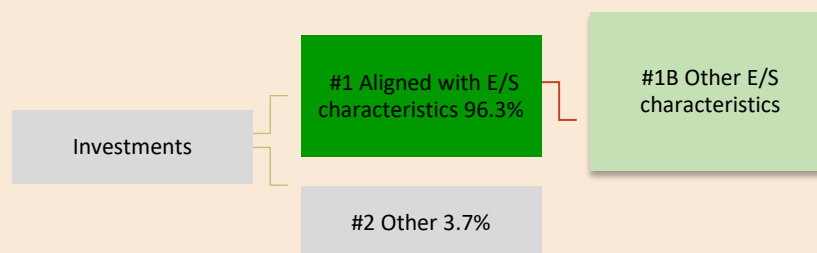

The figures above represent the average holdings for the full year 2024, the last day of the reference period.

What was the proportion of sustainability-related investments?

● What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● In which economic sectors were the investments made?

DVAM Asset Allocation

Source: Fulcrum Asset Management, 31 December 2024

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Fund does not commit to make investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

These investments included uninvested cash, investments which did not promote any of the Fund’s characteristics or which are used for efficient portfolio management, hedging or liquidity management purposes. There were no specific environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Engagement with managers of Underlying Funds

As stated under “To what extent were the environmental and/or social characteristics promoted by this financial product met?” Fulcrum has engaged with the Underlying Funds with specific engagement plans developed for each manager. The proprietary scores (1-4) were updated following the assessments taken over the year and key topics including biodiversity, Diversity, Equity & Inclusion (DEI) and exclusion lists were discussed and challenged on a consistent basis.

Proxy voting

Fulcrum has applied its proxy voting policy that is designed to hold companies to account for their sustainability performance. Fulcrum uses Glass Lewis, a leading independent corporate governance research provider, to analyse corporate actions, management recommendations and make vote recommendations in order to assist the Firm in the independent assessment of governance issues. Fulcrum has voted with the independent research recommendations unless it chooses to override this based on its own analysis. For more information on the Proxy Voting Policy please see

<https://www.fulcrumasset.com/uploads/2022/10/73594ab77d38fd25f05042676f2a5b2b/proxy-voting-policy.pdf?v=1668164912>

Principal adverse impacts

In 2022 we have laid the foundation for a more quantitative and systematic approach to measuring and managing PAIs, with the onboarding of the Sustainalytics dataset, which will form the basis of future reporting and potential key performance indicators. For more detailed information about our work on PAIs, for the calendar year 2023 and 2024 can be found at

<https://www.fulcrumasset.com/inst/uk/en/important-information/>

How did this financial product perform compared to the reference benchmark?

There is no index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes

- *How does the reference benchmark differ from a broad market index?*

N/A

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

N/A

- *How did this financial product perform compared with the reference benchmark?*

N/A

- *How did this financial product perform compared with the broad market index?*

N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Pacific Multi-Asset Sustainable – Balanced Fund

Legal entity identifier: 213800CP8VOALNPlez33

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<p><input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: %</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: %</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.4% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund seeks to promote both environmental & social characteristics.

95.3% of the Fund's holdings were aligned with E/S characteristics. All the Fund's holdings excluding cash, met at least one or more of the Sustainable Criteria investment styles laid out in the Global Sustainable Investment Alliance outlined below and direct investments in sovereign bonds scored an above average on the ESGP rating. All investments underwent PAI, ESG and revenue exposure analysis where data was available to further ensure underlying holdings were aligned with E/S characteristics.

The following list are environmental characteristics promoted by the fund:

- o climate change mitigation
- o renewable energy
- o clean technologies
- o battery solutions
- o clean water
- o recycling & water treatment
- o biodiversity

The following list are social characteristics promoted by the fund:

- o improving board diversity
- o reducing gender pay gap
- o improving senior female management representation
- o extending human lifespan
- o access to healthcare
- o social housing
- o education
- o drug discovery

The Fund is a fund of funds and seeks to achieve its investment objective by investing principally in underlying funds, including open-ended exchange traded funds. The Fund scores each Underlying Funds against the Global Sustainable Investment Alliance's seven 'types' of sustainable investment as set out in the table below (the "Sustainable Criteria investment styles").

All underlying funds met at least one of the Sustainable Criteria investment styles outlined below.

Style Name	Description
Negative / Exclusionary Screening	The exclusion from an Underlying Fund of certain sectors, companies or practices based on specific criteria related to environmental social or governance ("ESG") factors such as entities with exposure to tobacco, armaments, thermal coal, animal testing or other factors which are detrimental to ESG goals.
Positive / Best in Class Screening	Investment in sectors, companies or projects selected for positive ESG performance relative to industry peers.
Norms Based Screening	Screening of investments against minimum standards of business practice based on international norms, such as those issued by the Organisation for Economic Co-operation and Development; International Labor Organization, the United Nations and UNICEF.
ESG Integration	The systematic and explicit inclusion by investment managers of ESG factors into financial analysis.
Sustainability Themed Investing	Investment in themes or assets specifically related to sustainability (such as clean energy, green technology or sustainable agriculture).
Impact / Community Investing	Targeted investments aimed at solving social or environmental problems where capital is specifically directed to underserved individuals or communities, as well as financing that is provided to businesses with a clear social or environmental purpose.
Stewardship and Voting	The use of shareholder power to influence corporate behaviour, including through direct corporate engagement (i.e., communicating with senior management and/or boards of companies), filing or co-filing shareholder proposals, and proxy voting that is guided by comprehensive ESG guidelines.

The investment team conducted regular meetings with fund management teams enabling a deeper understanding of their sustainability credentials, the quality of its management team and competitiveness of its products and services. The investment team also leveraged external research to complement its own fundamental research and analysis.

Although the Fund does not have a sustainable investment objective and does not commit to invest a minimum percentage in "sustainable investments" within the meaning of Article 2(17) of SFDR, certain principal adverse indicators ("PAIs") were used as a proxy to measure and test the environmental and social characteristics of the investments within Underlying Funds. Specifically, carbon emissions (Scope 1, 2 & 3), carbon intensity & board diversity PAIs were used to calculate fund and company scores to measure and test how they performed regarding environmental and social characteristics. These PAIs enabled the Fund to analyse the potential negative impact of underlying investments on the environment and society.

Additionally, the Investment Manager considered Sustainable Accounting Standards Board ("SASB") Scores provided by TruValue Labs, a third party data service provider which analyses various publicly available sources to assess ESG risks and opportunities against 26 ESG categories as defined by the SASB, along with an overall score and a volume score. This SASB data feed covers 19,000+ companies with more than 12 years of history and assisted in providing coverage for the Fund's investments. Where data was lacking,

the Investment Manager used supplemental data or industry averages where possible to get a greater understanding of an investment's environmental or social characteristics.

The fund complied with the Paris Aligned Benchmarks exclusions. All underlying funds invested in companies:

- with less than 1 % or more of their revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite
- with less than 10 % or more of their revenues from the exploration, extraction, distribution or refining of oil fuels
- with no exposure to activities related to controversial weapons
- with no exposure to activities related to the cultivation and production of tobacco;
- with no exposure to activities related to controversial weapons
- that are not in violation of the United Nations Global Compact (UNGC) principles or the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

For sovereign and supranational bonds (whether direct or indirectly invested in), environmental and social characteristics were measured using a ESGP (Environmental, Social, Governance & Political) score calculated by collecting data from the World Bank and Freedom House. The ESGP score is an average of the E, S, G & P score (shown below). The E score was calculated by averaging normalised E1, E2 and E3 scores, the S score was calculated by averaging normalised S1, S2 and S3 scores & the G Score was calculated by averaging normalised G1, G2 and G3 scores (raw data is collected from the World Bank). The Global Freedom Score was calculated by Freedom House which rates countries across 13 factors, looking at factors such as the rule of law, political freedoms and freedom of expression. A country's carbon intensity (tonnes of Co2 utilised to produce \$1,000 of GDP) was used to measure how individual countries rank from an environmental perspective compared to their global peers. All direct sovereign investments had an above average ESGP score.

		Metrics used to calculate Sovereign bond ESGP Score
	E1	CO2 emissions (metric tons per capita)
E	E2	PM2.5 air pollution, mean annual exposure (micrograms per cubic meter)
	E3	Terrestrial and marine protected areas (% of total territorial area)
	S1	Individuals using the Internet (% of population)
S	S2	Mortality rate, under-5 (per 1,000 live births)
	S3	Proportion of seats held by women in national parliaments (%)
	G1	Control of Corruption: Estimate
G	G2	Strength of legal rights index (0=weak to 12=strong)
	G3	Rule of Law: Estimate
P	P	Global Freedom

● *How did the sustainability indicators perform?*

All underlying funds met at least one or more of the Sustainable Criteria investment styles laid out in the Global Sustainable Investment Alliance outlined above.

As noted above, the Fund has regard to certain PAIs as a proxy to measure and test the environmental and social characteristics of the investments within the Fund and specifically will assess carbon emissions (Scope 1, 2 & 3), carbon intensity and board diversity PAIs to measure the potential negative impact of underlying investments on the environment and society. Below we have calculated the Sustainable Balanced Fund's weighted average Percentage of Female Executive and Directors, PAI Carbon Intensity Scope 1, 2 & 3 EUR score & Total Carbon Emissions Scope 1, 2 & 3 score.

The calculation process has evolved since the previous period as we now view and calculate the overall portfolio scores as thousands of individual security investments rather than a small collection of fund investments. On a lookthrough basis, the portfolio has PAI data covering 60% of underlying investments. To assess the portfolio's environmental characteristics, we measured the portfolio's PAI Carbon Intensity Scope 1, 2 & 3 EUR and PAI Total Carbon Emissions Scope 1, 2 & 3 scores. The portfolio's PAI Carbon Intensity Scope 1, 2 & 3 EUR was 451 tonnes CO₂ per EURm and the portfolio's PAI Total Carbon Emissions Scope 1, 2 & 3 was 12,068,478 tonnes.

An investment's percentage of Female Executive and Directors helped assess whether investments were promoting the social characteristic of gender diversity within the workplace related to the Board Diversity PAI. The portfolio exhibited a Percentage of Female Executives and Directors of 34.4%.

Given the multi-asset nature of the portfolio, only 60% of the portfolio had sufficient data to calculate relevant PAI sustainable indicators, therefore the current calculations are incomplete and based upon best available data. However, we expect this to improve as more companies supply data providers with more extensive sustainable data. Additionally, there is often a lag with the lookthrough holdings data that underlying fund managers provide data providers. Our data supplier is now Factset for all data, we previously used Morningstar to supply us with PAI data.

The portfolio's ESG Score for underlying funds derived from quarterly TruValue Labs SASB Category company scores was 57. A score above 50 is positive and below 50 is negative. Note that investment TruValue Labs ESG scores can range from 0 (worst score) to 100 (best score), however as at end December 2024 the ESG company scores of the total universe of companies above \$1bn market cap ranged from 33-78. The majority of company scores are clustered between 40-60 so a 1 point rise in score is significant. There are cases where a company has a low score due to legacy or current issues, however if the manager sees or expects improvement in the relevant SASB areas, that is seen as a positive in the investment case and could be an opportunity to help drive change.

11.8% of the Fund's portfolio was held in sovereign bonds at 2024. The Sovereign ESGP Score for the portfolio was 75 showing that the portfolio's sovereign exposure was invested in above average ESGP sovereigns. ESGP scores are within a range of 0 (worst score) to 100 (best score) and the average country/sovereign will have a score of 50.

The total portfolio ESG score, calculated by combining ESG SASB Scores for underlying funds and ESGP scores for direct Sovereign investments was 59.6. There were no direct equity investments, therefore our internal proprietary scoring system to ensure direct equity investments meet the minimum criteria was not required.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...and compared to previous periods?**

Portfolio scores for 2024 shown in the table below were calculated using a quarterly average approach:

	2022	2023	2024
Percentage of Female Executive & Directors	30.5%	31.8%	34.4%
PAI Carbon Intensity Scope 1, 2 & 3 EUR (tonnes Co2 per EURm)	571	457	451
PAI Total Carbon Emissions Scope 1, 2 & 3 (tonnes Co2)	5,310,064	10,345,947	12,068,478
TruValue ESG Score	56	57.4	57
Total Portfolio ESG Score (TruValue + Sovereign)	59.2	59.9	59.6

The Fund's GHG intensity has continued its decline showing the improvement in sustainability of the portfolio. The increase in PAI Total Carbon Emissions Scope 1, 2 & 3 was primarily due to an increase in allocation to the US Equity market and larger cap ETFs in 2024, large caps also performed well throughout the year becoming an even larger portion of the market. The US Equity market is where the largest market capitalisation companies in the world are listed, and these mega cap companies tend to have high carbon scope 1, 2 & 3 emissions due to their size and recent energy requirements of AI.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

See above the list of environmental objectives

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Environmental Sustainable investments had less than 100 GHG Intensity (Scope 1+2) and also had a high Environmental Score above 55. Social Sustainable investments had a high Social score above 55 and also had to have a GHG Intensity (Scope 1+2) below 200. All Sustainable investments must have a Governance score above 40 and have less than 10% revenue exposure to fossil fuels.

How were the indicators for adverse impacts on sustainability factors taken into account?

All Sustainable investments are tested with ESG & GHG Intensity scores and revenue

exposure to fossil fuels.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable investments were aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The Fund scores each Underlying Funds against the Global Sustainable Investment Alliance's seven 'types' of sustainable investment as set out in the above.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory and additional PAI indicators were calculated for the Fund, however many of these PAIs still lack the coverage required to be useful measurements. See above the selected mandatory PAIs calculated for the fund to assess the impact on sustainability factors.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is the average weight over 2024 calendar year.

The holdings above are an average weight over 2024 calendar year.

What was the proportion of sustainability-related investments?

The table below sets out details of the sustainability related investments within the portfolio using a quarterly average throughout 2024.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sector	Assets
US Equity	22.1%
Global Equity	16.1%
IG Corporate Bonds (Global)	14.4%
UK Equity	8.5%
UK Government Bonds	7.1%
Absolute Return	6.7%
IG Corporate Bonds (GBP)	5.6%
Emerging Equity	5.6%
Cash	4.7%
REITS	4.3%
Japan Equity	3.5%
Europe ex UK Equity	1.4%

The sectors above are an average weight over 2024 calendar year.

0.7% of the portfolio's underlying equity investments derived revenue from subsectors exposed to the mining sector. This exposure was from underlying companies that had exposure to precious metals required for a transition to a green economy.

1.5% of the portfolio's underlying equity investments derived revenue from subsectors exposed to the fossil fuel sector.

To derive these revenue exposures the team underwent a granular quantitative analysis of every underlying company's revenue exposure to over 1500 different subindustries. Each subindustry was assigned to a theme or sector (a subindustry could be assigned to multiple themes). Many subindustries may be related to mining or fossil fuels, however may be indirect in nature.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the portfolio was aligned to the EU Taxonomy. The Fund does not commit to investment in Taxonomy aligned investments.

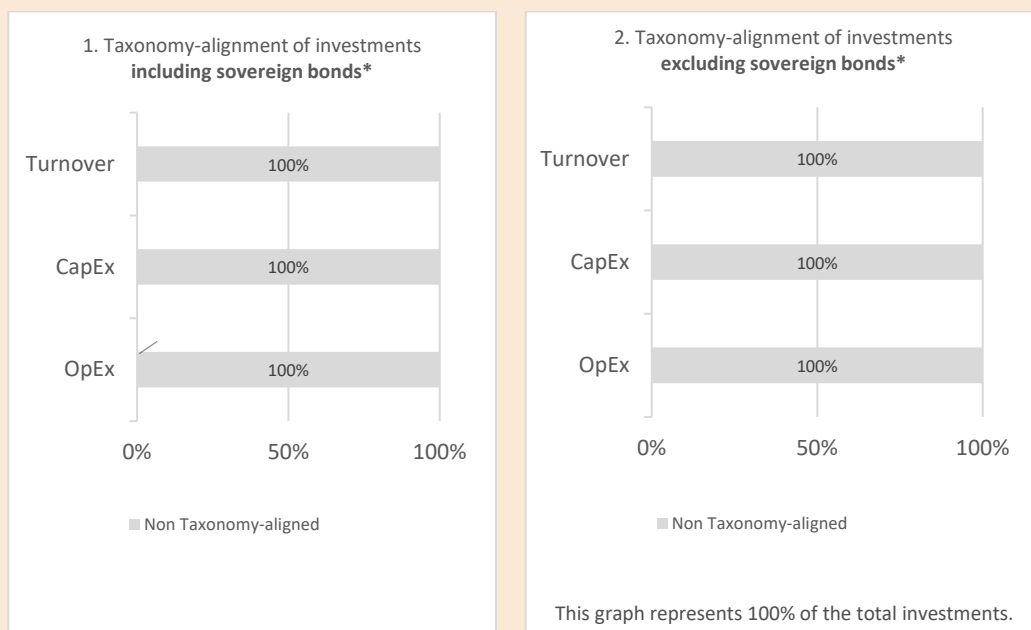

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

● ***What was the share of investments made in transitional and enabling activities?***

As the Fund has not committed to make investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

38.1% of sustainable investments had an environmental objective.

What was the share of socially sustainable investments?

12.3% of sustainable investments had a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments that were difficult to categorise such as cash and other liquid ancillary assets or investments for hedging or efficient portfolio management purposes were placed in “#2 Other” and they were there to assist in achieving the financial long-term goals of the financial product. There was no minimum environmental or social safeguards in respect of these assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of the monitoring process of underlying fund managers, the investment team engaged with the underlying fund managers, particularly when a potential issue had come to the team’s attention. Each engagement was logged in the engagement log. Details such as the date of the engagement, the reason for the query and any comments from the fund management team were all documented.

An example of the team engaging with underlying fund managers include:

- Fund managers with AI technology companies which have data centers that are increasingly energy intensive. The fund managers confirmed that technology engagement is part of their ongoing engagement strategy, with a number examples of engagement having already taken place.
- Pacific Asset Management utilised ESG and PAI data from FactSet and Morningstar to obtain lookthrough data for each underlying fund in order to assess each

underlying manager's environmental and/or social characteristics from an objective bottom up view. The data analysis is extensive including fund & company mandatory PAIs, additional PAIs, ESG scores and revenue exposures to environmental factors & social factors. The team used this data to assess each underlying manager's ESG credentials.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Pacific Longevity and Social Change

Legal entity identifier: 213800LPV4GVQWFRDS98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input type="radio"/> Yes	<input checked="" type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ____% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ____%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In 2024 the Fund promoted positive social development by channeling investment to companies or undertakings which either (a) contribute in some way to longer life-spans, whether by way of developing health-care products or treatments which can help combat disease or prolong life-spans, products which contribute to a healthy life-style or generally provide products or services that promote longer and healthier lives or (b) do not directly contribute to longer life-spans but whose products or services contribute to or enhance the quality of life for older generations (for example entities in such areas as healthcare, education, finance or leisure, whose products or services will contribute in some way to physical or emotional well-being of older generations).

97.2% of the Fund's holdings satisfied one or more of the characteristics discussed below.

As part of the investment process, the investment team applied exclusionary ESG criteria relevant to the above longevity themes, resulting in the exclusion of certain industries from the investable universe that reduce lifespans or health span such as defence and weapons production, tobacco or companies engaged in the production of alcohol as well as environmental factors such as energy, iron and steel production, mining for coal and gas.

Although the Fund does not have a sustainable investment objective and does not commit to invest a minimum percentage in "sustainable investments" within the meaning of Article 2(17) of SFDR, certain principal adverse indicators ("PAIs") were used as a proxy to measure and test the environmental and social characteristics of the investments within the Fund. Specifically, carbon emissions (Scope 1, 2 & 3), carbon intensity & board diversity PAIs were used to calculate fund and company scores to measure and test how they are performing regarding environmental and social characteristics. These PAIs enabled the Fund to analyse the impact of underlying investments on the environment and society.

Additionally, the Investment Manager considers Sustainable Accounting Standards Board ("SASB") Scores provided by TruValue Labs, a third party data service provider which analyses various publicly available sources to assess ESG risks and opportunities against 26 ESG categories as defined by the SASB, along with an overall score and a volume score. This SASB data feed covers 19,000+ companies with more than 12 years of history and assists in providing coverage for the Fund's investments. Where data is lacking, the Investment Manager used supplemental data or industry averages to get a greater understanding of an investment's environmental or social characteristics.

The Fund's name changed in February 2025 from Pacific Longevity and Social Change to Pacific Global All Cap Opportunities Fund after this Annex IV's reporting period and has

since changed its Environmental & Social objectives to:

- promote better environmental conditions and enhanced water quality by positive screening of target companies against such factors as greenhouse gas emissions, the use of raw materials, contribution to the circular economy, the use of renewable energy, recycling, the use of water and land and the production of waste by target companies, both prior to investment and over the investment life-cycle
- promote better social conditions, equality in the workforce and greater social diversity and cohesion by virtue of its positive screening of potential investments against such factors as the target company's commitment to tackling inequality in pay and other respects, labour relations and employee wellbeing, investment in economically or socially disadvantaged communities, board diversity, senior female management representation for the social characteristics.

● ***How did the sustainability indicators perform?***

The portfolio's ESG Score derived from quarterly TruValue Labs SASB Category Scores throughout 2023 was 55.5 while iShares MSCI ACWI ETF ESG Score was 56.2. The portfolio's Social Score derived from Socially related SASB Category Scores was 52.4 while iShares MSCI ACWI Social Score was 52.4. The Fund's Social Score is a subset of the ESG Score. A Score above 50 is positive and below 50 is negative. The Scores allocated to individual investments were regularly assessed and used to engage with the relevant issuer. There are cases where an issuer had a low SASB Score due to legacy or current issues, however if the manager saw or expects improvement in the relevant SASB areas, that is seen as a positive in terms of the sustainability investment case and is seen as an opportunity to help drive change. Note that investment ESG and Social Scores can range from 0-100, however as at end December 2024 the ESG Scores of individual issuers held within the Fund ranged from 43-73. The iShares MSCI ACWI was used as a comparator to assess how the Longevity and Social Change Fund compares to a broad global equity fund.

As noted above, the Fund has regard to certain PAIs as a proxy to measure and test the environmental and social characteristics of the investments within the Fund and specifically assessed carbon emissions (Scope 1, 2 & 3), carbon intensity, and board diversity PAIs to measure the potential negative impact of underlying investments on the environment and society. Below we have calculated the portfolio's quarterly weighted average Percentage of Female Executive and Directors, PAI Carbon Intensity Scope 1, 2 & 3 EUR score & Total Carbon Emissions (Scope 1, 2 & 3).

An investment's percentage of Female Executive and Directors helped assess whether investments were promoting the social characteristic of gender diversity within the workplace related to the Board Diversity PAI. The portfolio exhibited a Percentage of Female Executives and Directors of 33.7% while iShares MSCI ACWI ETF scored 30.7%.

To assess the portfolio's environmental characteristics, we measured the portfolio's PAI Carbon Intensity Scope 1, 2 & 3 EUR score. The portfolio had a carbon intensity score of 99.5 tonnes CO₂ per EURm. This is significantly below the iShares MSCI ACWI which we have

calculated as having a PAI Carbon Intensity Scope 1, 2 & 3 EUR score of 864 tonnes CO₂ per EURm. The portfolio's Total Carbon Emissions (Scope 1, 2 & 3) was 1,894,901 tonnes. 4% of the iShares MSCI ACWI had insufficient data. PAI data has been drawn from Morningstar & Factset. Fund level scores have been calculated from the bottom up.

The portfolio had 0% exposure to sectors that reduce lifespans or health span such as defence and weapons production, tobacco or companies engaged in the production of alcohol as well as environmental factors such as energy, iron and steel production, mining for coal and gas. To derive these revenue exposures we have undergone a granular quantitative and qualitative analysis described above.

● ...and compared to previous periods?

Portfolio scores for 2024 shown in the table below were calculated using a quarterly average approach.

	2022	2023	2024
Percentage of Female Executive & Directors	32.8%	34.8%	33.7%
PAI Carbon Intensity Scope 1, 2 & 3 EUR (tonnes Co₂ per EURm)	97	142	99.5
PAI Total Carbon Emissions Scope 1, 2 & 3 (tonnes Co₂)	1,900,398	2,534,978	1,894,901
ESG Score	55.8	56.1	55.2
Social Score	55.5	55.3	52.4

2024 saw an improvement in the portfolio's GHG intensity and Total carbon emissions and the portfolio's GHG Intensity continues to be significantly above MSCI ACWIs. The S Score was in line than MSCI ACWI in 2024, falling from 55.3 in 2023 to 52.4 in 2024, partly due to a company Abbvie acquired back in 2020 settling historical lawsuits and are not relevant to Abbvie's ongoing operations.

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Not applicable

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Not applicable

- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Not applicable

- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Not applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory and additional PAI indicators were calculated for the Fund, however many of these PAIs still lack the coverage required to be useful measurements. See above the selected mandatory PAIs calculated for the fund to assess the impact on sustainability factors.

.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is the average weight over 2024 calendar year.

Largest investments	Sector	% Assets	Country
AstraZeneca	Healthcare	3.7	United Kingdom
Booking	Consumer Services	3.5	United States
Convatec	Healthcare	3.0	United Kingdom
Abbvie	Healthcare	2.9	United States
Intermediate Capital	Financials	2.9	United Kingdom
Service Corp	Consumer Discretionary	2.8	United Kingdom
GSK	Healthcare	2.8	United Kingdom
Hologic	Healthcare	2.7	United States
Carlyle	Financials	2.6	United States
ICON	Healthcare	2.6	Ireland
Essilorluxottica	Consumer Discretionary	2.5	France
Thermo Fisher	Healthcare	2.4	United States
Merck	Healthcare	2.4	United States
Exact Sciences	Healthcare	2.3	United States
Ulta Beauty	Consumer Discretionary	2.3	United States

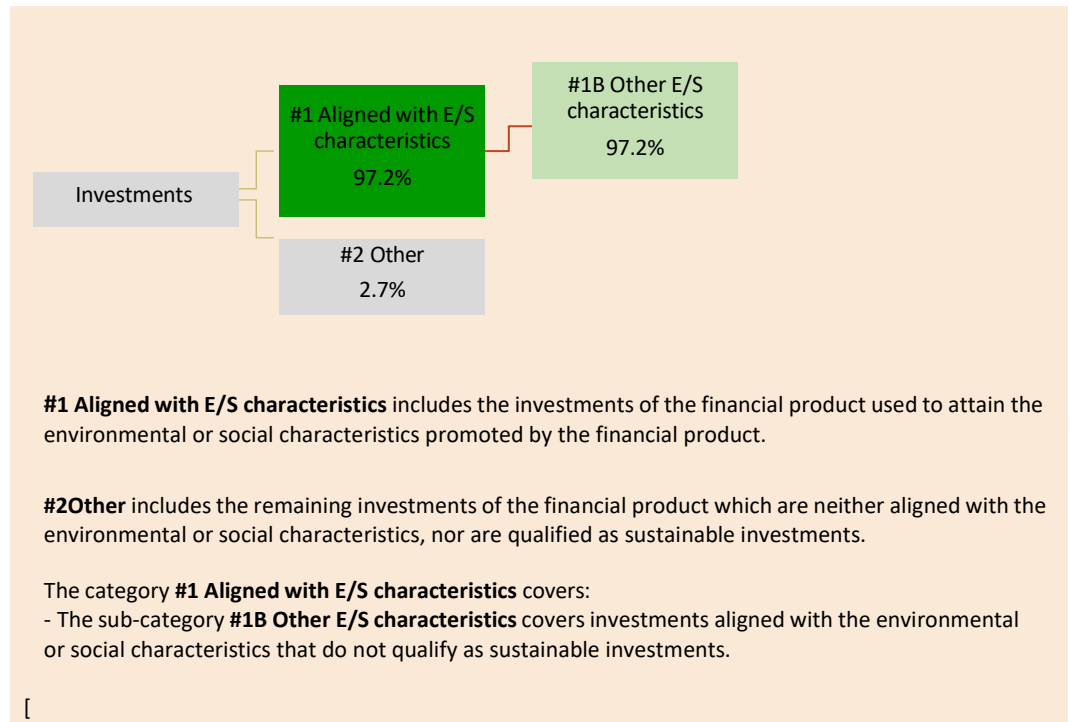

The holdings above are an average weight over 2024 calendar year.

What was the proportion of sustainability-related investments?

The table below sets out details of the sustainability related investments within the portfolio using a quarterly average throughout 2023.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	Assets
Health Care	49.9%
Consumer Cyclicals	11.6%
Financials	18.1%
Consumer Non-Cyclicals	12.0%
Consumer Services	5.5%
Non-Energy Materials	2.8%

The sectors above are an average weight over 2024 calendar year.

The Fund did not invest in sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining, or distribution including transportation, storage and trade of fossil fuels. This is based on a quarterly average over 2024.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

0% of the portfolio was aligned to the EU Taxonomy. The Fund does not commit to investment in Taxonomy aligned investments and none of the Fund's holdings during the reference period were so aligned.

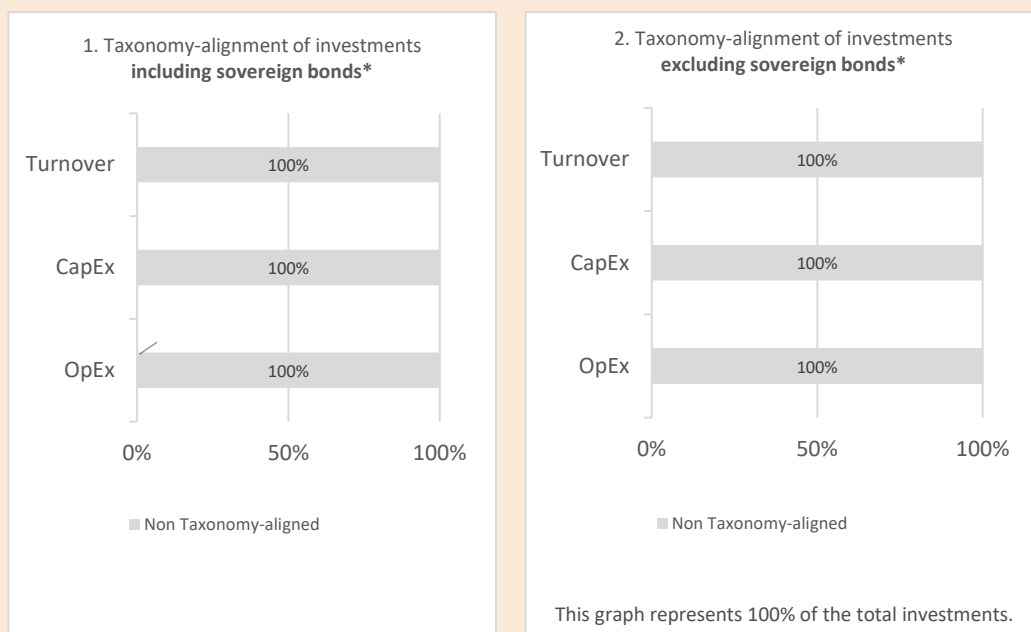

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

- **What was the share of investments made in transitional and enabling activities?**
As the Fund has not committed to making investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A.

What was the share of socially sustainable investments?

N/A.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments that were currently difficult to categorise such as cash and other liquid ancillary assets or investments for hedging or efficient portfolio management purposes were placed in “#2 Other” and they were there to assist in achieving the financial long-term goals of the financial product. There were no minimum environmental or social safeguards in respect of these assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment team regularly engaged with companies in the fund to enhance their understanding of the company’s ESG performance on issues such as diversity, equality and governance. The team voted its proxy with a view to promote board diversity among the investee companies.

An engagement log has been updated over the period whenever the investment team engaged with an underlying company. Details such as the date of the engagement, the reason for the query and any comments from the company were all documented.

Example topics of the team’s engagements with companies include:

- assessing the quality of a company’s disclosures, and level of promotional activity regarding premature products
- assessing the progress of an investigation involving potential data privacy violations

Pacific Asset Management utilised ESG and PAI data from FactSet and Morningstar to assess company mandatory PAIs, additional PAIs, ESG scores and revenue exposures to environmental factors & social factors. The analysis was regularly run allowing the team to analyse which companies have been improving or deteriorating in certain environmental or social areas enabling more focused analysis to find out the specific causes for these score changes.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

- ***How does the reference benchmark differ from a broad market index?***
